The Editor

Dr. Jerrold Post is Professor of Psychiatry, Political Psychology and International Affairs and Director of the Political Psychology Program at The George Washington University.

Dr. Post has devoted his entire career to the field of political psychology. Dr. Post came to George Washington after a 21-year career with the Central Intelligence Agency where he was the founding director of the Center for the Analysis of Personality and Political Behavior, an interdisciplinary behavioral science unit which provided assessments of foreign leadership and decision-making for the President and other senior officials to prepare for Summit meetings and other high-level negotiations and for use in crisis situations. He played the lead role in developing the “Camp David profiles” of Menachem Begin and Anwar Sadat for President Jimmy Carter and initiated the U.S. government program in understanding the psychology of terrorism in the late 1970s. In recognition of his leadership of the Center, Dr. Post was awarded the Intelligence Medal of Merit in 1979. He received the Nevitt Sanford Award for Distinguished Professional Contributions to Political Psychology in 2002.

Dr. Post is a founding member of the International Society of Political Psychology, was elected Vice-President in 1994, and has served on the editorial board of Political Psychology since 1987. A Distinguished Life Fellow of the American Psychiatric Association (APA), he has been elected to Fellowship in the American College of Psychiatrists. He is a member of the American Association of Psychiatry and the Law. After serving as Chair, Taskforce for National and International Terrorism of the APA, (1994-2000), he was appointed (2004) Chair, Workgroup for Terrorism and Political Violence.

Dr. Post has published widely on crisis decision-making, leadership, on the psychology of political violence and terrorism, with special reference to terrorist group dynamics. He has authored eight book chapters on terrorist psychology and the entry on terrorism and counter-terrorism in the Oxford Companion to Military History. In his writings, he recently has been addressing weapons of mass destruction terrorism: psychological incentives and constraints, suicide terrorism, and information systems

Dr. Post received his B.A. *magna cum laude* and M.D. from Yale. He received his post-graduate training in psychiatry at Harvard Medical School and the National Institute of Mental Health. He has also received graduate training at the Johns Hopkins School of Advanced International Studies.

After the invasion of Kuwait, Dr. Post developed a political psychology profile of Saddam Hussein. He provided his analysis of Saddam's personality and political behavior in testimony at the hearings on the Gulf crisis before the House Armed Services Committee and the House Foreign Affairs Committee. He served as a psychiatric expert on terrorist psychology for the Department of Justice in the 1997 trial of an Abu Nidal terrorist, and in July 2001, testified as an expert witness in the federal trial in New York of one of the Osama bin Laden terrorists responsible for the bombing of the U.S. Embassy in Tanzania.

Since 9/11, he has testified before the House National Security subcommittee hearings on bio-terrorism, before the Senate Armed Services Committee on terrorist psychology and motivation, and before the U.N. International Atomic Energy Agency in Vienna, Austria, at a specially convened session on nuclear terrorism on the psychology of nuclear terrorism. He is a frequent commentator on national and international media.
The tragic events of September 11 brought international terrorism into sharp focus with the largest single mass casualty incident of terrorism in history. And the attacks took place in the United States, a country that had been largely immune to international terrorism on its shores. Despite a decrease in terrorist events in the late 1990s, following the September 11 attacks there is now a resurgence of terrorism globally.

This remarkable document, introduced in evidence by the U.S. Department of Justice in the trial in the spring of 2001 of the Al-Qaeda terrorists responsible for the bombing of the U.S. embassies in Kenya and Tanzania, provides a revealing—and thoroughly chilling—view of the “mind” of Al-Qaeda and its leadership. It is at once a manual of terror and a basic tradecraft manual. The editor of this manual, Dr. Jerrold Post, a recognized expert on international terrorism, wisely lets the manual speak for itself. His insightful editorial commentary reveals that this manual of terror goes well beyond the detailed instructions for operating “in the land of the enemy.” It is a guide to the planning, motivation and justification of Al-Qaeda operations.

The eighteen chapters of the Manual of Terror take the reader through a tour of Al-Qaeda membership criteria, basic tradecraft, means and methods of communication, member safety, security, espionage, assassination, and capture. Many of the pure trade craft sections, such chapters on member safety, instructions on how to blend in with the local community, establishing safe houses, using forged documents and means of communication could have been written by any number of respected covert organizations throughout the world. The tradecraft instructions are interwoven with Koranic justification designed to inspire the reader.

The authors of the manual have followed in the footsteps of the Ayatollah Khomeini of Iran in their use of the Koran to justify acts that are expressly forbidden in Islam – murder of innocent civilians, the use of poisons, and attacking members of the Abrahamic faiths. Chapter fourteen gives express directions and justification for the beating and killing of hostages, while chapter sixteen instructs the reader on how to
create and deliver deadly poisons. Indeed, as Dr. Post points out, the Suras in the Koran and the episodes in the life of the prophet that are cited are usually taken entirely out of context.

This manual demonstrates the sophistication, flexibility and adaptive learning of Al-Qaeda. The manual has several sections devoted to “Lessons Learned.” This is an organization that reviews past actions, learns from its mistakes and finds ways to improve future operations. Even the minutest details are addressed in this manual. Operatives are given permission to not follow Islamic traditions such as praying five times a day or wearing a beard if necessary to fit into a local community; they are also warned not to get parking tickets or use their real names on the phone. Operatives receive special guidance on how to avoid detection by law enforcement and in the event of their capture, what to expect during interrogation. They are told how to act during interrogation and during imprisonment, with important emphasis on rebuilding their network in prison.

Had this significant document been more closely attended to in the wake of the 1998 embassy bombings, it would have better focused out attention on the danger posed to the United States by this sophisticated transnational terrorist organization.

Ambassador L. Paul Bremer III  
Chairman and Chief Executive Officer, Marsh Crisis Consulting  
Chairman, National Commission on Terrorism  
Former Ambassador at Large for Counterterrorism (1986-1989)
Editor’s Preface

During the spring of 2001, I had the opportunity of serving as an expert witness on the psychology of terrorism during the death penalty phase of the Al-Qaeda terrorists tried and convicted for their part in the bombing of the United States embassies in Dar es Salaam, Tanzania, and Nairobi, Kenya. One of the exhibits introduced by the government was a manual “Military Studies in the Jihad Against the Tyrants.” This training manual was found and seized in May 2000 by British investigators in Manchester, England, during a search of the home of Anas al-Liby, a fugitive charged in the Al-Qaeda terrorism conspiracy. As an expert witness, a translation of the 180-page manual was provided to me.

The provenance of the manual is somewhat obscure. Portions of it were circulating in radical Egyptian circles, suggesting that Ayman al-Zawahiri, Osama bin Laden’s personal physician and designated successor, a founder of the Islamic Jihad of Egypt, probably played a central role developing the Al-Qaeda terrorism manual.

It is an altogether remarkable document. On the one hand, it resembles nothing more than a basic tradecraft training manual, concerned with how to operate in a hostile environment. There are detailed instructions on everything from ciphers to how to resist interrogation. But it is also a manual of terror, with no less than four of the seventeen lessons or chapters devoted to techniques for assassination. But it is not merely a list of instructions, for it is also written to inspire the undercover operator as he carries on his dangerous work. And the language at times is quite eloquent.

Moreover, the document reflects a sophisticated approach on the part of Al-Qaeda operational officials for there is a continuing emphasis on lessons learned. Many of the chapters cite previous mistakes, which provide the basis for the points emphasized in the lesson. And they do not learn lessons only from their past mistakes, but from adversaries as well. In one section, they cite the astute observational skill of an Israeli Mossad counter-espionage agent who foiled a terrorist plot, and cite Soviet KGB sources in others. Thus the manual reflects the adaptive learning of the
organization, and the care with which Al-Qaeda prepares its operatives. No
detail is too small, as exemplified by the instruction in Lesson Eight, which
is concerned with Member Safety, “Do not park in no parking zones.”

Many of the instructions are accompanied by elaborate justification,
either citing suras, verses from the Koran, or scholars who have provided
commentary on the Koran, or hadiths, sayings of the prophet Mohammad.
These elaborate justifications are offered especially when the instructions
recommended seem to contradict Islamic teaching. In this text, the suras are
not numbered, and while some are fairly well known, others are more
obscure. Similarly, the sources of some of the hadiths are given, while the
sources of others are not identified. The authenticity of many of the suras
and hadiths is questionable, and several of the suras are taken out of context.
For the Islamic youth taught to respect without questioning religious
scholars, these can provide apparently persuasive religious authority
justifying acts of violence. As Daniel Brumberg\textsuperscript{1} sagely notes, in evaluating
the authenticity of the sources, Surah 3, 78, which speaks to Christians and
Muslims, seems most aptly to apply to the writers of this manual.

\begin{quote}
There are among them (People of the Book)
A section who distort
The Book with their tongues
(As they read the Book) you would think
It is part of the Book
But it is not part
Of the Book: and they say
“That is from Allah,”
But it is not from Allah:
It is they who tell
A lie against Allah
And (well) they know it.
\end{quote}

The manual is reproduced in its entirety, with the exception of the
specific instructions for producing poisons and toxins in lesson sixteen,
which have been deleted. Each section is accompanied by brief
commentary. In order to place the manual in context, the volume is
introduced with a chapter summarizing the rise of Osama bin Laden as
terrorist leader and the organization and structure of Al-Qaeda and the
manner in which its members are trained.
Military Studies in the Jihad Against the Tyrants: The Al-Qaeda Training Manual

Jerrold M. Post, M.D.

Introduction

Osama bin Laden was born in Jeddah, Saudi Arabia, in 1957, the 17th of 20-25 sons of Mohamed bin Laden, who had 52-54 children in total. Originally an immigrant from Yemen, Mohamed bin Laden, by befriending the royal family, had established a major construction company and had amassed a fortune of some 2 to 3 billion dollars by the time of his death in 1967 in a plane crash. Although estimates range from 18 million to as high as 200 million, it most commonly agreed that bin Laden inherited approximately 57 million dollars at age 16 from his father’s estate.

Osama’s mother, Hamida, a Syrian woman of Palestinian descent, was the least favorite of Mohamed’s ten wives, and Osama was the only child, perhaps the basis of Osama bin Laden’s later estrangement from his family. Hamida was reportedly a beautiful woman with a free and independent spirit who, as a result, often found herself in conflict with her husband. Reportedly by the time Osama was born, Hamida had been ostracized by the family and had been nicknamed “Al Abeda” (the slave). As her only child, Osama was referred to as “Ibn Al Abeda” (son of the slave). Hamida did not live on the compound with the larger bin Laden family and as a result was virtually non-existent in her son’s early life. When Mohammed bin Laden died, Osama, at the age of ten, for all intents and purposes did not know his mother.

Osama bin Laden attended King Abdul Aziz University in Jeddah. He is a certified civil engineer, and was working toward a degree in Business Management (although it is not clear that he completed his course work) preparing him to play a leadership role in the family’s far flung business interests. These two skill areas would serve him in good stead in Afghanistan.
An important influence on Osama bin Laden’s political ideology was Abdullah Azzam, a radical Palestinian professor at the university who became an important intellectual mentor for bin Laden. It was Azzam, a noted Islamist, who provided the vision to bin Laden of what should be done in response to the invasion of the Muslim state of Afghanistan by the Soviet Union, and what role bin Laden could play. In particular, he conveyed to bin Laden the importance of bringing together Muslims from around the world to defend Afghanistan against the godless Soviet Union. Demonstrating his already blossoming management skills, Osama bin Laden assisted Azzam who founded the international recruitment network Maktab al-Khidamat (MAK - Services Office). MAK advertised all over the Arab world for young Muslims to fight the Afghanistan jihad. This massive international recruitment effort brought in Muslims from around the world who were to become the Afghan Arabs, the nucleus of bin Laden’s loyal followership; 5,000 were recruited from Saudi Arabia, 3,000 from Algeria, and 2,000 from Egypt. Recruitment booths were set up in the United States and Europe.

A leader is not formed until he encounters his followers, and bin Laden’s leadership experience during the struggle in Afghanistan against the Soviet invasion was crucial in the psychological development of bin Laden as a leader and was transformational for bin Laden as leader. He came to Afghanistan unformed and naïve. Generously using his own funds, he built clinics, hospitals, bought ammunition and weapons. Eschewing an opulent lifestyle, he lived an ascetic life in caves with his followers. Regularly preaching about their holy mission, and inspirational in his rhetoric, bin Laden inspired his followers who came to adulate him. That they were able, with substantial American aid to be sure, to triumph over the Soviet Union, in what was to become their Vietnam, surely confirmed the correctness of bin Laden’s vision. Allah favored the weak and the underdog, and surely they could not have triumphed over the Godless Soviets unless God was on their side. This was the template of the destructive, charismatic relationship between bin Laden and his religiously inspired warriors, the mujahideen.

Bin Laden had not yet broken with the Saudi government, which after all was the main foundation of his family’s wealth. But he had successfully vanquished one of the three major enemies identified by Muhammad Abdel Salam Faraj, who wrote The Neglected Duty: The
Existing Arab State, the Western-Zionist Nexus, and the Communists. Throughout the 1960s and 1970s, the critical enemy among this triad was the “enemy who was near,” the Arab state, according to leading Islamic fundamentalists. In Faraj’s manifesto, he argued, “We must begin with our Islamic country by establishing the rule of God in our nation…the first battle for jihad is the uprooting of these infidel leaders and replacing them with an Islamic system from which we can build.”

Bin Laden came to see the Soviet super-power as a “paper tiger” that could be defeated, but also set his sights on the remaining super-power, the United States, as a next target. This represented a fundamental departure from the strategy of Faraj, replacing “the enemy that is near” with “the enemy that is afar,” the super-powers.

With the victory in Afghanistan, bin Laden, the warrior king, and his loyal Afghan Arab fighters were eager to continue to pursue the jihad. Bin Laden broadened his vision and determined to pursue the jihad on a worldwide basis, seeking to reconstruct the nation of Islam throughout the world, assisting Muslims who were in conflict in Algeria, Angola, Bosnia, Chechnya, Eritrea, Somalia, Sudan, and so forth. While bin Laden was committed to the international struggle, Abdullah Azzam believed in focusing all efforts on building Afghanistan into a model Islamic state. Following a split with Abdullah Azzam in 1988, with the nucleus of his loyal followers, bin Laden and Ayman al-Zawahiri, a founding father of the Islamic Jihad of Egypt, established Al-Qaeda (The Base) as a direct outgrowth of MAK. The following year Abdullah Azzam died in a mysterious car bomb explosion. Although there has been suspicion of involvement by bin Laden, there has never been any proof linking him to death of his one-time mentor.

Conceptually, Al-Qaeda differed significantly from other terrorist groups and organizations, perhaps reflecting bin Laden’s training in business management. Al-Qaeda was a loose umbrella organization of semi-autonomous terrorist groups and organizations. In effect, bin Laden was chairman of the board of a holding company, providing guidance, coordination, and financial and logistical facilitation. Unlike other charismatically led organizations, such as Guzman’s Sendero Luminosa of Peru, or Ocalan’s PKK of Turkey, both of which were mortally wounded when their leader was captured, bin Laden designated Ayman al-Zawahiri as his successor and number two, although some reports indicated that
Muhammad Atef was the designated successor. A leading Islamic militant, Zawahiri is a physician who founded the Egyptian Islamic Jihad and the new faction, Talaa’al al Fateh (Vanguard of Conquerors.) Zawahiri’s group was responsible for the attempted assassination of President Hosni Mubarak of Egypt and is considered responsible for the assassination of President Sadat. In fact, Zawahiri, who is responsible for most day-to-day decisions, can be seen as serving as CEO to bin Laden as Chairman of the Board (or Executive Vice President to bin Laden as President and CEO), with major responsibility for finance, logistics and operational planning. The number three, Atef, also of the Islamic Jihad of Egypt, was chairman of the military committee and training. Atef was reportedly killed during the conflict in Afghanistan.

With the defeat of the Soviet Union, the warrior king bin Laden and his loyal warriors had lost their enemy. As Eric Hoffer has observed, the power of a charismatic leader derives from his capacity to focus hatred against a single enemy, as Hitler did in the 1930s, uniting the German people in their hatred of the Jews. While in Sudan in 1993, bin Laden found his previous allies, the United States, with a military base on Saudi soil in the wake of the conflict in the Gulf. Decrying this desecration of holy Saudi soil by the infidel Americans, bin Laden had seamlessly transferred his enmity from the first defeated super-power, the Soviet Union, to the remaining super-power, the United States. Moreover, he actively criticized the Saudi royal family for their apostasy, decrying their defiling their stewardship of the land of the two cities, Mecca and Medina.

The vigor of his criticism led Saudi Arabia to revoke his citizenship in 1994, and his family, which depended upon the Saudi leadership for their wealth, turned against him. Now bin Laden was righteously attacking the other two enemies in the triad of enemies, the Western-Israeli nexus, and one of the newly designated apostate Arab nations, Saudi Arabia. But he maintained the primary focus on the external enemy, the United States. Yes, the leadership of the apostate nations had to be replaced, but it was the United States that was the prime enemy, for America was responsible for propping up the corrupt leadership of these countries. Thus he continued the strategy born in Afghanistan of focusing on the enemy who is afar, the Zionist-Crusaders, rather than the enemy who is near, the targhut (oppressive domestic rulers.)
In the October 1996 Declaration of War, bin Laden justified his aggression as defensive aggression, asserting that the Islamic nation was under attack.

The people of Islam had suffered from aggression, inequality and injustice imposed on them by the Zionist-Crusader alliance and their collaborators to the extent that Muslims’ blood became the cheapest and their wealth looted in the hands of enemies. Their blood has spilled in Palestine and Iraq. The horrifying pictures of the massacre of Qana, in Lebanon are still fresh in our memory. Massacres in Tajikistan, Burma, Kashmir, Assam, Philippines, Somalia, Chechnya and in Bosnia-Herzegovina took place, massacres that send shivers in the body and shake the conscience.7

With this, bin Laden and Zawahiri, who is widely believed to be bin Laden’s pen, justified defensive jihad, while blaming the Zionist-Crusader alliance for every fight against Muslims. But the fourth jihad, the jihad of the sword, is a defensive jihad only, that is against those who take up arms against Muslims. In 1996, the target was only the American military in Saudi Arabia, with the stated goal of expelling U.S. military from Arabian soil, although the Declaration of War did expand the enemy to include not only military bearing arms but also non-combatants, justifying the attack in June 1996 on the American military barracks in Dhahran, Saudi Arabia, Khobar Towers. Of course, to bin Laden’s stated dismay, the enemy “that is afar,” the United States, in fact, was near, indeed within the holy land of Arabia.

In 1998, a major expansion of the mission occurred, with the “Declaration of the World Islamic Front for Jihad Against the Jews and Crusaders” in which all Americans, civilian and military were declared to be the enemy, the civilians because they supported anti-Muslim U.S. policy.

From Jihad Against Jews and Crusaders:
World Islamic Front Statement (February 1998 Fatwa)

In compliance with God’s order, we issue the following fatwa to all Muslims: The ruling to kill the Americans and their allies – civilians and military – is an individual duty
for every Muslim who can do it in any country in which it is possible to do it, in order to liberate the al-Aqsa Mosque and the holy mosque [Mecca] from their grip, and in order for their armies to move out of all the lands of Islam, defeated and unable to threaten any Muslim. This is in accordance with the words of Almighty God, “and fight the pagans all together as they fight you all together,” and “fight them until there is no more tumult or oppression, and there prevail justice and faith in God.” We – with God’s help – call on every Muslim who believes in God and wishes to be rewarded to comply with God’s order to kill the Americans and plunder their money wherever and whenever they find it.

The distinction between Al-Qaeda and other charismatically led groups in having a leadership circle, rather than a sole leader has already been noted. Perhaps reflecting principles learned in bin Laden’s studies of business management, Al-Qaeda was established with a flat decentralized organizational structure, exemplifying the emerging form of conflict that is emphasized by Arquila and Ronfeld in Netwar.

Training, too, plays a different role in Al-Qaeda. In most terrorist organizations, established members have been sent for training to augment their capabilities. In Al-Qaeda, in contrast, training is a mechanism of identifying loyal committed followers who can be called upon to participate in the jihad.

The sixteen hours I spent interviewing Khalfam Khamis Muhammad (one of the defendants in the trial, spring of 1991, in federal court, New York, of the terrorists involved in the bombing of the American embassies in Dar es Saalam, Tanzania, and Nairobi, Kenya) was illuminating in these regards. It also emphasized the central role of the mosque in mobilizing feelings in potential recruits and as a spotting ground for recruitment.

Khalfam Khamis Muhammad was born in 1973 in Zanzibar, Tanzania, an island off the coast of Tanzania. In 1979, when he was six or seven, his father died, leading him to turn to his older brother as a father surrogate but also probably leaving him seeking and vulnerable to male authority.

Zanzibar is Muslim, some 90% according to Muhamed. While he describes his family as not especially religious, he was more devout than
his brothers and regularly attended services in the madrassa, the religious school in their small village in Zanzibar where he was taught to pray, taught to obey, and developed his desire to become a good Muslim. He had no other dreams as a boy. In primary school, his teacher tried to inspire him, told him of the importance of the Koran. In secondary school, there was no political education, but he was taught to obey and accept what he was told and to not ask questions. This pattern of accepting what he is told by authorities and not questioning can be traced to his earliest days.

His brothers left for the mainland, where they opened a small grocery in Dar es Salaam. Muhamed completed primary school, but in 1991, one year short of graduation from secondary school, his brothers persuaded him to drop out of school and come to Dar es Salaam to help them as a clerk in their grocery store. He planned to continue in school there but did not.

As a boy he did not have close friends, nor did he make friends easily. In Dar es Salaam, he was lonely, had no friends, but the one place he felt accepted and made acquaintances, was in the mosque. Unlike the traditional madrassa in Zanzibar, this mosque was much more political. There he heard about the suffering of Muslims in Bosnia and in Chechnya, and was shown videos of Muslim mass graves in Bosnia and the Serbian military machine, and of the bodies of Muslim women and children in Chechnya, and of the Russian military machine. The sermons concerned the fact that they all belonged to the religious community of observant Muslims, the umma, and they had an obligation to help the suffering Muslims. In a rather unformed romantic way, he became inspired to join the struggle, the jihad, and help the Muslim victims. He wanted, in his words, to become “a soldier for Allah.”

In contrast to his bleak existence as a clerk in his brothers’ grocery store, with an empty future, it was increasingly a dream, of joining something larger than himself, of becoming part of the umma, struggling for the victimized Muslims.

They talked about this a lot in the mosque. He spoke with his new acquaintance Fahid about his wish to help the Muslims. Fahid told him he could not join the struggle until he had training, that he did not trust him, but if he went to training in Afghanistan then he would earn their trust and then he could fight against the enemies of the Muslim people, the Serbs in Bosnia, or the Russians in Chechnya. In 1994 he paid his own way to Afghanistan to have jihad training, with money he earned at his brother’s
grocery store. He met Fahid at the camp, Markaz Fath, who told him that there would be military training in the morning, in small arms, mortars, and explosives, and they would learn about Islam in the afternoon, with religious studies and ideology. The purpose of the training, he was told, was to learn how to help other Muslims, if necessary, through an armed struggle. He was also instructed in security, to not talk about his job with others, nor have others talk about their jobs with him. He had not heard about Osama bin Laden or of Al-Qaeda before coming to the camp, and did not come to the camp to join Al-Qaeda, but to get the training so he could join the struggle to help other Muslims. In particular, he wanted to fight as a soldier in Bosnia against the Serb military, or in Chechnya against the Russian military. They did talk about Americans, but only about the need to get the American military out of Saudi Arabia, where the holiest shrines in Islam were located. (Through 1997, bin Laden in his fatwahs spoke about expelling the American military from Muslim lands. This was the theme when Muhamed was in the training camp. It was only in the fatwah of 1998 that bin Laden shifted to American citizens as targets—military and civilian—anywhere in the world.) His goal, literally, was to be a soldier for Allah fighting against soldiers attacking Muslims.

At the camp, he felt like an outsider, along with other foreigners, for he did not speak the urdu dialect in which the religious classes and sermons were given, even though there were translated summaries. He envied the Pakistanis in training, who had fire in their eyes.

After 9 or 10 months of training, although others were selected for missions or additional training he was told he could not go to Bosnia or Chechnya to fight against the enemies of Muslims, but was offered the opportunity of going to Kashmir, which he declined. He saw himself as a soldier fighting soldiers. He was asked to give them a telephone number where he could be contacted.

Extremely disappointed, he returned to Dar es Salaam to his lowly job as a grocery clerk. He renewed his acquaintances at the mosque and became absorbed again by the need to help suffering Muslims. It was three years later, in 1997, that he was invited by an Al-Qaeda member, who he had met on a trip to Somalia, to “do a jihad job.” He accepted without questioning the nature of the job, and was to become the safe-house minder for the Tanzanian operation. He never was asked to become
a member of Al-Qaeda, and was excluded from details about the planned operation. His job, he was told, was not to ask questions, but to follow instructions.

As will be seen, the manual is clearly designed for young inexperienced recruits, who were previously untrained. The period of training itself, as with Khalfan Khamis Muhamed, was not only for training but for identifying candidates who were sincerely committed to the mission and could be called upon. When Muhamed returned to Tanzania, it was not as a “sleeper.” Rather, he was more like a member of the reserves, who had gone through military training, and was on tap, ready to be called up when his services were needed, as they were in 1997.

IT IS FORBIDDEN TO REMOVE THIS FROM THE HOUSE
Declaration of Jihad (Holy War)  
Against the Country’s Tyrants Military Series

Editor’s Comment:  Given President Bush’s identification of the adversary in the war on terrorism as “terrorists with a global reach,” the logo on the title page is striking. It is indeed a globe, with the Middle East and Africa particularly emphasized, and an Islamic dagger piercing the heart of the globe.

[Emblem]: A drawing of the globe emphasizing the Middle East and Africa with a sword through the globe

[On the emblem:] Military Studies in the Jihad [Holy War] Against the Tyrants

In the name of Allah, the merciful and compassionate.

Presentation

To those champions who avowed the truth day and night...  
...And wrote with their blood and sufferings these phrases...

The confrontation that we are calling for with the apostate regimes does not know Socratic debates..., Platonic ideals..., nor Aristotelian diplomacy. But it knows the dialogue of bullets, the ideals of assassination, bombing, and destruction, and the diplomacy of the cannon and machine-gun.

Islamic governments have never and will never be established through peaceful solutions and cooperative councils. They are established as they [always] have been

by pen and gun  
by word and bullet  
by tongue and teeth

Editor’s Comment:  The literary quality and rhetorical force of the dedication is striking. Socratic debates, Platonic ideals, Aristotelian diplomacy—characteristics of a democracy—are dramatically contrasted
with the absolutist, uncompromising nature of the confrontation with apostate regimes, referring to the moderate modernizing Islamic nations, who have strayed from the Islamist path, who will know only “the dialogue of the bullet, the ideals of assassination, bombing and destruction, and the diplomacy of the cannon and machine gun.”

The three dangling last lines, in their pairing of qualities responsible for the establishment of Islamic governments pair words connoting violence (gun, bullet, teeth) with words reflecting persuasive rhetoric (pen, word, tongue.) Powerful rhetoric is highly valued in Arab leaders, and a notable aspect of Osama bin Laden’s leadership is his capacity to use words to justify and to inspire.

Many who have followed closely the Al-Qaeda leadership have observed that Osama bin Laden is not particularly effective as a speaker, and believe that the most dramatic and inspiring language is probably penned by Ayman al-Zawahiri, Osama bin Laden’s designated successor, a founder of the Islamic jihad of Egypt, believed to have been involved in the assassination of Anwar Sadat. Zawahiri indeed is reputed to be even more apocalyptic and extreme in his views than bin Laden. Further evidence in support of the conjecture that it is Zawahiri who is actually the author is the absence of references to Jews and Christians in the cited religious verses, for the main target of the radical Egyptians were Muslim leaders, referred to as apostates or murtid, (those who renounce Islam.)

In the name of Allah, the merciful and compassionate

Pledge, O Sister
To the sister believer whose clothes the criminals have stripped off.
To the sister believer whose hair the oppressors have shaved.
To the sister believer whose body has been abused by the human dogs.
To the sister believer whose...

Pledge, O Sister
Covenant, O Sister...to make their women widows and their children orphans.
Covenant, O Sister...to make them desire death and hate appointments and prestige.
Covenant, O Sister...to slaughter them like lambs and let the Nile, al-Asi, and Euphrates rivers flow with their blood.
Covenant, O Sister...to be a pick of destruction for every godless and apostate regime.
Covenant, O Sister...to retaliate for you against every dog who touches you even with a bad word.

Editor’s Comment: Given the extremity of the conditions decreed for women under the orthodox interpretation of the Koran as interpreted by the Taliban, the blocking from education of girls over eight years old, the severity of the dress code requiring covering of all parts of the body—this emphasis on the importance of women in their collective psychology is interesting, but in particular the justification for striking out against those who defile women.

Osama bin Laden’s religious philosophy, and that of the Taliban, is strongly influenced by the puritan Wahabi form of Islam that dominates Saudi Arabia. The subordination of women to men in this form of Islam is striking. At one level, then, this calling out to the “sisters” of Islam is in fact calling out to the men to protect their highly traditional stature against the depredation of Western culture, and its emphasis on women’s rights, education for women, and the equal stature of women.

In the name of Allah, the merciful and compassionate
Thanks be to Allah. We thank him, turn to him, ask his forgiveness, and seek refuge in him from our wicked souls and bad deeds. Whomever Allah enlightens will not be misguided, and the deceiver will never be guided. I declare that there is no god but Allah alone; he has no partners. I also declare that Mohammed is his servant and prophet.

[Koranic verses]:

“O ye who believe! Fear Allah as He should be feared, and die not except in a state of Islam.”

“You mankind! Fear your guardian lord who created you from a single person. Created, out of it, his mate, and from them twain scattered [like seeds] countless men and women; fear Allah, through whom ye demand your mutual [rights], and be heedful of the wombs [that bore you]: for Allah ever watches over you.”

“O ye who believe! Fear Allah, and make your utterance straight forward: That he may make your conduct whole and sound and forgive you your sins. He that obeys Allah and his messenger, has already attained the great victory.”

Afterward, the most truthful saying is the book of Allah and the best guidance is that of Mohammed, God bless and keep him. [Therefore,] the worst thing is to introduce something new, for every novelty is an act of heresy and each heresy is a deception.

Editor’s Comment: The Surah “Fear Allah as He should be feared, and die not except in a state of Islam” is from Surah 3: Ali Imran. This Surah discusses death and life, the rewards in the afterlife given to man after leading a good life, and the fact that it is only God who can give and take away life. Interestingly, the Surah address the “people of the Book” (Jews and Christians), and God’s view of them. Here and throughout the references to the Koran, positive—indeed all—references to Jews and Christians are stripped out. The statement “Die not except in a state of Islam” in context is taken to mean that you should be committed to Islam in all its aspects, and in all of your being. The radical Islamists have made use of this command in a distorted fashion to inspire suicidal terrorism. The rationale is, in effect, since you are only going to die once, why not die in pursuit of jihad?
Introduction

Martyrs were killed, women were widowed, children were orphaned, men were handcuffed, chaste women’s heads were shaved, harlots’ heads were crowned, atrocities were inflicted on the innocent, gifts were given to the wicked, virgins were raped on the prostitution altar...

After the fall of our orthodox caliphas on March 3, 1924 and after expelling the colonialists, our Islamic nation was afflicted with apostate rulers who took over in the Moslem nation. These rulers turned out to be more infidel and criminal than the colonialists themselves. Moslems have endured all kinds of harm, oppression, and torture at their hands.

Those apostate rulers threw thousands of the Haraka Al-Islamya (Islamic Movement) youth in gloomy jails and detention centers that were equipped with the most modern torture devices and [manned with] experts in oppression and torture. Those youth had refused to move in the rulers’ orbit, obscure matters to the youth, and oppose the idea of rebelling against the rulers. But they [the rulers] did not stop there; they started to fragment the essence of the Islamic nation by trying to eradicate its Moslem identity. Thus, they started spreading godless and atheistic views among the youth. We found some that claimed that socialism was from Islam, democracy was the [religious] council, and the prophet – God bless and keep him – propagandized communism.

Colonialism and its followers, the apostate rulers, then started to openly erect crusader centers, societies, and organizations like Masonic Lodges, Lions and Rotary clubs, and foreign schools. They aimed at producing a wasted generation that pursued everything that is western and produced rulers, ministers, leaders, physicians, engineers, businessmen, politicians, journalists, and information specialists. [Koranic verse:] “And Allah’s enemies plotted and planned, and Allah too planned, and the best of planners is Allah.”

They [the rulers] tried, using every means and [kind of] seduction, to produce a generation of young men that did not know [anything] except what they [the rulers] want, did not say except what they [the rulers] think about, did not live except according to their [the rulers’] way, and did not dress except in their [the rulers’] clothes. However, majestic Allah turned
their deception back on them, as a large group of those young men who were raised by them [the rulers] woke up from their sleep and returned to Allah, regretting and repenting.

The young men returning to Allah realized that Islam is not just performing rituals but a complete system: Religion and government, worship and Jihad [holy war], ethics and dealing with people, and the Koran and sword. The bitter situation that the nation has reached is a result of its divergence from Allah’s course and his righteous law for all places and times. That [bitter situation] came about as a result of its children’s love for the world, their loathing of death, and their abandonment of Jihad [holy war].

Unbelief is still the same. It pushed Abou Jahl – may Allah curse him – and Kureish’s valiant infidels to battle the prophet – God bless and keep him – and to torture his companions – may Allah’s grace be on them. It is the same unbelief that drove Sadat, Hosni Mubarak, Gadhafi, Hafez Assad, Saleh, Fahed – Allah’s curse be upon the non-believing leaders – and all the apostate Arab rulers to torture, kill, imprison, and torment Moslems.

These young men realized that an Islamic government would never be established except by the bomb and rifle. Islam does not coincide or make a truce with unbelief, but rather confronts it.

The confrontation that Islam calls for with these godless and apostate regimes, does not know Socratic debates, Platonic ideals nor Aristotelian diplomacy. But it knows the dialogue of bullets, the ideals of assassination, bombing, and destruction, and the diplomacy of the cannon and machine-gun.

The young came to prepare themselves for Jihad [holy war], commanded by the majestic Allah’s order in the holy Koran. [Koranic verse:] “Against them make ready your strength to the utmost of your power, including steeds of war, to strike terror into (the hearts of) the enemies of Allah and your enemies, and others besides whom ye may not know, but whom Allah doth know.”

I present this humble effort to these young Moslem men who are pure, believing, and fighting for the cause of Allah. It is my contribution toward
paving the road that leads to majestic Allah and establishes a caliphate according to the prophecy.

According to Imam Ahmad’s account, the prophet – God bless and keep him – said, ...[A few lines of Hadith verses, not translated.]

Editor’s Comment: Here the manual addresses youth in particular, who are characteristically in the forefront of revolution, seeking to inspire them to turn away from their apostate leaders, see the Koran for what it is, prescribing an entire system of life, providing an ideological framework as interpreted by the Al-Qaeda leadership. The history of persecution by those opposed to Islam, the fuel for revenge, is detailed. The fall of the caliphate on March 3, 1924, refers of course to the defeat of the Ottoman Empire, as does the 80 years of persecution to which Osama bin Laden frequently refers, the end of the era of glory of Islam, the earlier period to which he wishes to return.

The Surah “And Allah’s enemies plotted and planned, and Allah too planned, and the best of planners is Allah” is from Surah 3:54, and refers to those who did not follow Jesus, and those who he found were not true believers. The word makara in Arabic means to carry out some secret purpose, which can be either for good or for evil. But the emphasis is on plotting, and evildoers will have no chance against the plans of God.

The Surah “Against them make ready your strength to the utmost of your power, including steeds of war, to strike terror into (the hearts of) the enemies of Allah and your enemies, and others besides whom ye may not know, but whom Allah doth know” refers to the weakness of the cavalry with reference to conventional military confrontation, during the early battles of Islam, but is also a general admonition concerning preparing for all battles. Indeed this is a notable feature of Al-Qaeda’s terrorist operations, extremely careful planning. Moreover, the command to “strike terror into the hearts of the enemies of Allah” can be seen as a justification for terrorism, and is a phrase frequently used by bin Laden in his public statements, as was the case in the series of statements after the events of September 11. For example, he indicates with satisfaction that “America is filled with fear from North to South, from East to West.” The evident goal of many of Al-Qaeda’s subsequent statements is to continue “to strike terror into the hearts of his enemies,” as exemplified by
“thousands of Islamic youth seeking death storm the planes...and warning good Muslims to abandon airplanes and high rises.”
First Lesson:
General Introduction

We cannot resist this state of ignorance unless we unite our ranks, and adhere to our religion. Without that, the establishment of religion would be a dream or illusion that is impossible to achieve or even imagine its achievement. Sheik Ibn Taimia – may Allah have mercy on him – said, “The interests of all Adam’s children would not be realized in the present life, nor in the next, except through assembly, cooperation, and mutual assistance. Cooperation is for achieving their interests and mutual assistance is for overcoming their adversities. That is why it has been said, ‘man is civilized by nature.’ Therefore, if they unite there will be favorable matters that they do, and corrupting matters to avoid. They will be obedient to the commandment of those goals and avoidant of those immoralities. It is necessary that all Adam’s children obey.”

He [Sheik Inb Taimia] then says, “It should be understood that governing the people’s affairs is one of the greatest religious obligations. In fact, without it, religion and world [affairs] could not be established. The interests of Adam’s children would not be achieved except in assembly, because of their mutual need. When they assemble, it is necessary to [have] a leader. Allah’s prophet – God bless and keep him – even said, ‘If three [people] come together let them pick a leader.’ He then necessitated the rule by one of a small, non-essential travel assembly in order to draw attention to the remaining types of assembly. Since Allah has obligated us to do good and avoid the unlawful, that would not be done except through force and lording. Likewise, the rest of what he [God] obligated [us with] would not be accomplished except by force and lordship, be it Jihad [holy war], justice, pilgrimage, assembly, holidays, support of the oppressed, or the establishment of boundaries. That is why it has been said, “the sultan is Allah’s shadow on earth.”

Editor’s Comment: The manual regularly cites the writings of Sheikh Ibn Tamai as justification, clearly an important influence on the author’s(s)’ ideological formulations. The emphasis on uniting all Muslims in the struggle to recapture control over their destiny and that force is the only path to do so is a continuing theme of Osama bin Laden’s
rhetoric. The declaration concerning the importance of unity under one leader is also striking. Al-Qaeda’s and bin Laden’s declarations and statements reflect increasing dogmatism and an increasingly expansive mission since the Declaration of War in 1996, markedly intensified since the events of September 11, making it clear that it is bin Laden who is destined to be that unifying leader in a holy war of radical Islam against the corrupt, modernizing secular West, a jihad against the Jews and the Crusaders.

What follows is a detailed operations manual, specifying missions, tasks and roles, and, notably, wherever an extreme or controversial act is specified, providing justification from the Koran or an interpreter thereof.

The tone for the following section, through chapter seven, is matter of fact, highly detailed, and well organized operational instructions, consistent with a very well done tradecraft manual for any national intelligence organization operating undercover in an adversary’s territory. There is no reference to the Koran in this section. It is quite matter of fact, an instruction manual.

**Principles of Military Organization:**

Military Organization has three main principles without which it cannot be established.

1. Military Organization commander and advisory council
2. The soldiers (individual members)
3. A clearly defined strategy

**Military Organization Requirements:**

The Military Organization dictates a number of requirements to assist it in confrontation and endurance. These are:

1. Forged documents and counterfeit currency
2. Apartments and hiding places
3. Communication means
4. Transportation means
5. Information
6. Arms and ammunition
7. Transport

Missions Required of the Military Organization:

The main mission for which the Military Organization is responsible is: The overthrow of the godless regimes and their replacement with an Islamic regime. Other missions consist of the following:

1. Gathering information about the enemy, the land, the installations, and the neighbors.
2. Kidnapping enemy personnel, documents, secrets, and arms.
3. Assassinating enemy personnel as well as foreign tourists.
4. Freeing the brothers who are captured by the enemy.
5. Spreading rumors and writing statements that instigate people against the enemy.
6. Blasting and destroying the places of amusement, immorality, and sin; not a vital target.
7. Blasting and destroying the embassies and attacking vital economic centers.
8. Blasting and destroying bridges leading into and out of the cities.

Editor’s Comment: This is assuredly a remarkable mission statement, each task flowing from the overall goal of the overthrow of the apostate regimes. As noted earlier, that the primary target is the apostate regimes, with no mention of the United States or other Western governments, is strongly suggestive that the authorship is from the Egyptian members of the Al-Qaeda leadership circle, especially Ayman al-Zawahiri. Espionage, kidnapping, assassination, psychological operations, and sabotage—not the typical tasks of a so-called military organization, but rather of an underground revolutionary organization.
Importance of the Military Organization:

1. Removal of those personalities that block the call’s path. [A different handwriting:] All types of military and civilian intellectuals and thinkers for the state.
2. Proper utilization of the individuals’ unused capabilities.
3. Precision in performing tasks, and using collective views on completing a job from all aspects, not just one.
4. Controlling the work and not fragmenting it or deviating from it.
5. Achieving long-term goals such as the establishment of an Islamic state and short-term goals such as operations against enemy individuals and sectors.
6. Establishing the conditions for possible confrontation with the regressive regimes and their persistence.
7. Achieving discipline in secrecy and through tasks.

Editor’s Comment: Written in a different hand, this is in effect a restatement and different emphasis of the mission statement, which now emphasizes characteristics of the revolutionary, reminiscent of Nechayev’s catechism of the Revolutionary, which stresses the total, selfless dedication to the task. The emphasis on doing things in a highly organized manner and in secret is stressed.

Again, the specifying of assassination of those who “block the call’s path,” referring implicitly to apostate leaders, and the goal of establishing an Islamic state, is emphasized.
Second Lesson: Necessary Qualifications and Character For Organization’s Members

Necessary Qualifications for the Organization’s Members

1. Islam:
   The member of the Organization must be Moslem. How can an unbeliever, someone from a revealed religion [Christian, Jew], a secular person, a communist, etc. protect Islam and Moslems and defend their goals and secrets when he does not believe in that religion [Islam]? The Israeli Army requires that a fighter be of the Jewish religion. Likewise, the command leadership in the Afghan and Russian armies requires any one with an officer’s position to be a member of the communist party.

   Editor’s Comment: As if it were needed, the job requirement of being a Muslim is specified, offering as a justification that only Jews can enter the army of Israel! And the member must be fully committed to the goals, a commitment that is evaluated and tested during the prospective member’s period of training in the camps.

2. Commitment to the Organization’s Ideology:
   This commitment frees the Organization’s members from conceptual problems.

   Editor’s Comment: The earlier emphasis on one leader, combined with the requirement of commitment to the ideology not only frees the member from conceptual problems, having to think through the assigned task, but also from self-reflection and moral qualms, for the authentic leader defines the assigned task as supporting the ideology.

3. Maturity:
   The requirements of military work are numerous, and a minor cannot perform them. The nature of hard and continuous work in dangerous
conditions requires a great deal of psychological, mental, and intellectual fitness, which are not usually found in a minor. It is reported that Ibn Omar – may Allah be pleased with him – said, “During Ahad [battle] when I was fourteen years of age, I was submitted [as a volunteer] to the prophet – God bless and keep him. He refused me and did not throw me in the battle. During Khandak [trench] Day [battle] when I was fifteen years of age, I was also submitted to him, and he permitted me [to fight].

Editor’s Comment: The source of the age of maturity is the prophet himself, an age of maturity rather earlier than that usually considered in the West, but it should be emphasized, distinguishing these warriors for Islam from the children utilized by Ayatollah Khomeini in his human wave attacks during the Iran-Iraq war.

4. Sacrifice:

He [the member] has to be willing to do the work and undergo martyrdom for the purpose of achieving the goal and establishing the religion of majestic Allah on earth.

Editor’s Comment: In this requirement, for the first time the obligation of giving one’s life in the pursuit of jihad is specified.

5. Listening and Obedience:

In the military, this is known today as discipline. It is expressed by how the member obeys the orders given to him. That is what our religion urges. The Glorious says, “O, ye who believe! Obey Allah and obey the messenger and those charged with authority among you.” In the story of Hazifa Ben Al-Yaman – may Allah have mercy on him – who was exemplary in his obedience to Allah’s messenger – Allah bless and keep him. When he [Mohammed] – Allah bless and keep him – sent him to spy on the Kureish and their allies during their siege of Madina, Hazifa said, “As he [Mohammed] called me by name to stand, he said, ‘Go get me information about those people and do not alarm them about me.’
As I departed, I saw Abou Soufian and I placed an arrow in the bow. I [then] remembered the words of the messenger – Allah bless and keep him – ‘do not alarm them about me.’ If I had shot I would have hit him.”

6. Keeping Secrets and Concealing Information

[This secrecy should be used] even with the closest people, for deceiving the enemies is not easy. Allah says, “Even though their plots were such that as to shake the hills! [Koranic verse].” Allah’s messenger – God bless and keep him – says, “Seek Allah’s help in doing your affairs in secrecy.”

It was said in the proverbs, “The hearts of freemen are the tombs of secrets” and “Moslems’ secrecy is faithfulness, and talking about it is faithlessness.” [Mohammed] – God bless and keep him – used to keep work secrets from the closest people, even from his wife A’isha- may Allah’s grace be on her.

Editor’s Comment: This emphasis on secrecy, citing alleged religious scriptural authority “Seek Allah’s help in doing your affairs in secrecy” and the instruction to use secrecy “even with the closest people,” according to Allah, “Even though their plots were such that as to shake the hills,” in fact is contrary to the theme of openness and honesty emphasized throughout the Koran. We have not been able to identify the sources in the Koran of the Surahs cited. In fact, in Surah 10, God warns against the use of secrecy, stating “Secret Counsels are only (inspired) by the Evil One, in order that he may cause Grief to the Believers.” In general, the Koran decries secrecy because it inspires disunity in the Muslim community. Surah 4: 114 emphasizes this while, however, permitting an exception, “In most of their secret talks There is no good, but if One exhorts to a deed of Charity or justice.”

7. Free of Illness

The Military Organization’s member must fulfill this important requirement. Allah says, “There is no blame for those who are infirm, or ill, or who have no resources to spend.”
8. Patience

[The member] should have plenty of patience for [enduring] afflictions if he is overcome by the enemies. He should not abandon this great path and sell himself and his religion to the enemies for his freedom. He should be patient in performing the work, even if it lasts a long time.

*Editor’s Comment: Patience and great care in planning are assuredly striking qualities of Al-Qaeda’s operations.*

9. Tranquility and “Unflappability”

[The member] should have a calm personality that allows him to endure psychological traumas such as those involving bloodshed, murder, arrest, imprisonment, and reverse psychological traumas such as killing one or all of his Organization’s comrades. [He should be able] to carry out the work.

*Editor’s Comment: This requirement for a “calm personality” is truly remarkable, and is repeated later in the manual under characteristics required of members carrying out special operations. Being able in a calm and detached manner to carry out bloodshed and murder is one thing, but to be able to kill “one or all of his Organization’s comrades” in an imperturbable manner is quite another. It does again echo the “Catechism of the Revolutionary” but seems to be specifying a psychopathic personality as a job requirement.*

10. Intelligence and Insight

When the prophet – Allah bless and keep him – sent Hazifa Ben Al-Yaman to spy on the polytheist and [Hafiza] sat among them, Abou Soufian said, “Let each one of you look at his companion.” Hazifa said to his companion, “Who are you?” The companion replied, “So-and-so son of so-and-so.”

In World War I, the German spy, Julius Seelber [PH] managed to enter Britain and work as a mail examiner due to the many languages he had mastered. From the letters, he succeeded in obtaining important information and sent it to the Germans. One of the letters that he
checked was from a lady who had written to her brother’s friend in the fleet. She mentioned that her brother used to live with her until he was transferred to a secret project that involved commercial ships. When Seelber read that letter, he went to meet that young woman and blamed her for her loose tongue in talking about military secrets. He, skillfully, managed to draw out of her that her brother worked in a secret project for arming old commercial ships. These ships were to be used as decoys in the submarine war in such a way that they could come close to the submarines, as they appeared innocent. Suddenly, cannonballs would be fired from the ship’s hidden cannons on top of the ships, which would destroy the submarines. 48 hours later that secret was handed to the Germans.

Editor’s Comment: Until this point, all justifications and examples have drawn solely on the Koran and Muslim figures. Here a noted German espionage agent of World War I is cited as a model to be emulated in his cunning and manipulative skill, under the rather more laudatory heading of “Intelligence and Insight.”

11. Caution and Prudence

In his battle against the king of Tomedia [PH], the Roman general Speer [PH] sent an emissary to discuss with that king the matter of truce between the two armies. In reality, he had sent him to learn about the Tomedians’ ability to fight. The general picked, Lilius [PH], one of his top commanders, for that task and sent with him some of his officers, disguised as slaves. During that mission, one of the king’s officers, Sifax [PH] pointed to one of the [disguised] slaves and yelled, “That slave is a Roman officer I had met in a neighboring city. He was wearing a Roman uniform.” At that point, Lilius used a clever trick and managed to divert the attention of the Tomedians from that by turning to the disguised officer and quickly slapping him on the face a number of times. He reprimanded him for wearing a Roman officer’s uniform when he was a slave and for claiming a status that he did not deserve.

The officer accepted the slaps quietly. He bowed his head in humility and shame, as slaves do. Thus, Sifax’ men thought that officer was
really a slave because they could not imagine that a Roman officer would accept these hits without defending himself.

King Sifax prepared a big feast for Lilius and his entourage and placed them in a house far away from his camp so they could not learn about his fortifications. They [the Romans] made another clever trick on top of the first one. They freed one of their horses and started chasing him in and around the camp. After they learned about the extent of the fortifications they caught the horse and, as planned, managed to abort their mission about the truce agreement. Shortly after their return, the Roman general attacked King Sifax’ camp and burned the fortifications. Sifax was forced to seek reconciliation.

Editor’s Comment: Demonstrating the author’s(s’) breadth and depth of knowledge of military history, now the source is ancient Roman history. Under the more exalted heading of Caution and Prudence, what is really being extolled as a virtue is the capacity to dissimulate.

There was a secret agent who disguised himself as an American fur merchant. As the agent was playing cards aboard a boat with some passengers, one of the players asked him about his profession. He replied that he was a “fur merchant.” The women showed interest [in him] and began asking the agent – the disguised fur merchant – many questions about the types and prices of fur. He mentioned fur price figures that amazed the women. They started avoiding and regarding him with suspicion, as though he were a thief, or crazy.

Editor’s Comment: A further eclectic example from the annals of espionage, demonstrating the need to have solid knowledge of one’s operational cover story.

12. Truthfulness and Counsel

The Commander of the faithful, Omar Ibn Al-Khattab – may Allah be pleased with him – asserted that this characteristic was vital in those who gather information and work as spies against the Moslems’ enemies. He [Omar] sent a letter to Saad Ibn Abou Wakkas – may Allah be pleased with him – saying, “If you step foot on your enemies’ land, get spies on them. Choose those whom you count on for their
truthfulness and advice, whether Arabs or inhabitants of that land. Liars’ accounts would not benefit you, even if some of them were true; the deceiver is a spy against you and not for you.”

13. Ability to Observe and Analyze

The Israeli Mossad received news that some Palestinians were going to attack an Israeli El Al airplane. That plane was going to Rome with Golda Meir – Allah’s curse upon her – the Prime Minister at the time, on board. The Palestinians had managed to use a clever trick that allowed them to wait for the arrival of the plane without being questioned by anyone. They had beaten a man who sold potatoes, kidnapped him, and hidden him. They made two holes in the top of that peddler’s cart and placed two tubes next to the chimney through which two Russian-made “Strella” [PH] missiles could be launched. The Mossad officers traveled the airport back and forth looking for clues that would lead them to the Palestinians. One officer passed the potato cart twice without noticing anything. On his third time, he noticed three chimneys, but only one of them was working with smoke coming out of it. He quickly steered toward the cart and hit it hard. The cart overturned, and the Palestinians were captured.10

Editor’s Comment: Most remarkable of all, to cite, as an example of the requirement for the capacity to observe and analyze, an example from Israeli intelligence!

14. Ability to Act, Change Positions and Conceal Oneself

A. [An example] is what Noaim Ibn Masoud had done in his mission to cause agitation among the tribes of Koraish, those of Ghatfan, and the Jews of Koreitha. He would control his reactions and managed to skillfully play his role. Without showing signs of inconsistency, he would show his interest and zeal towards the Jews one time and show his concern about the Koraish at another.

B. In 1960, a car driven by an American colonel collided with a truck. The colonel lost consciousness, and while unconscious at the hospital, he started speaking Russian fluently. It was later discovered that the colonel was a Soviet spy who was planted in the United States. He
had fought in Korea in order to conceal his true identity and to gather information and critical secrets. If not for the collision, no one would have suspected or confronted him.

Editor’s Comment: *A particularly interesting aspect of this example drawn from Soviet espionage is that a “sleeper” agent is being described, a key aspect of the long duration preceding the events of September 11, in which “sleeper cells” were employed.*
Third Lesson:
Counterfeit Currency and Forged Documents

Financial Security Precautions:

1. Dividing operational funds into two parts: One part is to be invested in projects that offer financial return, and the other is to be saved and not spent except during operations.
2. Not placing operational funds [all] in one place.
3. Not telling the Organization members about the location of the funds.
4. Having proper protection while carrying large amounts of money.
5. Leaving the money with non-members and spending it as needed.

Editor’s Comment: It is interesting that the very first series of precautions emphasized concerns financial security. Indeed, as bin Laden was making his substantial financial resources available to Al-Qaeda, he always tended to managing his far-flung legitimate business enterprises, and managed to increase his substantial wealth (reportedly at age 16 he inherited $57 million from his father’s estate) to some $300 million.

Forged Documents (Identity Cards, Records Books, Passports)
The following security precautions should be taken:

1. Keeping the passport in a safe place so it would not be seized by the security apparatus, and the brother it belongs to would have to negotiate its return (I’ll give you your passport if you give me information.)
2. All documents of the undercover brother, such as identity cards and passport, should be falsified.
3. When the undercover brother is traveling with a certain identity card or passport, he should know all pertinent [information] such as the name, profession, and place of residence.
4. The brother who has special work status (commander, communication link) should have more than one identity card and passport. He should learn the contents of each, the nature of the [indicated] profession, and the dialect of the residence area listed in the document.

5. The photograph of the brother in these documents should be without a beard. It is preferable that the brother’s public photograph [on these documents] be also without a beard. If he already has one [document] showing a photograph with a beard, he should replace it.

6. When using an identity document in different names, no more than one such document should be carried at one time.

7. The validity of the falsified travel documents should always be confirmed.

8. All falsification matters should be carried out through the command and not haphazardly (procedure control).

9. Married brothers should not add their wives to their passports.

10. When a brother is carrying the forged passport of a certain country, he should not travel to that country. It is easy to detect forgery at the airport, and the dialect of the brother is different from that of the people from that country.

Editor’s Comment: This extremely detailed and careful attention to security, explicitly identifying behavior that could breach security, is emphasized throughout the manual.

Security Precautions Related to the Organizations’ Given Names:

1. The name given by the Organization [to the brother] should not be odd in comparison with other names used around him.

2. A brother should not have more than one name in the area where he lives (the undercover work place).
Fourth Lesson:
Organization Military Bases
“Apartments – Hiding Places”

Definition of Bases:

*These are apartments, hiding places, command centers, etc. in which secret operations are executed against the enemy.

These bases may be in cities, and are [then] called homes or apartments. They may be in mountainous, harsh terrain far from the enemy, and are [then] called hiding places or bases.

During the initial stages, the Military Organization usually uses apartments in cities as places for launching assigned missions, such as collecting information, observing members of the ruling regime, etc.

Hiding places and bases in mountains and harsh terrain are used at later stages, from which Jihad [holy war] groups are dispatched to execute assassination operations of enemy individuals, bomb their centers, and capture their weapons. In some Arab countries such as Egypt, where there are no mountains or harsh terrain, all stages of Jihad work would take place in cities. The opposite was true in Afghanistan, where initially Jihad work was in the cities, then the warriors shifted to mountains and harsh terrain. There, they started battling the Communists.

Security Precautions Related to Apartments:

1. Choosing the apartment carefully as far as the location, the size for the work necessary (meetings, storage, arms, fugitives, work preparation).

2. It is preferable to rent apartments on the ground floor to facilitate escape and digging of trenches.

3. Preparing secret locations in the apartment for securing documents, records, arms, and other important items.

4. Preparing ways of vacating the apartment in case of a surprise attack (stands, wooden ladders).
5. Under no circumstances should any one know about the apartment except those who use it.

6. Providing the necessary cover for the people who frequent the apartment (students, workers, employees, etc.)

7. Avoiding seclusion and isolation from the population and refraining from going to the apartment at suspicious times.

8. It is preferable to rent these apartments using false names, appropriate cover, and non-Moslem appearance.

9. A single brother should not rent more than one apartment in the same area, from the same agent, or using the same rental office.

10. Care should be exercised not to rent apartments that are known to the security apparatus [such as] those used for immoral or prior Jihad activities.

11. Avoiding police stations and government buildings. Apartments should not be rented near those places.

12. When renting these apartments, one should avoid isolated or deserted locations so the enemy would not be able to catch those living there easily.

13. It is preferable to rent apartments in newly developed areas where people do not know one another. Usually, in older quarters people know one another and strangers are easily identified, especially since these quarters have many informers.

14. Ensuring that there is has been no surveillance prior to the members entering the apartment.

15. Agreement among those living in the apartment on special ways of knocking on the door and special signs prior to entry into the building’s main gate to indicate to those who wish to enter that the place is safe and not being monitored. Such signs include hanging out a towel, opening a curtain, placing a cushion in a special way, etc.

16. If there is a telephone in the apartment, calls should be answered in an agreed-upon manner among those who use the apartment. That
would prevent mistakes that would, otherwise, lead to revealing the names and nature of the occupants.

17. For apartments, replacing the locks and keys with new ones. As for the other entities (camps, shops, mosques), appropriate security precautions should be taken depending on the entity’s importance and role in the work.

18. Apartments used for undercover work should not be visible from higher apartments in order not to expose the nature of the work.

19. In a newer apartment, avoid talking loud because prefabricated ceilings and walls [used in the apartments] do not have the same thickness as those in old ones.

20. It is necessary to have at hand documents supporting the undercover [member]. In the case of a physician, there should be an actual medical diploma, membership in the [medical] union, the government permit, and the rest of the routine procedures known in that country.

21. The cover should blend well [with the environment]. For example, selecting a doctor’s clinic in an area where there are clinics, or in a location suitable for it.

22. The cover of those who frequent the location should match the cover of that location. For example, a common laborer should not enter a fancy hotel because that would be suspicious and draw attention.

Editor’s Comment: This section is concerned with “safe-houses,” maintaining the security of terrorist operational bases in a city. The care with which security steps are specified—no less than twenty-two separate instructions—is notable. In the case referred to in the introduction, Khalfan Khamis Muhamed, he was a local resident of Dar es-Salaam who was recruited by Al-Qaeda to be the safe-house minder. As a citizen of Tanzania, he was able to lease the apartment in his true name, whereas the Al-Qaeda members who planned and conducted the operation flew in under aliases from Pakistan, and might have experienced difficulties had they tried themselves to lease the apartment. According to one of the Al-Qaeda members whom I interviewed during the course of the trial, this
hierarchical distinction between members and non-members is standard operating procedure for Al-Qaeda, recruiting low-level local personnel who are excluded from information concerning the operation under development.
Fifth Lesson:
Means of Communication and Transportation

In the name of Allah, the merciful and compassionate

Means of Transportation

Introduction:

It is well known that in undercover operations, communication is the mainstay of the movement for rapid accomplishment. However, it is a double-edged sword: It can be to our advantage if we use it well and it can be a knife dug into our back if we do not consider and take the necessary security measures.

Editor’s Comment: The introduction to this section concerned with communication security emphasizes the Achilles’ heel of undercover organizations, the “double-edged sword” of the requirement to communicate, but the vulnerability of communication to penetration by the adversary’s intelligence forces.

Communication Means:

The Military Organization in any Islamic group can, with its modest capabilities, use the following means:

1. The telephone,
2. Meeting in-person,
3. Messenger,
4. Letters, and
5. Some modern devices, such as the facsimile and wireless [communication].

Communication may be within the county, state, or even the country, in which case it is called local communication. When it extends expanded between countries, it is then called international communication.
Secret Communication is Limited to the Following Types:
Common, standby, alarm

1. **Common Communication**: It is a communication between two members of the Organization without being monitored by the security apparatus opposing the Organization. The common communication should be done under a certain cover and after inspecting the surveillance situation [by the enemy].

2. **Standby Communication**: This replaces common communication when one of the two parties is unable to communicate with the other for some reason.

3. **Alarm Communication**: This is used when the opposing security apparatus discovers an undercover activity or some undercover members. Based on this communication, the activity is stopped for a while, all matters related to the activity are abandoned, and the Organization’s members are hidden from the security personnel.

Method of Communication among Members of the Organization:

1. Communication about undercover activity should be done using a good cover; it should also be quick, explicit, and pertinent. That is, just for talking only.

2. Prior to contacting his members, the commander of the cell\(^{11}\) should agree with each of them separately (the cell members should never meet all in one place and should not know one another) on a manner and means of communication with each other. Likewise, the chief of the Organization should [use a similar technique] with the branch commanders.

3. A higher-ranking commander determines the type and method of communication with lower-ranking leaders.

First Means: The Telephone

Significant technological advances, security measures for monitoring the telephone and broadcasting equipment have increased. Monitoring may be done by installing a secondary line or wireless broadcasting device on a telephone that relays the calls to a remote location. That is why the
Organization takes security measures among its members who use this means of communication (the telephone).

1. Communication should be carried out from public places. One should select telephones that are less suspicious to the security apparatus and are more difficult to monitor. It is preferable to use telephones in booths and on main streets.

2. Conversation should be coded or in general terms so as not to alert the person monitoring [the telephone].

3. Periodically examining the telephone wire and the receiver.

4. Telephone numbers should be memorized and not recorded. If the brother has to write them, he should do so using a code so they do not appear as telephone numbers (figures from a shopping list, etc.)

5. The telephone caller and person called should mention some words or sentences prior to bringing up the intended subject. The brother who is calling may misdial one of the digits and actually call someone else. The person called may claim that the call is for him, and the calling brother may start telling him work-related issues and reveal many things because of a minor error.

6. In telephone conversations about undercover work, the voice should be changed and distorted.

7. When feasible, it is preferable to change telephone lines to allow direct access to local and international calls. That and proper cover facilitate communications and provide security protection not available when the central telephone station in the presence of many employees is used.

8. When a telephone [line] is identified [by the security apparatus], the command and all parties who were using it should be notified as soon as possible in order to take appropriate measures.

9. When the command is certain that a particular telephone [line] is being monitored, it can exploit it by providing information that misleads the enemy and benefits the work plan.

10. If the Organization manages to obtain jamming devices, it should use them immediately.
Second Means: Meeting in-person:

This is direct communication between the commander and a member of the Organization. During the meeting the following are accomplished:

1. Information exchange,
2. Giving orders and instructions,
3. Financing, and
4. Member follow-up

Stages of the In-Person Meeting:

A. Before the meeting,
B. The meeting [itself], and
C. After the meeting

A. Before the Meeting:

The following measures should be taken:

1. Designating the meeting location,
2. Finding a proper cover for the meeting,
3. Specifying the meeting date and time, and
4. Defining special signals between those who meet.

1. Identifying the meeting location:

If the meeting location is stationary, the following matters should be observed:

a. The location should be far from police stations and security centers. 

b. Ease of transportation to the location.

c. Selecting the location prior to the meeting and learning all its details.

d. If the meeting location is an apartment, it should not be the first one, but one somewhere in the middle.
e. The availability of many roads leading to the meeting location. That would provide easy escape in case the location were raided by security personnel.

f. The location should not be under suspicion (by the security apparatus).

g. The apartment where the meeting takes place should be on the ground floor, to facilitate escape.

h. The ability to detect any surveillance from that location.

i. When public transportation is used, one should alight at some distance from the meeting location and continue on foot. In the case of a private vehicle, one should park it far away or in a secure place so as to be able to maneuver it quickly at any time.

If the meeting location is not stationary, the following matters should be observed:

a. The meeting location should be at the intersection of a large number of main and side streets to facilitate entry, exit, and escape.

b. The meeting location (such as a coffee shop) should not have members that might be dealing with the security apparatus.

c. The meeting should not be held in a crowded place because that would allow the security personnel to hide and monitor those who meet.

d. It is imperative to agree on an alternative location for the meeting in case meeting in the first is unfeasible. That holds whether the meeting place is stationary or not.

Those who meet in-person should do the following:

a. Verifying the security situation of the location before the meeting.

b. Ensuring that there are no security personnel behind them or at the meeting place.

c. Not heading to the location directly.
d. Clothing and appearance should be appropriate for the meeting location.

e. Verifying that private documents carried by the brother have appropriate cover.

Prior to the meeting, designing a security plan that specifies what the security personnel would be told in case the location were raided by them, and what [the brothers] would resort to in dealing with the security personnel (fleeing, driving back, ...)

2. Finding a proper cover for the meeting: [The cover]

   a. Should blend well with the nature of the location.

   b. In case they raid the place, the security personnel should believe the cover.

   c. Should not arouse the curiosity of those present.

   d. Should match the person’s appearance and his financial and educational background.

   e. Should have documents that support it.

   f. Provide reasons for the two parties’ meeting (for example, one of the two parties should have proof that he is an architect. The other should have documents as proof that he is a land owner. The architect has produced a construction plan for the land)

3. Specifying the Meeting Date and Time:

   a. Specifying the hour of the meeting as well as the date.

   b. Specifying the time of both parties’ arrival and the time of the first party’s departure.

   c. Specifying how long the meeting will last.

   d. Specifying an alternative date and time.

   e. Not allowing a long period of time between making the meeting arrangements and the meeting itself.
4. Designating special signals between those who meet

If the two individuals meeting know one another’s shape and appearance, it is sufficient to use a single safety sign. [In that case.] the sitting and arriving individuals inform each other that there is no enemy surveillance. The sign may be keys, beads, a newspaper, or a scarf. The two parties would agree on moving it in a special way so as not to attract the attention of those present.

If the two individuals do not know one another, they should do the following:

a. The initial sign for becoming acquainted may be that both of them wear a certain type of clothing or carry a certain item. These signs should be appropriate for the place, easily identified, and meet the purpose. The initial sign for becoming acquainted does not [fully] identify one person by another. It does that at a rate of 30%.

b. Safety Signal: It is given by the individual sitting in the meeting location to inform the second individual that the place is safe. The second person would reply through signals to inform the first that he is not being monitored. The signals are agreed upon previously and should not cause suspicion.

c. A second signal for getting acquainted is one in which the arriving person uses while sitting down. That signal may be a certain clause, a word, a sentence, or a gesture agreed upon previously, and should not cause suspicion for those who hear it or see it.

B. The Stage of the Meeting [itself]:

The following measures should be taken:

1. Caution during the meeting.

2. Not acting unnaturally during the meeting in order not to raise suspicion.

3. Not talking with either loud or very low voices ([should be] moderate).

4. Not writing anything that has to do with the meeting.
5. Agreeing on a security plan in case the enemy raids the location.

C. After the Meeting:

The following measures should be taken:

1. Not departing together, but each one separately.
2. Not heading directly to the main road but through secondary ones.
3. Not leaving anything in the meeting place that might indicate the identity or nature of those who met.

Meeting in-person has disadvantages, such as:

1. Allowing the enemy to capture those who are meeting.
2. Allowing them [the enemy] to take pictures of those who are meeting, record their conversation, and gather evidence against them.
3. Revealing the appearance of the commander to the other person. However, that may be avoided by taking the previously mentioned measures such as disguising himself well and changing his appearance (glasses, wig, etc.)

Third Means: The Messenger:

This is an intermediary between the sender and the receiver. The messenger should possess all characteristics mentioned in the first chapter regarding the Military Organization’s member.

These are the security measures that a messenger should take:

1. Knowledge of the person to whom he will deliver the message.
2. Agreement on special signals, exact date, and specific time.
3. Selecting a public street or place that does not raise suspicion.
4. Going through a secondary road that does not have check points.
5. Using public transportation (train, bus, ...) and disembarking before the main station. Likewise, embarking should not be done
at the main station either, were there are a lot of security personnel and informants.

6. Complete knowledge of the location to which he is going.

**Fourth Means: Letters:**

This means (letters) may be used as a method of communication between members and the Organization provided that the following security measures are taken:

1. It is forbidden to write any secret information in the letter. If one must do so, the writing should be done in general terms.

2. The letter should not be mailed from a post office close to the sender’s residence, but from a distant one.

3. The letter should not be sent directly to the receiver’s address but to an inconspicuous location where there are many workers from your country. Afterwards, the letter will be forwarded to the intended receiver. (This is regarding the overseas-bound letter).

4. The sender’s name and address on the envelope should be fictitious. In case the letters and their contents are discovered, the security apparatus would not be able to determine his [the sender’s] name and address.

5. The envelope should not be transparent so as to reveal the letter inside.

6. The enclosed pages should not be many, so as not to raise suspicion.

7. The receiver’s address should be written clearly so that the letter would not be returned.

8. Paying the post office box fees should not be forgotten.

**Fifth Means: Facsimile and Wireless:**

Considering its modest capabilities and the pursuit by the security apparatus of its members and forces, the Islamic Military Organization cannot obtain
theses devices. In case the Organization is able to obtain them, firm security measures should be taken to secure communication between the members in the country and the command outside. These measures are:

1. The duration of transmission should not exceed five minutes in order to prevent the enemy from pinpointing the device location.
2. The device should be placed in a location with high wireless frequency, such as close to a TV station, embassies, and consulates in order to prevent the enemy from identifying its location.
3. The brother, using the wireless device to contact his command outside the country, should disguise his voice.
4. The time of communication should be carefully specified.
5. The frequency should be changed from time to time.
6. The device should be frequently moved from one location to another.
7. Do not reveal your location to the entity for which you report.
8. The conversation should be in general terms so as not to raise suspicion.

Editor’s Comment: The care with which minute details of maintaining communication security are specified is impressive, consistent with “tradecraft” instructions for undercover intelligence operatives. The level of pitch does suggest this is designed for the new, inexperienced recruit.

Transportation Means:

The members of the Organization may move from one location to another using one of the following means:

1. Public transportation, or
2. Private transportation
Security Measures that should be observed in Public Transportation:

1. One should select public transportation that is not subject to frequent checking along the way, such as crowded trains or public buses.

2. Boarding should be done at a secondary station, as main stations undergo more careful surveillance. Likewise, embarkment should not be done at main stations.

3. The cover should match the general appearance (tourist bus, first-class train, second-class train, etc).

4. The existence of documents supporting the cover.

5. Placing important luggage among the passengers’ luggage without identifying the one who placed it. If it is discovered, its owner would not be arrested. In trains, it [the luggage] should be placed in a different car than that of its owner.

6. The brother traveling on a “special mission” should not get involved in religious issues (advocating good and denouncing evil) or day-to-day matters (seat reservation, ...).

7. The brother traveling on a mission should not arrive in the [destination] country at night because then travelers are few, and there are [search] parties and check points along the way.

8. When cabs are used, conversation of any kind should not be started with the driver because many cab drivers work for the security apparatus.

9. The brother should exercise extreme caution and apply all security measures to the members.

Security Measures that should be observed in Private Transportation:

Private transportation includes: cars, motorcycles

A. Cars and motorcycles used in overt activity:
1. One should possess the proper permit and not violate traffic rules in order to avoid trouble with the police.

2. The location of the vehicle should be secure so that the security apparatus would not confiscate it.

3. The vehicle make and model should be appropriate for the brother’s cover.

4. The vehicle should not be used in special military operations unless the Organization has no other choice.

B. Cars and motorcycles used in covert activity:

1. Attention should be given to permits and [obeying] the traffic rules in order to avoid trouble and reveal their actual mission.

2. The vehicle should not be left in suspicious places (deserts, mountains, etc.). If it must be, then the work should be performed at suitable times when no one would keep close watch or follow it.

3. The vehicle should be purchased using forged documents so that getting to its owners would be prevented once it is discovered.

4. For the sake of continuity, have only one brother in charge of selling.

5. While parking somewhere, one should be in a position to move quickly and flee in case of danger.

6. The car or motorcycle color should be changed before the operation and returned to the original after the operation.

7. The license plate number and county name should be falsified. Further, the digits should be numerous in order to prevent anyone from spotting and memorizing it.

8. The operation vehicle should not be taken to large gasoline stations so that it would not be detected by the security apparatus.

Editor’s Comment: As with communication security, the careful attention to transportation security in all its details reflects a highly sophisticated and experienced undercover organization.
Sixth Lesson:
Training

*The following security precautions should be taken during the training:

The Place:

The place should have the following specifications:

1. Distance from the populated areas with the availability of living necessities.
2. Availability of medical services during the training.
3. The place should be suitable for the type of training (physical fitness, shooting, tactics).
4. No one except the trainers and trainees should know about the place.
5. The place should have many roads and entrances.
6. The place should be visited at suitable times.
7. Hiding any training traces immediately after the training.
8. Guarding the place during the training.
9. Appropriateness of the existing facilities for the number of training members.
10. Exclusion of anyone who is not connected with the training.
11. Taking all security measures regarding the establishment.
12. Distance of the place from police stations, public establishments, and the eyes of informants.
13. The place should not be situated in such a way that the training and trainees can be seen from another location.
The Trainees:

1. Before proceeding to the training place, all security measures connected with an undercover individual should be taken. Meanwhile, during training at the place, personnel safety should be ensured.
2. Selecting the trainees carefully.
3. The trainees should not know one another.
4. The small size of groups that should be together during the training (7 - 10 individuals).
5. The trainees should not know the training place.
6. Establishing a training plan for each trainee.

The Trainers:

All measures taken with regard to the commanders apply also to the trainers. Also, the following should be applied:

1. Fewness of the trainers in the training place. Only those conducting the training should be there, in order not to subject the training team to the risk of security exposure.
2. Not revealing the identity of the trainer to trainees.
3. Keeping a small ratio of trainees to trainer.
4. The training team members should not know one another.
Seventh Lesson:  
Weapons: Measures Related to Buying and Transporting Them

Prior to dealing with weapons, whether buying, transporting, or storing them, it is essential to establish a careful, systematic and firm security plan that plan deals with all stages. It is necessary to divide that task into stages: First Stage: Prior to Purchase; Second Stage: Purchasing; Third Stage: Transport; Fourth Stage: Storage.

1. Prior to Purchase Stage:

It is necessary to take the following measures:

a. In-depth knowledge of the place where weapons will be purchased, together with its entrances and exits.

b. Verifying there are no informants or security personnel at the place where purchasing will take place.

c. The place should be far from police stations and government establishments.

d. Not proceeding to the purchasing place directly by the main road, but on secondary streets.

e. Performing the exercises to detect the surveillance.

f. One’s appearance and clothing should be appropriate for the place where purchasing will take place.

g. The purchasing place should not be situated in such a way that the seller and buyer can be seen from another location. To the contrary, the purchasing place should be such that the seller and buyer can see the surrounding area.

h. Determining a suitable cover for being in that place.

i. The place should not be crowded because that would facilitate the police hiding among people, monitoring the arms receiving, and consequently arresting the brother purchasing.
j. In case one of the parties is unable to arrive, it is essential to prearrange an alternative place and time with the seller.

k. Selecting a time suitable for the purchase so that it does not raise suspicion.

l. Prior to purchasing, the seller should be tested to ensure that he is not an agent of the security apparatus.

m. Preparing a place for storage prior to purchasing.

2. The Purchase Stage:

a. Verifying that the weapons are in working condition.

b. Not paying the seller the price for the weapons before viewing, inspecting, and testing them.

c. Not telling the seller about the mission for which the weapons are being purchased.

d. Extreme caution should be used during the purchasing operation in the event of any unnatural behavior by the seller or those around you.

e. Not lengthening the time spent with the seller. It is important to depart immediately after purchasing the weapons.

3. The Transport Stage:

a. Avoid main roads where checkpoints are common.

b. Choose a suitable time for transporting the weapons.

c. Observers should proceed on the road ahead of the transportation vehicle for early warning in case of an emergency.

d. Not proceeding directly to the storage place until after verifying there is no surveillance.

e. During the transport stage, weapons should be hidden in a way that they are inconspicuous and difficult to find.
f. The route for transporting the weapons should be determined very carefully.

g. Verifying the legality of the vehicle, performing its maintenance, checking its gasoline and water levels, etc.

h. Driving the car normally in order to prevent accidents.

4. The Storage Stage:

a. In order to avoid repeated transporting, suitable storage places should be selected. In case the materials are bombs or detonators, they should be protected from extreme heat and humidity.

b. Explosive materials and detonators should be separated and stored apart from each other.

c. Caution should be exercised when putting detonators in the arsenal.

d. Lubricating the weapons and placing them in wooden or plastic crates. The ammunition should be treated likewise.

When selecting an arsenal, consider the following:

1. The arsenal should not be in well-protected areas, or close to parks or public places.

2. The arsenal should not be in a “no-man’s-land.”

3. The arsenal should not be in an apartment previously used for suspicious activities and often frequented by security personnel.

4. The arsenal should not be a room that is constantly used and cannot be given up by family members who do not know the nature of the father or husband’s work.

5. The apartment selected as an arsenal should be owned by the Organization or rented on a long-term basis.

6. The brother responsible for storage should not visit the arsenal frequently, nor toy with the weapons.
7. The arsenal keeper should record in a book all weapons, explosive materials, and ammunition. That book should be coded and well secured.

8. Only the arsenal keeper and the commander should know the location of the arsenal.

9. It is necessary to prepare alternative arsenals and not leave any leads in the original arsenals to the alternative ones.
Eighth Lesson: Member Safety

Defining Members Safety:

This is a set of measures taken by members who perform undercover missions in order to prevent the enemies from getting to them.

It is necessary for any party that adopts Jihad work and has many members to subdivide its members into three groups, each of which has its own security measures. The three groups are:

1. The overt member,
2. The covert member, and
3. The commander

Measures that should be taken by the Overt Member:

1. He should not be curious and inquisitive about matters that do not concern him.
2. He should not be chatty and talkative about everything he knows or hears.
3. He should not carry on him the names and addresses of those members he knows. If he has to, he should keep them safe.
4. During times of security concerns and arrest campaigns and especially if his appearance is Islamic, he should reduce his visits to the areas of trouble and remain at home instead.
5. When conversing on the telephone, he should not talk about any information that might be of use to the enemy.
6. When sending letters, he should not mention any information that might be of use to the enemy. When receiving letters, he should burn them immediately after reading them and pour water on them to prevent the enemy from reading them. Further, he should
destroy any traces of fire so the enemy would not find out that something was burned.

Editor’s Comment: K.K. Muhamed, the safe-house minder in Dar es-Salaam referred to earlier, was the one overt member of the cell planning the bombing of the U.S. Embassy in Tanzania. He felt isolated from the undercover members as they talked among themselves. When he tried to be “chatty” and then expressed curiosity as to the nature of the action they were planning, demonstrating adherence to the “need to know” principle, the leader of the cell coldly informed him, “Your job is not to ask questions. Your job is to follow instructions. This is your instruction now. Get me a Fanta.” (The orange drink.)

Measures that should be taken by the Undercover Member:

In addition to the above measures, the member should...

1. Not reveal his true name to the Organization’s members who are working with him, nor to the [Islamic] Da’wa [Call].

2. Have a general appearance that does not indicate Islamic orientation (beard, toothpick, book, [long] shirt, small Koran).

3. Be careful not to mention the brothers’ common expressions or show their behaviors (special praying appearance, “may Allah reward you”, “peace be on you” while arriving and departing, etc.)

4. Avoid visiting famous Islamic places (mosques, libraries, Islamic fairs, etc.)

5. Carry falsified personal documents and know all the information they contain.

6. Have protection preceding his visit to any place while moving about (apartment, province, means of transportation, etc.).

7. Have complete and accurate knowledge of the security status related to those around him in his place of work and residence, so that no danger or harm would catch him unaware.
8. Maintain his family and neighborhood relationships and should not show any changes towards them so that they would not attempt to bring him back [from the Organization] for security reasons.

9. Not resort to utilizing letters and messengers except in an emergency.

10. Not speak loudly.

11. Not get involved in advocating good and denouncing evil in order not to attract attention to himself.

12. Break the daily routine, especially when performing an undercover mission. For example, changing the departure and return routes, arrival and departure times, and the store where he buys his goods.

13. Not causing any trouble in the neighborhood where he lives or at the place of work.

14. Converse on the telephone using special code so that he does not attract attention.

15. Not contacting the overt members except when necessary. Such contacts should be brief.

16. Not fall into the enemy’s incitement trap, either through praising or criticizing his Organization.

17. Performing the exercises to detect surveillance whenever a task is to be performed.

18. Not park in no-parking zones and not take photographs where it is forbidden.

19. Closing all that should be closed before departing the place, whether at home or his place of undercover work.

20. Not undergo a sudden change in his daily routine or any relationships that precede his Jihad involvement. For example, there should not be an obvious change in his habits of conversing, movement, presence, or disappearance. Likewise, he should not be hasty to sever his previous relationships.
21. Not meet in places where there are informers, such as coffee shops, and not live in areas close to the residences of important personalities, government establishments, and police stations.

22. Not write down on any media, especially on paper, that could show the traces and words of the pen by rubbing the paper with lead powder.

Editor’s Comment: The special precautions recommended to the undercover member combine basic tradecraft security measures recommended earlier, with a number of particular requirements that potentially pose a dilemma for the devout Muslim, in effect prescribing omitting or reducing practices of an observant Muslim, for these practices might attract attention. Lesson Eleven provides the rationalization for how a good Muslim can do this.

Measures that Should be Taken by the Commander:

*The commander, whether in overt or covert work, has special importance for the following reasons:

1. The large amount of information that he possesses.
2. The difficulty of the command in replacing the commander.
3. Therefore, all previously mentioned security precautions regarding members should be heightened for the commander. Many resources should be reserved for protecting the commanders.

Important Note: Married brothers should observe the following:

1. Not talking with their wives about Jihad work.
2. The members with security risks should not travel with their wives. A wife with an Islamic appearance (veil) attracts attention.
Ninth Lesson:
Security Plan

Defining Security Plan:

This is a set of coordinated, cohesive, and integrated measures that are related to a certain activity and designed to confuse and surprise the enemy, and if uncovered, to minimize the work loss as much as possible.

Importance of the Security Plan:

The work will be successful if Allah grants that. The more solid is the security plan, the more successful [the work] and the fewer the losses. The less solid the security plan, the less successful [the work] and the greater the losses.

Specifications of the Security Policy:

A number of conditions should be satisfied to help the security plan to succeed. These are: [It should be]

A. realistic and based on fact so it would be credible to the enemy before and after the work.

B. coordinated, integrated, cohesive, and accurate, without any gaps, to provide the enemy [the impression of] a continuous and linked chain of events.

C. simple so that the members can assimilate it.

D. creative.

E. flexible.

F. secretive.

The Method of Implementing the Security Plan:

There should be a security plan for each activity that is subject to being uncovered by the enemy. For example, the brother who is charged with a
certain mission might be arrested. It is, therefore, essential that a security plan be designed for him through which he will be able to deny any accusation. Likewise, for the group assigned a collective mission, there should be a security plan to which all members are committed. Each member would then find out, learn, and be trained in his role to ensure his assimilation of it.

In this lesson, we shall cover many examples of security plans related to certain matters:

2. Security plan for a group (important meeting).

**Example of a security plan for an individual mission (training in Afghanistan):**

**Prior to Departure:**
Traveling through an airport, the brother might be subjected to interrogation. It is essential that he be taught the answers to the following anticipated questions:

A. What are the reasons for your travel?
B. How did you get the money for travel?
C. How long is the travel period?
D. Who will meet you in the arrival country?
E. What will you be doing in the arrival country?

(There are different degrees of interrogation)

**During Travel (transit country):**
The brother should be taught the answers to the following questions:

A. Why are you going to Pakistan?
B. Do you belong to any religious organizations?
C. How did you get the travel money?
D. Who got you the visa to Pakistan?
E. What will you be doing in Pakistan?
F. With whom will you be staying in Pakistan?

Arrival Country (Pakistan):
The brother should be taught the answers to the following questions:
A. Why did you come to Pakistan?
B. How long will you be spending in Pakistan?
C. With whom will you be staying?

Transit Country (Return):
The brother should be taught the answers to the following questions:
A. What were you doing in Pakistan?
B. Are you a Jihad fighter?
C. Do you belong to religious organizations in your country?
D. Why did you come to our country in particular?
E. Whom will you be staying with now?
F. How long will you spend here?

Return Country (Returning to your Country):
A. What were you doing in the transit country?
B. Addresses and telephone numbers of those who hosted you during your stay?
C. Whom did you visit in your group, and for how long?

Editor’s Comment: Apart from the careful attention to detail, specifying in great detail questions to be prepared for, it is interesting to observe the centrality of Pakistan in their operational planning.
When Your Travel to Pakistan is Discovered:

A. What were you doing in Pakistan or Afghanistan?
B. In which camp were you trained?
C. Who trained you? On what weapons were you trained?
D. Who assigned you to go to Afghanistan?
E. Whom will you contact in your country?
F. What are the tasks and missions that you intend to execute in your country?
G. Who else trained with you in Afghanistan?
H. How many of your countrymen are in that camp and in Afghanistan?
I. What are their names?
J. Who are the group commanders there [in Pakistan]? Where do they live and what do they do?
K. What things do the commanders talk about?

An Example of a Security Plan for a Group Mission (Important Meeting).

The meeting is of two types:

A. A meeting held by those responsible for overt work. That meeting is held in many places (mosque, apartment, ...)
B. A meeting held by those responsible for covert work. For that meeting, great effort on our part should be exercised to ensure its safety. We shall discuss that meeting and what makes it secure from enemies spies.

The security plan for that meeting is divided into several stages:

A. Before the meeting,
B. The meeting location,
C. During the meeting,
D. After the conclusion of meeting, and
E. In case security personnel storm the meeting place and capture one of the members.

**A. Before the meeting:**

Here the meeting for covert work is divided into:

**Meeting in a Stationary Location:**

A meeting where more than three members gather to discuss a plan or prepare for an activity.

**Mobile Meeting (Encounter):**

A meeting among a small number of members, not more than three, to inform [one another] of a certain issue.

**Security Measures Necessary Prior to the Stationary Meeting:**

1. Establishing a plan suitable for the members if any of them is arrested. It consists of:
   a. Who is the owner of the apartment?
   b. What was discussed in the meeting?
   c. Who was with you?
   d. What was agreed upon?

2. Specifying the timing of the meeting in such a way as not to raise suspicion of the members’ movements.

3. Not allowing a long period of time between specifying the meeting time and the meeting itself.

4. Securing the meeting location and the routes leading to it by the following:
   a. Ensuring the security status via telephone.
   b. Assigning members to monitor the place before and during the meeting.
c. Planting a member close to the nearest enemy security point (police station, security administration) to communicate the first sight of security movement.

d. Posting an armed guard to stop any attack and to give those meeting a chance to escape.

5. Specifying what would happen in the event the police storm the place.

6. Those members going to the meeting should consider the following:
   a. Ensuring that the enemy is not behind them while on the way to the meeting place.
   b. Not heading directly to the meeting place but through secondary places.
   c. Not going to the meeting place as a group but individually, with time gaps between them.
   d. The clothing and appearance should be suitable for the meeting place.
   e. If the brother uses public transportation, he should alight before or after the meeting location. In case he has a private car, he should park it in a secure place not near the location that allows him to maneuver quickly at any moment.
   f. Verifying the proper cover for the documents he has with him.
   g. If a member is armed, he should make sure that the weapon is in good working condition.

**Necessary Security Measures Prior to the Mobile Meeting:**

a. When a brother goes to a certain meeting (mobile meeting), he should review these things:

   b. Is he sure that the enemy is not behind him nor at the meeting place?
c. Who will meet him?

d. Is there anything that might raise suspicion?

e. Is this the first appointment or the second (alternative, changed)?

f. Does he know the meeting place in detail?

g. Are his appearance and clothing suitable for the location where he will stand [meet]?

h. Is his weapon in good working condition?

i. What is the alternative for each action?

j. Not going directly to the person whom he would like to meet. Verifying the person’s appearance and features.

B. The Stationary Meeting Location:

It is necessary that it have special characteristics to confront any danger to the meeting members:

1. Location-wise, it should be in the middle of a group of houses, not at the beginning.

2. Having many routes leading to that location. That would assist entering and exiting in many ways. Consequently, it makes surrounding the place difficult and facilitates escaping from danger.

3. The location should not be close to suspicious locations ([where] individuals or establishments work with the security [apparatus]).

4. It is preferable that the apartment be on the ground floor and have a telephone.

The Mobile Meeting Location (Encounter):

1. The meeting location should be at the intersection of many roads where it is easy to come, go, and flee.

2. The meeting should be held far from places where it is believed some of whose elements deal with the security apparatus (coffee shops).
3. The place should not be crowded because that allows security personnel to go undetected.

4. It is necessary to have alternative locations and times. That would make it difficult for security personnel to monitor the place.

**C. During the Meeting:**

The following should be observed:

1. Establishing a security plan that consists of the following:
   a. Proper cover for the members’ presence (students, for example, it is necessary to have books, notebooks, ...)
   b. Verifying that personal documents match the agreed-upon cover.
   c. Not having written direction to the meeting place. If that is necessary, it should be coded.
   d. Not having or leaving food or anything else that would reveal the presence of many people.
   e. Surrounding the place with barb wire. That depends on the importance of the meeting and if there are items that cannot be carried during escape.

**D. After the Conclusion of the Meeting:**

1. Departing singly or in pairs, depending on the number of members present.
2. Not heading directly onto main roads but to secondary ones.
3. Not speaking about what was discussed in the meeting, during or after departure.
4. Removing all observers after the members depart.
5. Not leaving anything that would lead [to the fact that] there was anyone there except the owner.
Editor’s Comment: Many of the instructions are redundant with those issued earlier, only now the subject is the act of meeting, whereas earlier it was concerned with location. Just as with the instructions for obtaining weapons, there is a systematic and logical sequential line of march to the instructions reflecting not only a conceptual clarity of the writer, but suggesting a compulsive personality style.

E. Raiding and capturing one of the members.

1. Establishing a plan to repel the attack, which consists of the following:
   a. Who will engage the enemy with bullets?
   b. Who will flee with the important documents and who will burn the rest?
   c. Not heading directly to other organization locations.
   d. Specifying the escape roads and streets.
   e. If the place is surrounded by barb wire, make sure all members have left.

In case an individual is caught, the following should be done:

1. Executing what was agreed upon with the brother in the security plan.
2. If the brother has important work position (commander, one who knows the arsenal locations, ...), whatever is necessary should be done before the enemy discovers anything.
3. Instruct all members not to go to the meeting location.
4. Inform all members of the telephone number of that apartment in order to mislead the enemy.

An Example of a Security Plan for a Group Mission (assassinating an important person)\textsuperscript{12}: Assassination is an operation of military means and basic security. Therefore, it is essential that the commanders who establish plans related to assassination give attention to two issues:
First Issue:
The importance of establishing a careful, systematic, and solid security plan to hide the operation from the enemy until the time of its execution, which would minimize the losses in case the executing party is discovered.

Second Issue:
The importance of establishing a tactical plan for the assassination operation that consists of the operational factors themselves (members, weapons, hiding places ...) and factors of the operation (time, place). In this example, we shall explain in detail the part related to the security plan. The part related to operational tactics will be explained in the lesson on special operational tactics.

Security Plan for the Assassination Operation:
The security plan must take into account the following matters:

A. The Commander: The security apparatus should not know his whereabouts and movements. All security measures and arrangements related to members of the Military Organization (soldiers, commanders) apply to him.

B. The Members:

1. They are elements who are selected from various provinces and are suitable for the operation.

2. During the selection process, members should not know one another. They should not know the original planners of the operation. In case they do, the commander should be notified. He then should modify the plan.

3. They should be distributed as small groups (3 members) in apartments that are not known except to their proprietors. They should also be given field names.

4. During the selection process, consider whether their absence from their families and jobs would clearly attract attention. We also apply to them all security measures related to the Organization’s individuals (soldiers).

C. Method of Operating:
1. The matters of arming and financing should not be known by anyone except the commander.

2. The apartments should not be rented under real names. They [the apartments] should undergo all security measures related to the Military Organization’s camps.

3. Prior to executing an operation, falsified documents should be prepared for the participating individuals.

4. The documents related to the operation should be hidden in a secure place and burned immediately after the operation, and traces of the fire should be removed.

5. The means of communication between the operation commander and the participating brothers should be established.

6. Prior to the operation, apartments should be prepared to hide the brothers participating in it. These apartments should not be known except to the commander and his soldiers.

7. Reliable transportation means must be made available. It is essential that prior to the operation, these means are checked and properly maintained.

D. Interrogation and Investigation: Prior to executing an operation, the commander should instruct his soldiers on what to say if they are captured. He should explain that more than once, in order to ensure that they have assimilated it. They should, in turn, explain it back to the commander. The commander should also sit with each of them individually [and go over] the agreed-upon matters that would be brought up during the interrogation:

1. The one who conceived, planned, and executed this operation was a brother who has a record of those matters with the enemy.

2. During the interrogation, each brother would mention a story that suits his personal status and the province of his
residence. The story should be agreed upon with the commander.

3. Each brother who is subjected to interrogation and torture, should state all that he agreed upon with the commander and not deviate from it. Coordination should be maintained with all brothers connected to the operation.

Note:

The fictitious brother who the brothers say conceived, planned, trained, and executed the operation, should be sent away on a journey [outside the country].
Tenth Lesson:
Special Tactical Operations

Definition of Special Operations:\(^\text{13}\):
These are operations using military means and basic security. Special operations are some of the tasks of groups specialized in intelligence and security.

Characteristics of Members that Specialize in the Special Operations:

1. Individual’s physical and combat fitness (jumping, climbing, running, etc.).
2. Good training on the weapon of assassination, assault, kidnapping, and bombing (special operations).
3. Possessing cleverness, canniness, and deception.
4. Possessing intelligence, precision, and alertness.
5. Tranquility and calm personality (that allows coping with psychological traumas such as those of the operation of bloodshed, mass murder). Likewise, [the ability to withstand] reverse psychological traumas, such as killing one or all members of his group. [He should be able] to proceed with the work.
6. Special ability to keep secrets and not reveal them to anyone.
7. [Good] security sense during the interrogation.
8. Great ability to make quick decisions after altering the agreed-upon plan (proper actions in urgent situations).
9. Patience, ability to withstand, and religiousness.
11. Unknown to the security apparatus.

Editor’s Comment: These characteristics resemble those of the members in general, but with some refinements. The member in general
shall have a calm and unflappable personality that can tolerate murder. The personality of the special operations member shall be calm in the face of mass murder.

**Weapons of Special Operations:**

1. Cold steel weapons (rope, knife, rod, ...).
2. Poisons
3. Pistols and rifles
4. Explosives

We note that special operations include assassinations, bombing and demolition, assault, kidnapping hostages and confiscating documents, freeing prisoners.

**Importance of Special Operations:**

1. Boosting Islamic morale and lowering that of the enemy.
2. Preparing and training new members for future tasks.
3. A form of necessary punishment.
4. Mocking the regime’s admiration among the population.
5. Removing the personalities that stand in the way of the [Islamic] Da’wa [Call].
6. Agitating [the population] regarding publicized matters.
7. Rejecting compliance with and submission to the regime’s practices.
8. Giving legitimacy to the Jama’a [Islamic Group].
9. Spreading fear and terror through the regime’s ranks.
10. Bringing new members to the Organization’s ranks.

*Editor’s Comment:* This list of ten different ways in which special operations are important is striking, for with the exception of, “removing the personalities that stands in the way of the Da’wa,” each of the items is psychological—to terrorize the regime’s population, to enhance
recruitment, to boost morale while lowering that of the enemy, etc. This emphasizes that at heart terrorism is psychological warfare, a particularly vicious species of psychological warfare, with violence as communication.

Disadvantages of Special Operations:
1. Restraining the [Islamic] Da’wa [Call] and preachers.
2. Revealing the structure of the Military Organization.
3. Financially draining the Military Organization.
4. Use of [operations] as propaganda against the Islamic Jama’a [Group].
5. Spreading fear and terror among the population.
6. The regime’s safeguards and precautions against any other operation.
7. Special operations cannot cause the fall of the regime in power.
8. Increase in failed [operation] attempts cause an increase in the regime’s credibility.
9. [Operations] cause the regime to assassinate the Jama’a [Islamic Group] leaders.
10. Boosting enemy morale and lowering that of the Organization’s members in case of repeated failure.
11. Members of the Organization lose faith in themselves and their leaders in case of repeatedly failed special operations. The inverse is also true.

Necessary Characteristics of Special Operations:
A successful special operation requires the following:

1. Security plan for the operation (members, weapons, apartments, documents, etc.). This requirement has been explained in detail in the security plan [lesson]. Refer to it.

2. An operational tactical plan. This requirement will be explained in this lesson in detail.
Editor’s Comment: What is impressive about the following is the systematic methodical approach to planning that is reflected, a notable characteristic of Al-Qaeda operations.

**Special Operation Tactical Plan:**

A special operation must have stages. These stages are integrated and inseparable, otherwise, the operation would fail. These stages are:

1. Research (reconnaissance) stage.
2. Planning stage.
3. Execution stage.

1. **Research (reconnaissance) stage:**

In this stage, precise information about the target is collected. The target may be a person, a place, or ...

For example, when attempting to assassinate an important target - a personality, it is necessary to gather all information related to that target, such as:

a. His name, age, residence, social status
b. His work
c. Time of his departure to work
d. Time of his return from work
e. The routes he takes
f. How he spends his free time
g. His friends and their addresses
h. The car he drives
i. His wife’s work and whether he visits her there
j. His children and whether he goes to their school
k. Does he have a girlfriend? What is her address, and when does he visit her?
1. The physician who treats him
m. The stores where he shops
n. Places where he spends his vacations and holidays
o. His house entrances, exits, and the surrounding streets
p. Ways of sneaking into his house
q. Is he armed? How many guards does he have?

However, if the target is an important place, such as a military base, a ministry[building], it is necessary to know the following:

**From the Outside:**

1. How wide are the streets and in which direction do they run leading to the place?
2. Transportation means to the place
3. The area, physical layout, and setting of the place
4. Traffic signals and pedestrian areas
5. Security personnel centers and nearby government agencies
6. Nearby embassies and consulates
7. The economic characteristics of the area where the place is located
8. Traffic congestion times
9. Amount and location of lighting
10. Characteristics of the area of the place (residence, leveled, industrial, rural, lots of trees, ...)

**From the Inside:**

1. Number of people who are inside
2. Number and location of guard posts
3. Number and names of the leaders
4. Number of floors and rooms
5. Telephone lines and the location of the switchboard
6. Individuals’ times of entrances and exits
7. Inside parking
8. Electric box

2. Planning Stage:
After receiving information about the target, the operational plan is created. The commander who makes the operation’s tactical plan should consider the following:

1. The type of required weapons
2. Number of required members and their training
3. An alternative to the original plan
4. Type of operation from a tactical perspective. Is it a silent or loud elimination operation?
5. Time specified for the execution of the operation
6. The target of the operation. Is it one individual or many?
7. Team meeting place prior execution of the operation
8. Team meeting place after execution of the operation
9. Securing withdrawal of the team after the execution and routes of withdrawal
10. Difficulties that the team may encounter

Afterwards, the commander of the operation shares his plan with other group commanders. When the plan is discussed and modified, a final one is determined. Then the group commanders instruct their soldiers on their individual missions, and the members repeat their orders in order to ensure that they have assimilated them.

3. Third Stage: Execution:
In order to discover any unexpected element detrimental to the operation, it is necessary, prior to execution of the operation, to rehearse it in a place
similar to that of the real operation. The rehearsal may take place shortly before the execution. It is then that the operation is executed in the place and time specified. After execution of the operation, a complete evaluation is made. At the end, a full report is given to the commanders of the Organization.

**Important Recommendations for Commanders of Special Operations:**

**Before the Operation:**

1. The operation should be appropriate to the participants’ physical and mental abilities and capabilities.
2. The participants should be selected from volunteers, not draftees.
3. Roles should be distributed according to the members’ physical and moral abilities.
4. The execution equipment should be brought to the place of the operation in a timely fashion and should be placed in a convenient location.
5. The members should be well disguised and placed in a location close to that of the operation.
6. Shortly before the operation, reconnaissance should be repeated in order to confirm that nothing new has occurred.
7. The operation members should not all be told about the operation until shortly before executing it in order to avoid leaking of its news.
8. Weapons should be tested prior to their use in the operation.
9. The place and time should not be unsuitable for the operation.
10. When using a pistol or rifle, a bullet should be already placed in the firing chamber.

*Editor’s Comment: This last instruction is reminiscent of the instruction under “Member Safety,” Lesson Eight that the Member should not park in no-parking zones. No detail is too small or so self evident as*
to not be included, including placing a bullet in the firing chamber. This also indicates that the manual is intended for the new recruit, with no previous experience.

After the Operation:

1. The operation should be completely evaluated as far as advantages and disadvantages.

   Editor’s Comment: This requirement, and it being listed first, reflects an adaptive learning organization. After each mission, the leadership reviews “lessons learned” and these in turn become incorporated in the training manual.

2. Also, each member of the operation should be evaluated according to his assigned role.

3. Each member who succeeded in his role should be rewarded, and each member who was weak or slacken in his role should be dismissed.

4. Hiding or sending abroad those who executed the operation.

5. Hiding the weapons used in the operation in a location difficult to find by the security apparatus.

6. Burning any documents, maps, or drawings related to the operation. Removal of all traces of burning them.

7. Defending members who participated in the operation in case they are captured, and taking care of their families.

8. The party that performed the operation should not be revealed.

9. No signs that might lead to the execution party should be left at the operation’s location.
Eleventh Lesson: 
Espionage
Information-Gathering Using Open Methods

Editor’s Comment: Once again, in this lesson, after ten matter-of-fact lessons concerned with tradecraft, and maintaining security, the manual returns to the style of justifying the actions in verses from the Koran and sayings of the prophet that was found in the introduction. This may reflect a change of authors, but may also be occasioned by the need to justify for the new recruit extreme actions that seem to contradict the religious teachings on which he has been raised.

Definition of Espionage

It is the covert search for and examination of the enemy’s news and information for the purpose of using them when a plan is devised. In [the book titled] “Nile Al-Aoutar wa Fath Al-Bari,” [it is said that] the spy is called an eye because his work is through his eyes, or because of his excessive and preoccupation with observation, as if all his being is an eye.

Espionage in the era of the prophet – Allah bless and keep him – and his honored companions: The prophet – Allah bless and keep him – used informants in most of his attacks. As Abou Soufian’s caravan, that was coming from Damascus, was approaching, the prophet – Allah bless and keep him – wanted to know the caravan’s destination. While the prophet was in Madina, he sent Talha Ibn Obaidallah and Said Ibn Zeid to the Damascus route to gather information about the caravan. On their way back to Madina, and at the conclusion of the Badr battle, they met the prophet – Allah bless and keep him – in Terban, as he was descending from Badr to take Madina. [Though] they did not participate in the battle, they nevertheless got their share of the [spoils].

In his attacks, the prophet – Allah bless and keep him – would find out the enemy’s intention. In the Hodaibiya [battle] days, though he did not want war, he exercised caution by sending a special 40-man reconnaissance group, headed by A’kkasha Ibn Mohsen Al-Azda. One of that group
forerunners found a man who led them to the enemy’s livestock. They captured 200 camels from that livestock and brought them to Madina.

The prophet – Allah bless and keep him – had local informants in Mecca who told him everything, big and small, that might harm the Muslims’ welfare. Among those [enemies] were his uncle Al-Abbas Ibn Abd Al-Mutlib, and Bashir Ibn Soufian Al-Atki. Al-Khulafa Arrashidun [Mohammed’s successors] advised their commanders about the importance of using scouts and informants to learn the enemy’s secrets. Abou Bakr Al-Siddik – may Allah be pleased with him – said to his commander Amro Ibn Al-A’ss – may Allah be pleased with him –, “Send your informants to bring you Abou Obeida’s news. If he is victorious over his enemy, then you fight those that are in Palestine. If he needs soldiers, then dispatch one battalion after another for him.”

Omar Ibn Al-Khattab – may Allah be pleased with him – advised his commander Saad Ibn Abou Wakkas – may Allah be pleased with him – saying, “If you step foot on your enemies’ land, get spies for them. Choose those whom you count on for their truthfulness and advice, whether Arabs or inhabitants of that land. Liars’ accounts would not benefit you, even if some of them were true; the deceiver is a spy against you and not for you.” Khaled Ibn Al-Walid – may Allah be pleased with him – used to take informants and spies with him in each of his wars against the Christian Orthodox. He chose them carefully and treated them well.

**Principle of Moslems Spying on their Enemies:**

Spying on the enemy is permitted and it may even be a duty in the case of war between Moslems and others. Winning the battle is dependent on knowing the enemy’s secrets, movements, and plans. The prophet – Allah bless and keep him – used that method. He would send spies and informants. Perhaps, he – Allah bless and keep him – even went himself as in the major Badr attack. Al-Khulafa Arrashidun [Mohammed’s successors] also ordered it [spying]. Since Islam is superior to all human conditions and earthly religions, it permits spying for itself but not for others. Majestic Allah says, “Not equal are the companions of the fire and the companions of the garden,” and the prophet says, “Islam is supreme and there is nothing above it.” Islam, therefore, fights so the word of
Allah can become supreme. Others fight for worldly gains and lowly and inferior goals.

*Editor’s Comment: Using the role model of the prophet, the honorable role of the spy in wartime is justified.*

We have not been able to identify the source of the statement, “The prophet says that ‘Islam is supreme and there is nothing above it.’” As in several other locations, the honored status given to People of the Book in the Koran is omitted here, with the continuing implication that Christians and Jews are included among the non-believers. In fact, in Surah 2:62, the special status of all of the Abrahamic and monotheistic religions is emphasized: Those who believe, (Muslims), the Jews, the Christians, and the Sabaeans—whosoever believe in God and the Last Day and do good deeds, they shall have their reward from their Lord, shall have nothing to fear, nor shall they come to grief.

**An Important Question:**

How can a Muslim spy live among enemies if he maintains his Islamic characteristics? How can he perform his duties to Allah and not want to appear Muslim?

Concerning the issue of clothing and appearance (appearance of true religion), Ibn Taimia – may Allah have mercy on him – said, “If a Muslim is in a combat or godless area, he is not obligated to have a different appearance from [those around him]. The [Muslim] man may prefer or even be obligated to look like them, provided his action brings a religious benefit of preaching to them, learning their secrets and informing Muslims, preventing their harm, or some other beneficial goal.”

Resembling the polytheist in religious appearance is a kind of “necessity permits the forbidden” even though they [forbidden acts] are basically prohibited. As for the visible duties, like fasting and praying, he can fast by using any justification not to eat with them [polytheist]. As for prayer, the book (Al-Manhaj Al-Haraki Lissira Al-Nabawiya) quotes Al-Bakhari that “he [the Moslem] may combine the noon and afternoon [prayers], sunset and evening [prayers]. That is based on the fact that the prophet – Allah bless and keep him – combined [prayers] in Medina without fear or hesitation.”
Editor’s Comment: This answer to “An Important Question” refers not only to the conduct of espionage but also to the requirement for the undercover special operations operative to maintain cover, delineated in Lesson Eight, Member Safety. It is designed to assist the devout Muslim in resolving the apparent conflict in complying with instructions that seem to contradict the prescriptions in the Koran for how to live up to the requirements of Allah. In effect, the answer provided says that Allah will forgive you for not living up to the concrete requirements for being an observant Muslim, since what the special operations member or espionage agent is doing is in the highest service of Allah.

Though scholars have disagreed about the interpretation of that tradition, it is possible – though Allah knows best – that the Moslem spy combines [prayers]. It is noted, however, that it is forbidden to do the unlawful, such as drinking wine or fornicating. There is nothing that permits those15.

Guidelines for Beating and Killing Hostages:

Religious scholars have permitted beating. They use a tradition explained in Imam Mosallem’s manuscript, who quotes Thabit Ibn Ans that Allah’s prophet – Allah bless and keep him – sought counsel when he was informed about Abou Soufian’s arrival. Abou Bakr and Omar spoke, yet he [the prophet] did not listen. Saad Ibn Ibada said, “Do you want us, O Allah’s prophet, who controls my life? If you order us to subdue the camel we would do it, or beat and follow them to Al-Ghimad lakes (5-day trip beyond Mecca), we would do it, too.” The prophet – Allah bless and keep him – called on the people, who then descended on Badr. They were met by Kureish camels carrying water. Among their takers was a young black [slave] man belonging to the Al-Hajjaj clan. They took him [as hostage]. The companions of the prophet – Allah bless and keep him – started asking him about Abou Sofian and his companions. He first said, “I know nothing about Abou Sofian but I know about Abou Jahl, Atba, Sheiba, and Omaya Ibn Khalaf.” But when they beat him he said, “O yes, I will tell you. This is the news of Abou Sofian...” Meanwhile, the prophet – Allah bless and keep him –, who was praying, started to depart saying, “Strike him if he tells you the truth and release him if he lies.” Then he said, “That is the death of someone [the hostage].” He said that
in the presence of his companions and while moving his hand on the ground.

In this tradition, we find permission to interrogate the hostage for the purpose of obtaining information. It is permitted to strike the nonbeliever who has no covenant until he reveals the news, information, and secrets of his people.

The religious scholars have also permitted the killing of a hostage if he insists on withholding information from Moslems. They permitted his killing so that he would not inform his people of what he learned about the Muslim condition, number, and secrets. In the Honein attack, after one of the spies learned about the Muslems’ kindness and weakness then fled, the prophet – Allah bless and keep him – permitted [shedding] his blood and said, “Find and kill him.” Salma Ibn Al-Akwa’ followed, caught, and killed him.

The scholars have also permitted the exchange of hostages for money, services, and expertise, as well as secrets of the enemy’s army, plans, and numbers. After the Badr attack, the prophet – Allah bless and keep him – showed favor to some hostages, like the poet Abou Izza, by exchanging most of them for money. The rest were released for providing services and expertise to the Muslems.

Editor’s Comment: The reference to religious scholars as the authoritative source is to be noted. These scholars “use a tradition” (i.e., a hadith) from Imam Mosallem, who in turn quotes Thabit Ibn Ans, probably a companion of the Prophet. The discussion is in the wake of the battle of Badr, in which a black slave was taken hostage, and apparently beaten on the orders of the Prophet himself. During the battle of Badr, there were two targets, one a line of traders with a wide variety of goods, led by Abu Sayfan coming from Syria, and the other a large army, which could not easily be vanquished. Mohammad had his men attack the latter, confirming the Muslems’ virtue, in their readiness to abandon worldly goods for their cause. In the battle, supreme enemies of the Muslims were killed. There is, it should be emphasized, no reference in any of the relevant Surahs in the Koran (for example Surah 8, 5-19), that Mohammad gave his permission to beat or to kill hostages. Rather the key point is that the victory came only from Allah who (Surah 9) provided “a
thousand angels” and, as in Surah 10, “there is no help except from Allah.” Thus the battle is used as a parable to signify man’s dependence on God, not to justify beating and killing hostages. Once again, by lifting the story of the battle out of context, the author’s have misused religious stories and verses to provide justification for their goals. Furthermore, there is no reference in the Koran to the actions or statements attributed to Muhammad, although what the hadith claims may be accurate. But it is possible this story of the action and command of the Prophet was created to be persuasive. Indeed, the cold order attributed to the Prophet to “Find him and kill him” is in jarring contrast to the image of the Prophet stressing mercy and compassion found throughout the Koran.

The assertion that the Prophet says, “Islam is supreme and there is nothing above it” cannot be found in the Koran. The singular in the statement is discordant with many Surahs in the Koran, which while advancing the truth of Islam, do not imply that Islam is superior, nor are they meant to suggest the previous religions were intrinsically untrue.

**Importance of Information:**

1. Based on the enemy’s up-to-date information, his capabilities, and plans, the Organization’s command can design good-quality and secure plans.

2. Information about the enemy’s intention provides early warning signs for the command, which in turn makes appropriate preparation and thwarts the enemy’s opportunity.

3. Information benefits the Organization’s command by providing information about the enemy’s strengths and weaknesses.

4. Information benefits the Organization’s command by providing information about movements of the enemy and his members.

Information requirements include: Newness, Trustworthiness, Forthcoming, security, and confirmation.

_Editor’s Comment:_ Here, as follows, once again there is a change of voice, with a thorough discussion of the importance of information. Then, the level of discourse shifts once again, citing first a Muslim military
leader on the importance of knowing thy enemy, and then Truman and Alan Dulles concerning the value of open information.

General Mahmoud Sheet Khattab said, “The nation that wants to achieve victory over its enemy must know that enemy very well. It also must know the site of the battle in detail. Those who fight an enemy that they do not know, do not win because a successful military plan must be built on clear and trustworthy information. The commander who fights an enemy and does not know his strength (number and materiel) is blind and destined to fail and fall.”

Information Sources:

Any organization that desires to raise the flag of Islam high and proud, must gather as much information as possible about the enemy. Information has two sources:

Public Source:

Using this public source openly and without resorting to illegal means, it is possible to gather at least 80% of information about the enemy. The percentage varies depending on the government’s policy on freedom of the press and publication. It is possible to gather information through newspapers, magazines, books, periodicals, official publications, and enemy broadcasts. Attention should also be given to the opinion, comments, and jokes of common people.

Truman, a past American President, said, “We attribute our great advance to our press, because it gives America’s enemies the capability of learning what we have not officially publicized about our plans and even our establishments.”

In 1954, Allan Dulles [PH], Director of American Intelligence [CIA], said, “I am ready to pay any amount of money to obtain information about the Soviet Union, even as little as what the Soviet Union obtains by simply reading American newspapers.”

The one gathering public information should be a regular person (trained college graduate) who examines primary sources of information published
by the enemy (newspapers, magazines, radio, TV, etc.). He should search for information directly related to the topic in question.

The one gathering information with this public method is not exposed to any danger whatsoever. Any brother can gather information from those aforementioned sources. We cannot label that brother a “Moslem Spy” because he does not make any effort to obtain unpublished and covert information.

**Secret Sources:**

It is possible, through these secret and dangerous methods, to obtain the 20% of information that is considered secret. The most important of these sources are:

1. Individuals who are recruited as either volunteers or because of other motives
2. Recording and monitoring
3. Photography
4. Interrogation
5. Documents: By burglary or recruitment of personnel
6. Drugging
7. Surveillance, spying, and observation

**Information Gathering Using Public Means:**

1. **Newspapers, Magazines, and Official and Party Publications:**

In order to gather enemy information, the Military Organization can use means such as magazines, publications, periodicals, and official printed matter. Through these means, it is possible to learn about major government events and about the news, meetings, and travel of Presidents, ministers, and commanders. Information may be:

a. Names and photographs of important government personalities, police commanders, and security leaders.

b. Published meetings. Through these, one can learn about major decisions and topics being discussed.
c. Future meeting plans.

d. Present and future enemy capabilities through current photographs of projects and strategic sites or through meetings with top officials.

e. Beneficial news about the enemy’s diplomacy and its present and future plans.

f. Tourism news and the arrival times of foreign tourist groups.

g. Advertisements about apartments for rent, vacant positions, or anything else that is useful.

h. Advertisements about new and used car lots. These may be used in assassination, kidnapping, and overthrowing the government.

i. Learning the enemy position on current Islamic issues (veil, beard, dedication, Jihad, ...).

2. Radio and Television:
The Military organization can use these important public sources to gather information all day and night. The importance of these means is explained below.

   a. Visual and audible news help the Organization to determine its present and future plans.

   b. Interviews may help to identify the government policy and its general directives.

   c. Spotting the appearance of those who occupy high positions.

   d. Learning the prevailing information diplomacy and its position on contemporary issues.

   e. Learning about the interior of important government places and establishments during their opening ceremonies or through advertisements.

In addition to the aforementioned, [attention should be given] to newspapers, magazines, and the public’s comments and jokes.
Twelfth Lesson:
Espionage
Information-Gathering Using Covert Methods

Editor’s Comment: The instructions in this section represent basic tradecraft for espionage organizations.

Information needed through covert means:
Information needed to be gathered through covert means is of only two types:

1. Information about government personnel, officers, important personalities, and all matters related to those (residence, work place, times of leaving and returning, wives and children, places visited)

2. Information about strategic buildings, important establishments, and military bases. Examples are important ministries such as those of Defense and Internal Security, airports, seaports, land border points, embassies, and radio and TV stations.

General security measures that should be taken by the person gathering information:
During the process of gathering information, whether about governing personalities or establishments, the person doing the gathering must take the following security measures:

1. Performing the exercises to detect surveillance while executing the mission. These exercises are not well defined, but are dependent on the time, place, and the ability to be creative. These exercises include the following:
   a. Walking down a dead-end street and observing who is walking behind you. Beware of traps.
   b. Casually dropping something out of your pocket and observing who will pick it up.
c. Walking fast then stopping suddenly at a corner and observing who will be affected.

d. Stopping in front of store windows and observing who is watching you.

e. Getting on a bus and then getting off after it departs and observing who will be affected.

f. Agreeing with one of your brothers to look for whoever is watching you.

2. When receiving the gathered information, let the informants travel as far as possible from their place of residence and yours. Let each of them get there using secondary roads, preferably at night.

3. Gather what information you can without emphasizing any particular part. Do not rush or show urgency because your excitement may uncover you and the degree of importance of the information.

4. Avoid anything that reveals your identity quickly. Do not attempt to be too creative or inventive. Remember what Taliran [PH] said to his political emissaries, “Do not be anxious.”

5. Move slowly and travel a great distance. The one who is successful in gathering information is the one who is not known or conspicuous.

6. Do not accept events at their face value. Do not overlook a quick friendship or an apparent dispute. Evaluate the importance of events and do not judge them by their appearance.

7. Do not speak vaguely or act mysteriously except when wanting to get a “blabber mouth” to talk about what he knows.

8. Carry personal credentials and know all their contents.

9. Prior to collecting the information, make sure that all necessities related to the mission, especially money, are ready.

10. Study the area where information-gathering takes place carefully: Open and closed streets, residents’ customs, ways of dressing, and accent.
11. It is not permitted to carry any weapons during the information-gathering process.

12. Finding a cover prior to gathering the information.

Further, review all security measures concerning members of the Military [Organization], which are covered in prior lessons.

**Methods of Gathering Information Using Covert Means:**

The Military Organization may obtain secret information using: A. Surveillance, intelligence, and observation; B. Theft; C. Interrogation; D. Excitement; E. Drugging; F. Recruitment.

**Surveillance, Intelligence, and Observation:**

Civilian and military targets (personalities). The monitoring may be done on foot or by car.

**Surveillance on foot:**

1. The brother or brothers performing the surveillance operation on foot study the available information about the target (height, weight, way of walking, looking at a recent photograph.)

2. Knowing the target’s habits, places he visits, and communications.

3. Studying carefully the area where observation will take place: names of through and dead-end streets, residents’ habits and way of dressing.

4. Prior to the start of the surveillance mission, making sure that all needs related to the mission, especially money, are met.

5. Agreeing on how communications with the leaders will take place in case the surveillance plan is uncovered (telephone, a person used for that purpose). The telephone number should not be written but memorized.

6. Agreeing on special signals to exchange orders and instructions among the surveillance team members.

7. Knowing the measures to be taken when the target is lost, such as contacting the leaders or something else agreed upon.
8. It is not permitted to carry any weapons during the information-gathering process.

9. It is preferable to have a camera with the surveillance man in case the target is to personally contact others.

**Surveillance by car:**

Surveillance by car requires taking certain measures:

1. Inspecting the car’s fuel, water, and lights.

2. The car should be of a common type so it would not attract people’s attention.

3. The car should be in good condition and the driver should be experienced.

4. The car plates should not contain real numbers. It is important to use a false license plate and small numbers in order to prevent anyone from spotting and memorizing it.

5. The car’s interior light should be disabled in order to hide the identity of the surveillance team members sitting inside.

6. The number and appearance of the car surveillance team members should match those of the target’s car.

**Performing Surveillance by Car:**

1. The car being used for surveillance should keep up with the target’s car during the surveillance operation, especially in crowded areas and on side streets. The distance between the two cars depends on the circumstances.

2. If the target gets out of his car and starts to walk, one of the surveillance team members should get out and observe him.

3. Follow all aforementioned measures for surveillance on foot.

**Exercises to detect surveillance by car:**

1. The surveillance car speeds up then stops suddenly while observing which other car is affected (this is done where there is not a lot of traffic).
2. The surveillance car enters a dead-end street.

3. The surveillance car goes in the opposite direction of traffic.

4. The surveillance car stops and goes backwards.

5. [The surveillance car] enters a parking lot and immediately goes out.

6. [The surveillance car] takes a side road and stops.

**Surveillance, Intelligence, and Observation**

**Information about the enemy places**

The Organization’s command needs detailed information about the enemy’s vital establishments, whether civilian or military, in order to make safe plans, reach firm decisions, and avoid surprises. Thus, the individual who gathers information about a desired location should, in addition to drawing a diagram, describe it and all its details.

**The Drawing:**

The brother should draw a diagram of the area, the street, and the location which is the target of the information-gathering. He should describe its shape and characteristics. The drawing should be realistic so that someone who never saw the location could visualize it. It is preferable to also put on the drawing the directions of traffic, police stations, and security centers.

**The Description:**

It is necessary to gather as much information about the location as possible. For instance:

1. Traffic directions and how wide the streets are

2. Transportation leading to the location

3. The area, appearance, and setting of the place

4. Traffic signals and pedestrian areas

5. Security personnel centers and government agencies

6. Embassies and consulates
7. The economic characteristics of the area and traffic congestion times
8. Public parks
9. Amount and location of lighting

It is preferable to photograph the area as a whole first, then the street of the [desired] location. If possible, panoramic pictures should be taken. That is, the collection of views should be continuous in such a way that all pictures are taken from one location and that the ending of one picture is the beginning of the next. The photographer should be experienced with and proficient in film processing and developing. It is risky to use an outside film processing service. When observing a military installation or camp, we discourage taking pictures where it is forbidden. The brother/photographer should use a modern camera that can photograph at night or from a distance, and only the lens of the camera should be visible. When gathering information about a military camp, the brother should draw a diagram of the camp’s overall area, the camp itself, and its interior, if possible.

The description of the base or camp must contain the following:

1. Location
2. Exterior shape
3. Transportation to it
4. Space [area]
5. Weapons used
6. Unit using the camp
7. Fortifications and tunnels
8. Guard posts
9. Amount and periods of lighting
10. Number of soldiers and officers. Officers’ ranks
11. Ammunition depot locations
12. Vehicles and automobiles
13. Leave policy
14. Commander’s name, rank, arrival and departure times
15. Degree and speed of mobilization
16. Brigades and names of companies
17. Sleeping and waking times
18. Telephone lines and means of communication

The brother gathering the information may start a friendship with one of the soldiers or officers of that base. Information may be collected gradually and easily from soldiers when giving them rides from the camp to the bus or train stations, etc.

**Gathering Information through Interrogation:**

Security personnel in our countries arrest brothers and obtain the needed information through interrogation and torture.

The Military Organization must do likewise. On one hand, the Organization can obtain important information about enemy establishments and personnel. On the other hand, that is a form of necessary punishment.

*Editor’s Comment: As in the justification of the jihad of the sword being justified by the enemy's aggression, here torturing hostages is justified because, after all, “security personnel in our countries obtain information through interrogation and torture.” Note, in the following “the source of information is not permanent,” an antiseptic reference to killing hostages under torture.*

Information is collected in this method by kidnapping an enemy individual, interrogating him, and torturing him. This source of information is not permanent. Also, caution should be exercised about being deceived by misinformation from enemy individuals. Thus, the brother who interrogates the hostage should possess the following characteristics:
1. Should have knowledge and expertise about people’s behavior and morals.
2. Should have a strong personality.
3. Should possess a sixth sense based on practice and experience.
4. Should be extremely patient.
5. Should be able to act, pretend, and mask himself.
6. Should be intelligent, observant, analytical, and deductive.
7. Should be able to establish an investigative plan.

**Gathering Information through Recruitment:**

Recruiting agents is the most dangerous task that an enlisted brother can perform. Because of this dangerous task, the brother may be killed or imprisoned. Thus, the recruitment task must be performed by special types of members.

There are a number of motives that might entice an uncommitted person to take part in intelligence work. These motives are:

1. Coercion and entanglement
2. Greed and love for money
3. Displaying courage and love of adventure
4. Love of amusement and deviance
5. Mental and political orientation
6. Fear of being harmed

The Organization may use motives No. 2, 3, 5, and 6 in recruitment.

*Editor’s Comment: The differentiation of acceptable motives to exploit for recruitment is interesting and somewhat puzzling, why “fear of being harmed” is an acceptable motivation to exploit, but “coercion and entanglement” are not.*
Candidates for Recruitment Are:

1. Smugglers
2. Those seeking political asylum
3. Adventurers
4. Workers at coffee shops, restaurants, and hotels
5. People in need
6. Employees at borders, airports, and seaports

Types of Agents Preferred by the American Intelligence Agency [CIA]:

1. Foreign officials who are disenchanted with their country’s policies and are looking towards the U.S. for guidance and direction.

2. The ideologist (who is in his county but against his government) is considered a valuable catch and a good candidate for American Intelligence Agency [CIA].

3. Officials who have a lavish lifestyle and cannot keep up using their regular wages, or those who have weaknesses for women, other men, or alcoholic beverages. The agent who can be bought using the aforementioned means is an easy target, but the agent who considers what he does a noble cause is difficult to recruit by enemy intelligence.

4. For that purpose, students and soldiers in Third World countries are considered valuable targets. Soldiers are the dominating and controlling elements of those countries.

Editor’s Comment: Demonstrating once again the breadth of their sources, they cite the CIA’s agent preferences.

Recruitment Stages:

Suppose the Islamic Organization, with its modest capabilities, wants to obtain information about an important target (important personality, building, camp, agency, ministry). It has to do the following:
1. **Finding the Agent:** In this stage, the Organization picks the suitable person for supplying the information. The Organization learns about that person: His financial condition, his family status, his position regarding the government, and his weaknesses and strengths.

2. **Evaluating the Agent:** In this stage, the agent is placed under continuous observation to learn the times of his departure to and return from work, the places he visits, the individuals he meets, and his social interaction with those that he meets in coffee shops, clubs, etc.

3. **Approaching the Agent:** After gathering information about him, a relationship with him is developed under a certain cover, such as:
   a. Family connection and tribal relations.
   b. Developing a friendship with him in the club, coffee shop, and workers union. The [recruiting] brother develops the friendship as if it were unpretentious and unplanned. The relationship should develop naturally and gradually in order not to attract the target’s attention.

   **Important Note:** In case the first brother fails to develop a friendship with the target, another brother takes over after learning from the first about the target’s weaknesses (motives that can be exploited) such as his love for money, opposition to the government, love for adventure, or displays courage.

4. **Recruiting the Agent:** After finding, evaluating, and approaching a target, comes the second stage of recruiting him. Recruiting may be direct, that is, telling the agent frankly about working for the Organization for a specific and agreed-upon salary. A promise is secured in writing or verbally. Or recruitment may be indirect, that is, information may be taken from the target without informing him that he is an agent. That may be accomplished by giving him gifts, sharing his joys and sorrows, and attempting to solve his problems.
5. **Testing the Agent:** In this stage, the agent is assigned certain tasks in order to test his ability, loyalty, and dependability. The agent does not know that the Organization already has the sought information. If the information supplied by the agent does not match the Organization’s existing information, then the agent may be an unreliable source of information or may be trying to mislead the Organization. During the testing stage, the agent should remain under careful observation to spot all his movements.

6. **Training the Agent:** This stage applies to the recruited agent, that is, the agent who has been recruited directly and is aware that he has been recruited by someone or some organization for money or other things. That agent may be trained on the following:
   
   a. Work secrecy and means of gathering and hiding information
   b. The method of passing information on to officials
   c. Concealment and disguising
   d. Interrogation and resisting the interrogation
   e. Explaining the assigned mission in utmost detail
   f. Photography

There might not be any training at all. The agent may be given freedom in his work, relying on his instinct, talents, background, and the capabilities of his superior brother.

7. **Treating the Agent:** The brother who manages the agent should possess the qualifications of a perfect spy, a psychiatrist, and an interrogator. There are two points of view on treating the agent:
   
   a. **First Point of View:** Maintaining a strong personal relationship with the agent. This technique provides the agent with the motivation that entices him to take chances in order to please his friend with the information. However, this technique has disadvantages. The barriers between the agent and his superiors are removed, and the agent may ask for many things that were not agreed upon.
b. **Second Point of View:** The person managing the agent treats him roughly and pushes him to the limits for the purpose of getting as much information as possible. This technique uses harshness, cruelty, and threats in order to keep the agent constantly active. I believe that the Islamic Military organization can combine the two techniques. The agent may be treated in a careful Islamic manner, while the managing brother appeals to the agent’s conscience and his Islamic association with the work for majestic Allah’s religion. He lures the agent with money and gifts, and uses cruelty and kindness when appropriate.

8. **Terminating the Agent’s Services:** That should occur when any of the following take place:
   a. The recruitment mission terminates,
   b. Incapacity to work because of sickness or changes in the job situation,
   c. Repeated errors in security measures, or
   d. The agent requests the termination.

**Means for Testing the Recruit:**

1. Requesting specific information that the Organization knows well,
2. Monitoring him while he performs his covert work,
3. Overpaying him in order to know his trustworthiness,
4. Giving him a chance to tamper with the work documents (unimportant documents).

**Important Advice about Dealing with Agents:**

1. Do not send sealed packages to the agent or receive them from him. These could be booby traps.
2. Leaving something for the agent should be done as quickly as possible. When transporting and giving an item to the agent at the agreed-upon location, it should not attract attention and lead
to the agent’s arrest.

3. The financial status of the agent should be controlled so that the agent does not suddenly show great wealth. A portion of the payment should be given to him, while the other should be deposited in his bank account.

4. When wishing to recruit an agent, events should occur naturally. You may agree with a friend that he invite the person to be recruited for dinner, or something similar. While that intermediary person is talking with him, he notices your arrival at your friend’s, greets you, starts to converse with you, and invites you to sit down with the person you want to recruit.

5. When meeting with the agent, make sure neither you nor the meeting place are being monitored. Do not enter a place to meet with an agent before he does. There could be a trap for you.

6. If you wait for your agent at the agreed-upon location, you could be a target for him. Be especially careful if he goes to the bathroom. Once, in Belgium, an Israeli Mossad officer met an Arab agent. A few minutes after they sat down, the Arab agent said that he had to go get something. When he returned, the Israeli intelligence agent was still there. The Arab agent then pulled out a pistol and shot the Mossad agent several times.

7. In order to communicate with the agent, it is necessary to specify locations such as parks, a university campus area, etc.

8. It is necessary to continuously communicate with the agent, to learn about his problems and requests, help him as much as possible, lift his morale, and renew his confidence.

_Editor’s Comment: The details of the above section in terms of selection, recruitment, testing, management and termination of agents could well be adopted by many intelligence services. It reflects a thoughtful and sophisticated understanding of the complexity of the relationship with and psychology of the recruited agent._
Thirteenth Lesson:
Secret Writing and Ciphers and Codes

Secret Ink:

It consists of chemical material that is used on a special type of paper, and the writing can be made visible by various methods with numerous [chemical] solutions. The history of invisible writing is somewhat old; spies used various types of invisible ink during World War I, and after the war many improvements were made after chemical compounds were discovered. [These compounds] can make most of these invisible inks become visible. War is still being waged between the nations and terrorist organizations. The Islamic organizations can resort to their modest capabilities of writing letters with invisible ink using materials available on the market which leave no trace at all as long as it is well hidden in the writing. The paper that is used must have the following [characteristics]:

1. The paper must be smooth.
2. The paper must be the type on which ink doesn’t spread.
3. There must not be anything or any pictures on the paper that attract attention.

Types of Invisible Ink:

There are two types of invisible ink – organic and chemical compounds. Examples [of organic solutions] include: milk, vinegar, apple juice, lemon, and urine. They are easily exposed by simply heating them, and they are used frequently. Chemical solutions, which are colorless when they are dry, also appear as various colors if they are treated with another solution.

Methods of Producing Secret Ink and Ways to expose it:

1. It is possible to use any animal-based fluid and any fruit or lemon juice to expose the message. It can also be placed above a lamp, passed over a candle, or ironed with a hot iron, and yellow or brown writing will appear.
2. It is possible to use Aluminum Chloride (Neshader [PH] Salt) to write letters with secret ink. To expose the writing use the previous method.

3. It is possible to dissolve an aspirin tablet (except for children’s aspirin) in alcohol to expose the writing. All we have to do is get a piece of cotton, dip it in the alcohol solution, and wipe it on the message.

4. It is possible to use some colorless vitamins like Vitamin A or Penicillin.

5. Compounds like silver or lead should be avoided because they affect the secret ink.

Considerations When Using Secret Ink:

1. The writing should only be on smooth surfaces like glass or Formica.

2. Don’t press with the pen or quill on the paper so that the imprint of the writing doesn’t show. The writing must be done lightly on the paper.

3. Use a good quality paper.

4. Don’t write any names in a message written with secret ink.

5. A regular letter is written with a ballpoint pen and not with secret ink.

6. The quill or pen should be washed before and after use, and not used with any other ink.

How to Write on Paper with Secret Ink:

An innocent-looking letter (family-personal-greeting) is written with a ballpoint pen, but within the letter, between the lines, write the message with secret ink.

Both ciphers and code are considered important means of conveying information without anyone other than the party to which it is sent being able to determine its contents. Ciphers differ from code.
Ciphers:
A letter, number, or symbol takes the place of another letter, number, or symbol. The number (1), the letter (H), or the symbol (_) could take the place of the number (3), the letter (D), the symbol (o), or any other number, symbol, or letter. Notice that in simple ciphers that the same number or symbol always replaces the same letter, while in complicated ciphers, which are currently in use, the same symbol and number replace a different letter each time.

Codes:
It consists of symbols, words, or groups of letters chosen to represent or express other words. One word could have several meanings, or could represent a complete sentence, or could be a long paragraph according to the system used.

Scientists have proved that the ancient Egyptians, Jews, Greeks and Romans used ciphers and code. [They were also used] during the Middle Ages, simple though they may have been, like simply putting every letter in the place of the letter that followed it in a specific arrangement of the alphabet. Specific letters only might have been substituted. Secret writing developed and took on more complicated forms. America entered World War II because of a secret message that fell into the hands of British Intelligence in 1937, which was sent by the German Foreign Minister (Zimmermann) to the German Ambassador to Mexico. The British learned from the deciphered letter that the Germans were planning to wage all-out submarine warfare. The letter contained a proposal that Mexico enter the war on the side of the Germans, with the provision that after the victory, Mexico would acquire Texas, Arizona, and New Mexico. The British Foreign Minister (Balfour) turned the letter over to the American Ambassador in London, who in turn passed it on to the White House, which confirmed the authenticity of the letter [by checking] the [original] ciphered letter and correlating it with the code. Consequently, America entered the war against Germany.

Both Roosevelt and Churchill escaped death because of a German translator’s ignorance. He was deciphering an enciphered message in Spanish. Both Roosevelt and Churchill had agreed to meet in Casablanca in 1943. Spanish spies in Washington learned of the news, and they sent
this in an enciphered message to Hitler. The German translator received it for deciphering, and he read the name as two words: (Casa), which means (house), and (Blanca), which means (white). So he translated the message that Churchill and Roosevelt were going to meet in the White House. German aircraft were not able to penetrate American air space, and both Churchill and Roosevelt escaped.

Editor’s Comment: An interesting history of codes and ciphers going back to ancient history, with two fascinating anecdotes with relationship to World War II. But what is the utility of this for the agent in training? It would seem rather to reflect the expertise in the history of espionage of the author, which periodically he somewhat excessively demonstrates.

Types of Ciphers and Codes:

1. Enciphering with coordinates.
2. Enciphering with symbols and words.
3. Enciphering books, newspapers, and magazines.

Secret writing must have two important elements without which it is not a true cipher. They are:

1. **The First Element:** It must have a general system on which the sender and receivers agree, and it is normally a fixed [system].

2. **The Second Element:** There must be a special key which changes from time to time. The cipher key may be composed of a number or group of numbers. It could also be composed of a word, an expression, or a sentence according to what was agreed upon among the correspondents. This key is used to decode the cipher, and is what dictates the steps required to encipher any secret letter. There are a few other elements which secret writing must have, though less important than the two previously mentioned elements.

The message must be short, sharply delineated, and understandable.

The key must be changed periodically, so that the enemy does not obtain it and [thereby be able to] read all the messages.
Types of Ciphers and Codes and How to Use Them:

The Numeric Method:

There are 28 letters in the Arabic language; they are found in this verse: 
((ABJD ?W; HUI KLMN S"FX QR:T COZ VYG))

Each letter is replaced by a number, and it is not necessary for the numbers to be sequential. That is, we separate one number from the following one. Example: A=1, B=6, J=20 etc.

The important thing is that the other side (the receiver) be aware of that. It is also possible to change the verse with another one: ((ABJD ?W; HUI KLMN S"FX QR:T COZ VYG))

Example:

QAM ALAOW? BQTL REIS ALJM?WRI?
[The brothers killed the President of the Republic.]
Another Numeric Method:

There is another method by which we can encipher using digits as follows: We leave out the numbers (8, 9, 0) from the numbers used in the cipher.

<table>
<thead>
<tr>
<th>A</th>
<th>B</th>
<th>T</th>
<th>C</th>
<th>J</th>
<th>H</th>
<th>O</th>

</tr>
<tr>
<td>34</td>
<td>35</td>
<td>36</td>
<td>37</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Notice that this cipher could be used over the telephone or radio, but it wouldn’t be good for letters because they could be discovered too easily.

**Important Note:**

Some may ask how a brother (the receiver) can know what the sender wants, when he sends a letter with nothing but numbers placed next to each other. Like in the previous example: QAM ALAOW? BQTL REIS ALJM? WRI? [The brothers killed the President of the Republic.]

530400105603501803014005060030025108001501601300

We say that it is possible, as we mentioned in the second method to eliminate some numbers and use them as separators, between numbers.

**Example:**

We eliminate the numbers like (8, 9, 0) from them, and we choose the number 5, for example. An example of the second method: QAM ALAOW? BQTL W;IR ALDAOLI? [The brothers killed the Minister of the Interior.]

<table>
<thead>
<tr>
<th>Term</th>
<th>Key Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>QAM</td>
<td>Q=27, A=1, M=33</td>
</tr>
<tr>
<td>BQTL</td>
<td>B=2, Q=27, C=3 [sic], L=32</td>
</tr>
</tbody>
</table>
W:IR
W=36
:=14
I=37
R=13

DAOLI?
A=1
L=32
D=11
A=1
O=7
L=32
I=37
?=35

3537327111321133714363232723536732133127
When we put the number ((0)) to separate between the letters, it would be as follows:
370320701011032010130370140360320302702035036070320103301027035
To complicate the cipher somewhat, we would put the numbers (9, 8, 0) as separators in one method.
The method of symbols and numbers: We separate the letters of the alphabet into a number of groups, and each group is composed of a number of digits.

Example:
It is possible to make six groups, and so each group will be composed of five numbers, except for the last group, which would have only four [sic] numbers.
Then we give every group a symbol.

<table>
<thead>
<tr>
<th>Sixth Group</th>
<th>Fifth Group</th>
<th>Fourth Group</th>
<th>Third Group</th>
<th>Second Group</th>
<th>First Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>IW? 321</td>
<td>NMLKQ 54321</td>
<td>FG“YU 54321</td>
<td>VX:S; 54321</td>
<td>RZDOH 54321</td>
<td>JCTBA 54321</td>
</tr>
</tbody>
</table>

Then after that, every group has a specific symbol, and every letter in the group has a specific number, so the cipher will be as follows:

<table>
<thead>
<tr>
<th>Sixth Group</th>
<th>Fifth Group</th>
<th>Fourth Group</th>
<th>Third Group</th>
<th>Second Group</th>
<th>First Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>_</td>
<td>_</td>
<td>_</td>
<td>_</td>
<td>0</td>
<td>i</td>
</tr>
</tbody>
</table>

Example:
Form the following sentence by means of this cipher:

AL?JWM ALSA”” ALSAB”” XBAHA
[The attack will be at seven in the morning.]

AL?JWM 1 i 3 _ 1 _ 5 i 2 _ 4 _
ALSA”” 1 i 3 _ 2 _ 1 i 3 _ 1 _
ALSAB”” 1 i 3 _ 2 _ 1 i 2 i 3 _ 1 _
XBAHA 4 _ 2 i 1 i 1 o 1 i

The message would be formed as follows:

1 i 3 _ 1 _ 5 i 2 _ 4 _ 1 i 3 _ 2 _ 1 i 3 _ 1 _ 1 i 3 _ 2 _ 1 i 2 i 3 _ 1 _ 4 _ 2 i 1 i 1 o 1 i
In order not to mix up the letters when decoding the cipher, it is possible to choose a symbol other than the symbols present. It is possible to choose the symbol (for example) □ a circle with a dot in it, to separate one word from another.

Another method for symbols and numbers: For this, we use seven circles, and each circle contains four letters, as follows:

<table>
<thead>
<tr>
<th>(6)</th>
<th>(5)</th>
<th>(4)</th>
<th>(3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>K</td>
<td>Q</td>
<td>&quot;</td>
<td>Y</td>
</tr>
<tr>
<td>M</td>
<td>L</td>
<td>F</td>
<td>G</td>
</tr>
<tr>
<td>X</td>
<td>:</td>
<td>U</td>
<td>V</td>
</tr>
<tr>
<td>R</td>
<td>Z</td>
<td>S</td>
<td>;</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>(2)</th>
<th>(1)</th>
<th>(7)</th>
</tr>
</thead>
<tbody>
<tr>
<td>H</td>
<td>J</td>
<td>?</td>
</tr>
<tr>
<td>D</td>
<td>O</td>
<td>N</td>
</tr>
<tr>
<td>B</td>
<td>A</td>
<td>C</td>
</tr>
<tr>
<td>T</td>
<td></td>
<td>I</td>
</tr>
</tbody>
</table>

**Example:**

AQTL ?ZA ALUAGWT [Kill this devil.]

AQTL [See original for symbols.]

?ZA [See original for symbols.]

ALUAGWT [See original for symbols.]

In order for one to know the context of the message, it would be sent to (the receiver) as follows:

[See the original Arabic text for the symbols.]

It is possible to separate between each word and the one that follows it by placing a specific symbol between each word (other than a symbol already present.)
The Letter Method:

There are 28 letters in the Arabic language. We eliminate (3) letters from the (28) letters, and (by way of example) the letters we eliminate are (C-G-Z), and so we have a chart with (5) groups containing (25) letters as follows:

<table>
<thead>
<tr>
<th>M</th>
<th>“</th>
<th>O</th>
<th>A</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>F</td>
<td>X</td>
<td>D</td>
</tr>
<tr>
<td>?</td>
<td>Q</td>
<td>V</td>
<td>R</td>
</tr>
<tr>
<td>W</td>
<td>K</td>
<td>U</td>
<td>;</td>
</tr>
<tr>
<td>I</td>
<td>L</td>
<td>Y</td>
<td>S</td>
</tr>
</tbody>
</table>

Note: the Arrows found to the right of the chart indicate that we must take the last horizontal letter. [See original for arrows.]

Example:

If we had a word composed of a number of letters like (KAN), when enciphering, the first letter (K) would be (WL). That is, for this letter (K), when enciphering, there would be (two letters), one horizontal letter and the other would be the vertical. The horizontal would be the (W), and the vertical would be the (L), and the rest of the letters of the word (KAN) would be done the same way. If the last letter of the schedule were needed, like (H), then in this case, we would encipher the (H) as follows: (IA). If it were the letter (N), we would encipher it as follows: (BI) and so forth.

Example:

AQTL ?ZA ALUAGWT [Kill this devil.]

AQTL
A=MH
Q=?L
T=?H
L=I’
?ZA
?=TI
Z=Not found on the chart so we [exchange] the letter (D) for it, and when the cipher is broken, the true letter is understood from the meaning of the word, and so it would be thus: Z=NS
A=M[H]

ALUAGWT
A=MH
L=I”
U=WY
A=MH
G=Is also not found in the chart, so we deal with it as if it is an(“), and when the cipher is broken, put it in its original form (G) G=ML
W=JI
T=?H

The enciphered sentence would be as follows:
MH?L?HI”TINSMHMHI”WYMHLJI?H.

We must use one of the three letters that were cancelled (C-G-Z) to separate between each word from the [following] one.

Note:
It would be incorrect to use this chart the same way as the previous one, because it is [too easy] for an enemy to figure out the context of the message and its cipher. Therefore, we make a specific key for this chart, which no one knows except for the (sender) and the (receiver).

An Example of the Key:
The sender and receiver may agree that the key to the cipher (the table) [be] a word or a name: ABW ALFRJ (for example), and so the cipher table would be as follows:
Note:
We took [something] away from the word [ABW ALFRJ] ABW LFRJ. We removed the Alef [A] found in ALFRJ, [therefore] the word was: ABW LFRJ, and after writing it in the cipher key (ABW ALFRJ), we write the 25 letters of the alphabet that we know, noticing that we have removed the letters which were written in the key (ABW ALFRJ) [sic] as in the previous table.

Example:
AQTL ?ZA ALUAGWU [Kill this devil.]

Solution:

AQTL
A=“F
Q=B?
T=B?
T=“Z
L=NF

?ZA
?=F”
Z=We treat it as if it is a D=N;
A=“F

ALUAGWT
A=“F
L=NF
A=“F
G=We treat it as if it is a “=?A
W=KF
T=“Z

Therefore the cipher comes out as follows:
“FB?”;NFF”N;”F”FNFNY”F?AKF”;Z

Then we need to insert one of the three letters (C-G-Z) between each enciphered word, so that the letters don’t get mixed up with each other. Consequently, as an example we choose the letter (Z), and then the cipher (the enciphered letter would be as follows:)
“FB?”;NFZF”N;”FZ”FNF”F?AKF”;Z

There will not be any mistake when the (receiver) begins decoding the cipher, because he knows that for each actual letter, there are two enciphered letters. [He also knows] that between each word and the one which follows it there is one of the three letters (Z-C-G).

Important Note:

1. It is possible to write the secret word (the key to the table) either horizontally or vertically.

2. It is possible when enciphering using the previous table to choose one of the following methods:
   a. The table could use a descending-descending system [two arrows down].
   b. The table could use an ascending-ascending system [two arrows up].
   c. The table could use a descending-ascending system and the opposite [an arrow up and another arrow down].

However, both sides must be aware of this (the sender-the receiver).

If it happens that any numbers appear in the message while we are using a letter cipher, then we begin, for example, by writing the numbers (1-2-3.....) with letters (WAHD-ACNIN-CLAC?) [One-two-three.......]
Note that we do not write ACNIN or CLAC? because we have eliminated the letter ( C ) from the table.

To complicate the cipher we scramble the letters and [make] them uncomplicated in the table.

To [also] complicate the cipher, we can exchange the letter with the one above it, and while decoding it, the receiver takes the letter that is below it. On the other hand, the letter below it can be written and when decoding it, the letter above is taken.

The coordinates method: In order to devise a cipher with this method, we make a table in which every letter in the alphabet corresponds to a number in the vertical column and a letter in the horizontal row, and in the table we write the (25) letters as follows:

<table>
<thead>
<tr>
<th>5</th>
<th>4</th>
<th>3</th>
<th>2</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>M</td>
<td>“</td>
<td>:</td>
<td>O</td>
<td>A</td>
</tr>
<tr>
<td>N</td>
<td>F</td>
<td>X</td>
<td>D</td>
<td>B</td>
</tr>
<tr>
<td>?</td>
<td>Q</td>
<td>V</td>
<td>R</td>
<td>T</td>
</tr>
<tr>
<td>W</td>
<td>K</td>
<td>U</td>
<td>;</td>
<td>J</td>
</tr>
<tr>
<td>I</td>
<td>L</td>
<td>Y</td>
<td>S</td>
<td>H</td>
</tr>
</tbody>
</table>

Note that we have eliminated the three letters (C-Z-G).

**Observation:**

This cipher (enciphered table) is very easy for any average person to break or solve; therefore it must be made more complicated.

**How to complicate it:**

1. Scramble the (25) letters of the alphabet in the table without any sequence.

2. Leave some squares in the table blank for subterfuge or for any contingency.
3. Instead of writing the coordinates of the desired letter, we write the coordinates for the letter above it, and when the receiver breaks it, he takes the lower letter. It is also possible to write the lower letter, and when breaking take the letter above.

Enciphering using coordinates is as follows:

<table>
<thead>
<tr>
<th>96</th>
<th>70</th>
<th>34</th>
<th>32</th>
<th>20</th>
<th>9</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>H</td>
<td>K</td>
<td></td>
<td></td>
<td>K</td>
</tr>
<tr>
<td>?</td>
<td>L</td>
<td>J</td>
<td>O</td>
<td>W</td>
<td>R</td>
</tr>
<tr>
<td>T</td>
<td>Q</td>
<td>D</td>
<td>M</td>
<td></td>
<td></td>
</tr>
<tr>
<td>I</td>
<td>B</td>
<td>A</td>
<td>R</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Y</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>F</td>
<td></td>
<td>:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>M</td>
<td>V</td>
<td>U</td>
<td>I</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The key of the cipher is KRM ;?DI [Karem Zouhdi] (May God release him).

**Example:**

AST:?D AHD ALAOW? MN :D? ALT“ZIB [One of the martyrs died due to the severe torture.]

**Solution:**

**AST:?D**

A=M32
S=M9
T=R70
:=?32
?=M96
D=R9
**AHD**

A=M32  
H=D32  
D=R9

**ALAOW?**

A=M32  
L=K70  
A=M32  
O=K20  
W=D9  
?=M96

**MN**

M=D96  
N=D70

**:D?**

:=?32  
D=R9  
?=M96

**ALT”ZIB**

A=M32  
L=K70  
T=R70  
“=;34  
Z=We substitute with a D=R9  
T=R70

Observe that when we began enciphering the sentence (AST:?D AHD ALAOW? THT ALT”ZIB) [One of the brothers died under torture], we took the letter from above (we didn’t use the actual letter), and the brother who receives it must take the letter from beneath while deciphering letter).
Likewise there is in the word (ALT"ZIB) the letter (Z), and it was one of the letters we dropped (Z-C-G). Therefore, we took in its place a similar letter, the (D), and the receiver would know that from the meaning of the word.

There are also letters which did not have any [others] above or below, like the (K-H-N-?-W). Therefore, we apply the same steps which were followed. We look for the letter which is above it, so for example, with the letter (K), the letter (U) is considered higher than it. With the letter (W), the letter S is considered higher than it, and so forth.

Editor’s Comment: This is a thorough exposition of basic cryptography. But this discussion would seem to require a higher level of education/intelligence, in contrast to some of the other tradecraft instructions which seem to be directed at a very basic level for uneducated and unsophisticated recruits.
Fourteenth Lesson:  
Kidnapping and Assassinations 
Using Rifles and Pistols

Introduction to Pistols:
The pistol was invented in the fifteenth century A.D., and it is now merely in the most recent of its phases of development. 

At the beginning, pistols were made by hand in various sizes. They were fired using a gunpowder fuse which ignited the gunpowder charge, thrusting the bullet forward through the barrel. 

The pistol underwent long phases of development until one called “the revolver” was produced. The credit for making it popular goes to Samuel Colt, but it would be a mistake to consider him the inventor of this pistol, because he was not an expert in weapons. Rather, he was very wealthy and he expended his wealth to satisfy his desire to acquire weapons. He produced the first revolver in 1835. It was made by hand, and then by machines in large quantities.

Innovations [continued] developing until the automatic pistol designed by an Austrian appeared in 1883 A.D. Thirteen years later in 1896 another pistol came on the scene called the “Mauzer,” which is still in use to this day.

A larger number of pistols have appeared, and there are still continuous developments and innovations. Pistol manufacturers prefer the automatic pistol over the revolver, which has largely fallen into disuse.

Editor’s Comment: Like the history of the rifle, later in the chapter, this history is reminiscent of the history of ciphers discussed earlier, and reads as if taken out of a military encyclopedia.
The Characteristics and Shortcomings of the Revolver and Automatic Pistol:

Characteristics of the Automatic-action Pistol:

We would call a pistol an automatic when there is more than one mechanical movement taking place. When the pistol is fired, it returns the moving components to the rear, expels the empty cartridge, and loads a new round in its firing chamber. This continues until the magazine is empty.

It is likewise possible to call a pistol a semi-automatic, according to the type of firing when it fires one round at a time.

Its characteristics are:

1. The magazine holds a number of rounds (from 8-16). *Review the memorandum, “All about Handguns”, in detail. The spare bullets for this pistol are in the reserve magazine.
2. It only takes a short time to load it.
3. It can be concealed easily because of its small size.
4. Its projectile has great acceleration, which makes it more accurate.

Shortcomings of the Automatic Pistol:

1. The necessity of using both hands when loading.
2. In case of an unexpected malfunction, like a round being jammed, both hands must be used to correct it because of its complicated mechanism.
3. It requires a safety device to ensure that accidents are avoided.
4. It is not suitable for firing from the holster because of its mechanical action, since after it is fired, the components that are pushed forward and expel the bullet through the barrel, return to the rear, and as they return, the empty cartridge is expelled, then the components move forward carrying a new round. The holster is small and doesn’t allow the components to return to the rear, and
could block the way of the empty cartridge, whereby the action malfunctions.

5. It can’t use any bullets other than those specified for it, because other bullets could have a large charge of gunpowder. Therefore, upon firing, the greater thrust of gas would push the components to the rear with greater force than they can bear, and so perhaps after firing once or twice, the pistol could break in two.

Characteristics of the Revolver:

1. The shooter doesn’t need a lot of motion to cock it, since it is sufficient to press the hammer, and the chamber revolves to load and cock the pistol.

2. A malfunction, like a jammed bullet, does not prevent one from continuing to fire.

3. The revolver rarely malfunctions.

4. It doesn’t need a special safety device, and even if it did have one, it wouldn’t hinder the action of the hammer.

5. It is preferable for assassinations because the empty shells are kept inside, making it difficult for investigators to determine the location from which the pistol was fired. It also makes it difficult to determine the type of pistol used.

Shortcomings of the Revolver:

1. Most models are large and bulky, especially older ones.

2. It takes a relatively long time to load it.

3. It leaks and loses some gas between the chamber and barrel when it fires, which slows the bullet down and causes it to fall short.

4. The velocity of the bullet from a revolver is slower than that of an automatic.

5. The cylinder does not hold many rounds, since it can only hold five or six bullets.
Holding the Pistol with Both Hands or with One Hand:

Many ask: Should the pistol be held with both hands or with one hand? The answer is that the type of firing determines whether to hold the pistol with one hand or both.

Therefore, if you are in a defensive situation where an adversary appears by surprise, pull your gun from the holster and fire at him right away one-handed without aiming.

Conversely, if you are attacking or ambushing an adversary, you should hold the pistol with both hands, because:

1. Holding the pistol with both hands decreases the recoil.
2. Holding the pistol with both hands: The strong dominant hand pushes the pistol forward and the other pulls to the rear with the same force, thus making a firm grip on it.
3. Using both hands prevents them from trembling or shaking and thus the pistol also.
4. Hold the pistol with both hands to be steady and firm, especially when firing several shots, so you won’t be forced to adjust your grip on the pistol.

How to Correctly Hold an Automatic Pistol

1. Your right thumb that grips the pistol should be above the locking device and not beneath it, and it should be on the left side of the pistol, so that it doesn’t push the locking device inside the groove of the upper part and cause the mechanical movement to malfunction.
2. The fleshy part between the thumb and index finger of the right hand holding the pistol should be behind and beneath the [moving] parts, so as not to disturb them with your hand when moving; the pistol should be centered vertically in the palm of the hand.
3. The index finger should be around the trigger, and the rest should be on the pistol grip.
4. The left thumb should be centered on the right thumb, and both of them should be centered on the locking device, neither [too] tight or [too] loose but with a medium [grip]. The other fingers of the left hand should be on the grip over the fingers of the right hand and intertwined with them to control the grip on the pistol.

5. Don’t leave any space between your hand and the pistol, but control your grip on it. It should not be part of you, so don’t grip it too hard, because that will affect the nerves and muscles which could cause the hand to waiver and make the shot miss.

See the drawing below:

[Picture of a pistol with the caption:]

The locking device, located on the lower part

The mechanical action could malfunction while firing, as shown in the drawing, because the thumb is too close to the lower locking device. Therefore, perhaps because of a [grip] that’s too firm, the thumb presses the locking device on the lower part of the pistol inside the groove of the upper part, causing the mechanical action to malfunction while firing.

Another Way to Hold the Pistol with Both Hands

1. The right thumb gripping the pistol should be slightly above the magazine holder.
2. The left thumb should be centered over the right thumb, and we follow the remaining four steps in the first method.
3. We follow the previous steps in the first method.

Observe the following drawing:

[Drawing with caption saying:]

Holding the pistol with both hands. Notice that the right thumb is slightly above the magazine holder, and the left thumb is over it. Holding the pistol and firing it with the right hand.
A Third Way to Hold a Pistol with Both Hands:
We follow all the steps of the second method, but the left index finger is on the trigger guard.

Observe the following drawing

A Fourth Method of Holding an Automatic Pistol with Both Hands:
We follow all the steps of holding a pistol with the right hand (any of the previous methods), but the left hand is placed under the butt of the gun for balance.

Observe the following drawing

A Method to Hold an Automatic Pistol with One Hand
1. We follow the previously mentioned steps whereby the right thumb is slightly above the magazine holder, and if we were to use the second method, it would be a good grip.

2. The fleshy part of the hand between the thumb and the index finger should be behind and below the moving parts to avoid disturbing them with your hand while moving.

3. The index finger is inside the trigger guard or over it with the rest on the pistol grip.

Observe the following drawing

Gripping the automatic pistol with one hand. Notice the placement of the right thumb. (The right thumb is slightly above the magazine holder)
The Al-Qaeda Training Manual . . . 129

The Proper Way to Hold a Revolver

1. The right thumb and the other three fingers except for the index finger should be holding the grip around the bottom (butt of the pistol) firmly and evenly to ensure that the pistol doesn’t move while firing. The index finger should be on the trigger or outside [the guard].

2. The second grip should be with the same method used to hold the automatic pistol. However, there is a slight difference; the right and left thumbs are firmly set one above the other.

Important Note:

Some people place the left thumb over the right hand to push the hammer to the rear with it.

This method is only used with the revolver because it is assembled with parts that move to the rear. It’s impossible to use this method with an automatic pistol because it’s too hard on the shooter’s hand since the parts the automatic pistol move across the barrel to the rear after firing and discharging the shell, and during [this action], they could cut off the brother’s finger or severely injure it.

Observe the following drawings of revolvers:

[Drawing of a revolver with the following caption:]

The second method must be the same as that used to hold an automatic pistol, but there is a slight difference; it is that the two thumbs are held firmly next to one another.

[Drawing of a revolver with the following caption:]

Notice that the thumb and three other fingers hold the grip around the butt firmly and evenly to avoid moving the pistol when firing continuously. The index finger must be on the trigger from the first shot.

[Drawing of a revolver with the following caption:]

Some put the left thumb over the right hand to pull the hammer to the rear. This method should not be used with an automatic pistol, but it is fine for the revolver because it isn’t assembled with [moving] parts.
Introduction to Rifles:

The rifle developed significantly during World War II, when combatants used bolt action rifles. A few years after the war, the Soviets began producing a famous automatic rifle called the Kalashnikov, which uses 7.62 mm rounds. Then the Americans produced a rifle called the “Armalite,” which uses a 5.6 mm round, while the British produced the “Infield” rifle. Italy produced the “Beretta,” and Germany produced the “Heckler and Koch” rifle. Belgium produced the “SIG” rifle, and Spain produced the “Cetme.” All of these were 7.62 caliber rifles.

Developments and innovations continue to be made in the production of lightweight small rifles.

The Kalashnikov is still the best and most famous rifle used in the field since World War II. It was designed by Mikhail Kalashnikov, who was born in 1920 in Siberia. He entered the Soviet armed forces in 1939 and was seriously wounded, for which he received the Red Star Medal.

The design of the first Kalashnikov, the AK47, was influenced by a German rifle which he [Kalashnikov] came across while he was in the hospital. He was also influenced by a Soviet automatic weapon, the “BBS” machine gun.

Kalashnikov developed and improved upon his rifle and presented it to the Inspection Commission of the Defense Ministry in Moscow, which recommended using this 7.62 mm rifle.

In 1935 a modification was made to the design of the first rifle, the “AK47”, and the automatic “AK10” rifle was produced according to design modification. The production of the Kalashnikov spread to the arsenals of several former Warsaw Pact countries. The number of pieces produced or used is estimated at ten to twenty million.
The Kalashnikov is still competitive with the American M-16 which, was designed in 1964 and was brought into service in the mid sixties.

*Review the Kalashnikov lesson in detail.

**Principles and Rules of Aiming**

Most aiming mistakes are due to physical stress or nerves, which cause the hand to tremble and shake. It could be caused by putting excessive pressure on the trigger and by pulling the trigger rather than squeezing it, causing the pistol’s muzzle to swerve from the target.

Therefore, the following considerations are necessary when aiming and shooting:

1. Control yourself while squeezing the trigger so as to not shake the pistol.
2. Squeeze the trigger without too much force, and don’t pull the trigger because this will cause the pistol’s muzzle to dip down.
3. Don’t let the sound of the round discharging or the explosion affect you, and don’t focus on anticipating the sound of the explosion because this will cause unconscious trembling in your hand and the pistol.
4. The body should be normal, not tense, and the joints relaxed; not too tight, and not too loose.
5. When firing, let the crosspiece of your sight drop to the top of the bead and the front sight to the center of the target; that is, there must be four [objects]: the right eye, the center of the sight housing, the bead on the front sight, and the center of the target must be lined up and fire the pistol at the center of the target. This applies when you are close to the target and gravity does not affect the bullet. With rifles and when not at short range, fire low [sic] and at the center of the target.
6. Close the left eye while firing if you are firing with the right hand, and vice versa [with the left].
7. Don’t take too long while aiming so your nerves don’t shake.
Important Notes:

1. If the round hits above the target, this means that you are holding the pistol grip too firmly.

2. If the round hits to the right of the target, this means that you are gripping the pistol too tightly, which results in pulling the pistol to the right because it is pressing against the other grip from nervousness.

3. If the round hits left of the target the opposite is true.

4. If the round hits below the target; it the result of nervousness when trying to fire and aim [at the target].

Critical Parts of the Body

The shooter must know the lethal parts of the body or [where to] seriously wound, in order to fire at these spots on the person he wants to assassinate. They are:

1. The circle comprising the two eyes, nose, and mouth is a lethal area, and the shooter should not aim above, to the left, or to the right of this area lest the round glance off.

2. The part of the neck where the veins and arteries come together.

3. The heart, and this is the lethal part.

4. The stomach

5. The liver

6. The kidneys

7. The spinal column

Examples of Types of Assassinations:

Elementary Operations: Crossing the Street:

1. The target is on his way to work via public transportation.

2. The moment he crosses the street to get to the bus stop or to the main thoroughfare, the assassins, “two people” riding a
motorcycle, open fire on the target and get away quickly in the opposite direction of the traffic.

**An Actual Example of an Assassination when the Target is crossing the Street**

This operation took place on 3/22/1948 AD in Egypt. Al-Khazander, a puppet judge who viewed the English presence in Egypt as legal, was the person assassinated. Al-Khazander had been issuing severe sentences against personnel in the covert branch of the Muslim Brotherhood [Al-Akhwan Al-Muslimin] who were involved in bombing operations. The “Al-Khazander Assassination” operation [occurred] during the Christmas bombings.

1. The choice fell to both Hassan Abdel Hafez and Mahmoud Saeid to assassinate Al-Khazander. They were from the covert branch of the Al-Akhwan Al-Muslimin, which at that time was headed by Abdel Rahman Al-Sandi.

2. Al-Khazander was surveyed for a period days, and it was learned that he went to the court at Bab Al-Khalaq in Cairo and returned to Helwan via public transportation. They went ahead to the railroad station in Helwan, [and took] the train from Hulwan to Bab Al-Khalaq and then other public transportation.

3. They made the plan as follows:

   The assassins, Abdul Hafez and Mahmoud Saeid, were waiting for Al-Khazander when he was leaving his house, and Hassan assassinated him with a pistol while Mahmoud was standing guard and protecting him with a pistol and percussion bombs as he got away. They escaped to the home of Abdul Rahman Al-Sandi, the chief of the organization.

   After Al-Khazander left his house, walking resolutely, Hassan Abdul Hafez approached him and fired several rounds which did not hit Al-Khazander. When Mahmoud Saeid saw that, he left his place, approached Al-Khazander, seized him, threw him to the ground, and emptied several rounds into him. He and his companion left [the victim] and departed.
Hassan Abdul Hafez and Mahmoud Saeid were caught because of several mistakes.

**The Errors which Hassan and Mahmoud Committed were as follows:**

1. There was no car or motorcycle with which to flee after executing the operation.
2. They did not anticipate the possibility of a chase after the operation. They didn’t notice that the operation was carried out near the Helwan Police Department.
3. They had no training with the pistol, as evidenced by Hassan’s inability to kill Al-Khazander in spite of his proximity to him.
4. The agreement to meet after executing the operation at the home of the chief of the Covert Branch of the Brotherhood was a fatal error.
5. After police cars began pursuing them, the brothers fled to the mountain [called] “Al-Muqattam” Mountain, which was not suitable for evading [pursuit].

*Editor’s Comment: As with examples that follow, this compendium of errors in the above assassination reflects a characteristic of the manual in general, namely a continuing examination of operations to learn of positive and negative features, vulnerabilities and mistakes in order to profit from them and improve the organization’s functioning, truly a characteristic of a learning organization, and a contribution to Al-Qaeda’s effectiveness as an organization.*

**The Second Operation: Blocking the way of the Target’s Car**

1. The target goes to work in his own automobile, which comes to get him in the morning and brings him back after work is over. A driver operates the car and the target’s bodyguard sits beside the driver.
2. The group of assassins, composed of three or four people, wait for the target’s car. The waiting place should allow the assassins’ car freedom of movement at any time.
3. The assassins’ car departs upon sighting the target’s car and proceeds slowly until it comes to a spot which would allow it to block the way in front of the target’s car. It then immediately stops, blocking the target’s car.

4. At the instant the assassins’ car stops, the personnel in charge of killing or kidnapping the target get out, kill the bodyguard and the driver, and then execute their mission.

5. This operation requires the utmost speed within a short time to avoid any one pursuing the assassins’ car or seeing any of the brothers.

Observations:

1. It is best that one of the brothers participating in the assassination or kidnapping fire at the automobile’s tires so that it can not evade or run away.

2. Most of the brothers participating in the operation should be very skilled drivers to avoid problems if the driver is wounded or killed.

An Actual Example of an Assassination by Blocking the Target’s Path:

Members of the Egyptian Revolution Organization* decided to assassinate a high-ranking Israeli living in Cairo.

*The Egyptian Revolution Organization: An Organization, which followed Nasser ([and which he] Jamal Abdel Nasser deified), executed its first assassination in 1984 and the last in 1987. It undertook four assassinations of Jews or Americans in Cairo, and Egyptian Security as well as Israeli and American intelligence were not able to….

[Translator’s Note: The rest of this page is cut off. The list starts at #2 on the following page]

2. Surveillance of the target was carried out for a period of time. The exits and entrances to the theater of operations were studied. The time was set to execute the operation at eight am 8/20/85, when the Israeli target would leave for work at the Israeli Embassy in Cairo.
3. A car was purchased for use in the operation. Someone’s identification was purchased indirectly, the photo was removed, and that of one of the organization’s members was put [in its place.]

4. The organization members participating in the operation (there were four of them) rode in a car belonging to one of them. They put their weapons in the car (they had hidden their weapons in tennis racket covers.) Before arriving at the theater of operations, they left that car and got into the operations vehicle, which was close to the site of the operation.

5. After riding in the car, it became apparent the car was not in good running order, and had leaked a lot of oil, so they decided to delay the operation.

6. While they were returning in the car in poor condition, they saw a man from the Israeli Mosad, and the operation leader decided to kill him. The Israeli Mossad man was riding in a car with two Israeli women with him.

7. The Assassins’ car drove behind the Israeli target’s car, which noticed the surveillance in the rear view mirror, but the driver of the assassins’ car was able to choke off the Mossad man’s car and he wasn’t able to escape. They blocked his way and forced him over by the curb.

8. One of the four personnel got out of the car and emptied the magazine of his American rifle in the direction of the Mossad man. The second one got out on the other side and emptied his bullets, and the third did likewise. After executing the operation, they fled to the other car, and left the operations car on the street.

9. After a period of time, the police force came and found the car with traces of blood.

[It was not] known that the crime was committed by the organization until one of its members (the brother of the organization’s leader) turned himself in to the American Embassy and disclosed all the secrets of the operation which the Egyptian Revolution Organization undertook.
Positive [Aspects]
1. The assassins killed an Israeli person they found on the way back.
2. The purchase of a car just for the operation and a counterfeit identification.
3. Concealing the weapons in tennis racket covers.
4. Choosing a good method to stop the Israeli Mosad man’s car.

Negative [Aspects]
1. Failure to inspect the car prepared for the operation with sufficient time before the execution.
2. Undertaking the operation even though the car was malfunctioning, which could have broken down and failed to run after executing the operation.
3. Failure to remove the traces of blood found on the car.

The Third Operation: The Entrance to a Building:
1. The Assassins’ car is parked in a location near to the target’s building.
2. When the target gets out of the car or exits from the building, the assassins open fire upon him, the bodyguard, and the driver who is opening the car door for him.
3. Run away immediately or ride the car or motorcycle which is prepared for an immediate get away.

An Actual Example of an Assassination at the Entrance to a Building (Assassination Attempt on the Former Minister of the Interior, Hassan Abu Basha):
A group from the Islamic organization called “[Those who have] escaped the Fire” composed of three people waited for the previous Minister of the Interior, Hassan Abu Basha’s car in a location near the entrance to the building.
When Abu Basha arrived, and as soon as he got out of the car, two of the brothers opened fire on him over the cabin of their vehicle (pick-up).

1. Abu Basha threw himself between his car and another car parked nearby as soon as they opened fire. As a result of this incident, the minister was paralyzed in half [of his body].
2. The brothers fled after the incident took place, and they took their car in the opposite direction of the flow of traffic.

Important Observations:
When the brothers went to the location near Abu Basha, they hadn’t gone to kill him but to do reconnaissance (gather information on him).

1. One of the brothers was bearded while doing the reconnaissance.
2. The brothers were armed while gathering information about the minister.
3. There was no established plan for the assassination.

The Fourth Operation: While Going To or From Work:

1. The target is going to work in his own car, and he has a driver and a bodyguard.
2. The assassins lie in wait for the target in a certain place while he is going to or from work.
3. When the assassins see the target’s car approaching, they take their places.
4. The car’s tires, the bodyguard, driver, and target are hit.

An Actual Example of an Assassination While the Target is Going to Work: (The Assassination of Rif’at El-Mahgoub))

1. The brothers began surveillance of all the Interior Minister – Abdul Halim Mousa’s movements, from his departing his house until entering the ministry. The surveillance lasted several weeks.
2. Friday morning was set for the execution of the operation where the minister heads to work.
3. Exactly at ten in the morning the brothers were fully prepared. An observer was going to give a signal to the brothers when the minister’s car departed from his house.

4. When the convoy reached the specified location of the operation (the operations stage), bullets were sprayed from all directions on the private car in front of him and on the escort vehicle.

5. The brothers approached the car after firing at the tires to confirm that the minister was dead. The brothers did not find the Minister of the Interior, but they did find Rif’at El-Mahgoub, Head of the People’s Assembly, dead inside the car. [Translator’s Note: Similar to our Speaker of the House]

6. This was a startling situation. The two convoys (the Interior Minister’s convoy and that of the Head of the People’s Assembly) were separated by only about seven minutes. After about seven minutes the Minister of the Interior arrived at the location of the incident.

7. The brothers who were participating in the operation (four brothers to execute the assassination and two to drive the motorcade) had only two motorcycles (three people to each motorcycle), and after executing the operation, one of the two motorcycles fled and the other broke down, and after a moment they left that motorcycle behind.

8. When the motorcycle broke down, one of the brothers fled on foot, carrying his weapon in the opposite direction of the cars. He stopped a taxi and threatened the driver with his weapon, and then rode with him. During the drive, a police officer (a general in the police force) stopped the car, supposing that the armed man was just a thief. He opened the door to arrest him, but the brother put the rifle to his chest and emptied a burst of rounds into it and the officer fell to the ground like a slain bull. It came to light afterwards, that this officer was one of the criminals who used to torture the brothers in some neighborhoods of Cairo.
Fifteenth Lesson:
Assassination Using Explosives

Editor’s Comment: In the following discussion of the use of explosives in assassinations, the degree of attention paid to details is, as with the above sections, meticulous and impressive. There is moreover a systematic orderly exposition that reflects a very careful attention to detail, of an obsessive character consistent with a healthy compulsive personality.

Introduction:
Explosives are believed to be the safest weapon for the Mujahideen [Translator’s Note: Mujahideen does not refer to a specific group but rather is a generic term for holy warriors.] [Using explosives] allows them to get away from enemy personnel and to avoid being arrested. An assassination using explosives doesn’t leave any evidence or traces at the operation site. In addition, explosives strike the enemy with sheer terror and fright.

Defining Explosives:
They consist of chemical compounds or mixtures capable of being converted into large quantities of hot gas in a very short period of time. It is affected by a specific external agent that produces increasing pressure, resulting in a chain reaction.

Explosive Chain [Reactions]
A series of initial explosions starting with a small amount of highly sensitive explosives and ends with a large charge composed of basically stable explosives.

It is composed of explosions arranged to bring about a large yield.

The simplest explosive chain [reaction] has two stages whereas other explosions could require four stages or more. Any break in the chain prevents the material which follows it from exploding.
The Usual Series

The series starts with a small spark and ends with a sizeable explosion.

1. The Spark
2. Combustible material
3. A small amount of secondary material
4. Basic charge

Methods of Detonation:

This means pyrotechnics or electronic devices used for detonation. They are divided into means of generating – means of transferring – means of stabilizing.

A. Means of Generating

Divided into:

1. Combustible Means
2. Mechanical Means

B. Means of Transferring

Types of fuses:

First the Slow Fuse: (The Safety Fuse):

It consists of cotton or linen threads woven together and coated with an insulating layer of pitch or plastic, and has capsules of black gunpowder inside.

The threads help to circulate the wave of combustion. The pitch or plastic holds the fuse together and prevents it from absorbing moisture.

Characteristics:

1. Ignites with sparks or flames.
2. Ignites quickly, at about one centimeter per second.
3. Ignites under water.
4. Cutting it is a way to stop combustion.

**How to Prepare for the Explosion:**

1. Cut an appropriate length of fuse and check that there is no moisture.
2. Cut the appropriate length of fuse for the distance that would be sufficiently safe.
3. Cut one end of the fuse, which will be used for ignition, [at a 45-degree angle. The other end of the fuse, which is placed inside the blasting cap, should be at a 90-degree angle.
4. Put the fuse inside the blasting cap carefully and cautiously, and then put moderate pressure on the opening of the blasting cap.
5. Put the head of a match on the gunpowder at the end of the fuse cut at 45 degrees so that the head of the match touches the gunpowder, then ignite it by rubbing the flint on the pack with the match. It is possible that the fire will send its flame to the black gunpowder and the fuse will begin burning. In this case, cut the fuse on both ends at a 90-degree angle.

**Observation:**

White fuses are used in coal mines. Green fuses are used in the military, and they have more safety features. Black and orange fuses are for general civilian use.

**Second, the Fast Fuse**

It is the same as the slow fuse except for the fineness of the gunpowder and the speed at which it ignites, which goes up to 90 centimeters a second. Its use is limited to ambushes and traps.

**Important Warning:**

Before using any type of fuse, take part of it and test it to check that it is free of moisture, also check the ignition speed because if you were to use a fast fuse supposing that it is a slow one, then the burning will reach the blasting cap and the charge will explode before you leave the location.
Second, the Detonating Cord (Cortex Cord)

It consists of a flexible cord that contains highly explosive material covered with a layer of plastic to insulate it from moisture. It is distinguished from delayed fuses because it contains a very white substance, PETAN, though it could have another substance added to it, which would change its color to gray.

Characteristics:

1. Speed of explosion varies between five and seven kilometers a second.
2. It could explode with the force of 15 kilograms, or the round of a weapon.
3. [Can be] used underwater for not more than 15 hours.
4. It is used to explode several charges at the same time.
5. It is affected by moisture, the sun, electric shocks, and mechanical jolts.
6. It is used as an explosive belt to fell trees as well as cement and iron pillars.
7. It is in the shape of a coil varying in length from 100 to 200 meters.
8. It can be substituted for a large number of fuses.
9. It is used as an open cord to clear the way in a mine field and to increase the width by doubling the number of detonating cords which form the cord.

Blasting Caps

Consist of a metal capsule [made] of copper or aluminum containing a small amount of catalyst and other stimuli. Care and caution must be used while handling because it is very sensitive to external factors (bumping, shaking, and friction).
Composition of a Normal Blasting Cap

It consists of an extended pipe, one end which contains sensitive explosive material, which is the basic substance. Its charge is also pressure-sensitive. The third charge is combustible.

Length of the cap is 5 cm. Diameter of the cap is 7 cm

There is an example of the largest normal blasting cap. The normal blasting cap should only be exploded with a slow fuse.

[Drawing of a blasting cap with the captions: slow fuse (to the right) Chlorate and sugar 10% & Lead Nitrate 30% (beneath).]

Composition of the Electrical Blasting Cap

It has the same composition as the normal blasting cap, with the addition of a hot wire and connecting wire. The opening of the extended pipe is insulated with rubber.

[Drawing with the captions: hot wire (above), active substance (to the left), and (from right to left beneath:) Electrical wire, stabilizing column, wires, rubber, combustible charge, & catalyst.]

Precautions that must be taken with Blasting Caps:

1. Do not store blasting caps with explosive materials, and don’t expose them to the heat of the sun.

2. Don’t test a blasting cap with an O’meter, Alpha meter or other electrical devices which have batteries lest it explode (this pertains to electrical blasting caps.)

Connecting and Connectors

First: Connecting one Slow Fuse with Another:

1. Cut one end of the fuse at a 45-degree angle.

2. Place the two sides next to each other so that the black powder is in contact with both of the fuses together.

3. Connect the two sides with a strong tape or chord.
4. The head of a match or something similar can be placed between the two ends of the fuse before the connector. The two of them must touch the match stick, which increases the flames burning between them (ensuring the transmission of the flame from one fuse to another.)

**Second: Connecting a Slow Fuse with Another Blasting Cap (Explosive):**

1. A detonating cord can’t explode without a blasting cap, so there is no benefit from connecting a slow fuse directly; it should have a blasting cap placed between them to transfer the spark of the slow fuse to its cap so that the detonating cord will ignite.

2. When the slow fuse ignites, the resulting spark reaches the cap and it explodes and ignites the fuse.

**Third: Connecting the Detonating Cord with the End of the Cap:**

The two detonating cords can be connected to one of the following:

1. Place the two cords one above the other [overlapping] by 15 cm, and tie them with strong tape or cord. *Drawing with the following captions:* Blasting cap fuse (to the right), blasting cap fuse (to the left), and tape (beneath).

2. With a straight knot. *Drawing (no caption).*

3. A Tree Leaf [Knot]: *Drawing.* We connect this way when exploding two charges at the same time, starting from the main branch of the explosive cord, or to ensure the charge explodes using two detonating cords.

4. The Letter P Connector: *Drawing.* This connector is used when the direction of the explosive wave in the main branch is not known.

5. Letter Y Connector: *Drawing.* This method is also used when the direction of the explosive wave in the main branch is not known.

6. Broken Chord Connector: *Drawing.* It is used when the time needed to prepare the charges is limited. Connect it with an
explosive chord. Except for the problem of moisture, “Petan” causes a break in the fuse; it is not recommended to use this material for a period of more than 24 hours because of slackening of the two fuses, and they become separated.

7. Letter U Connector: [Drawing.] It is the safest because the explosive wave transfers from the main line to the parallel branch in both directions.

**Booby Traps:**

These consist of creative, innovative methods aimed at planting anti-personnel and anti-vehicle explosive charges, and the enemy is blown up as a result of normal movement without paying attention to what is around him. Booby traps are considered one of the best ways to execute an assassination operation against enemy personnel because we have gotten a long distance away from the site of the incident without leaving any evidence or trace enabling the enemy to know who were the perpetrators.

However, a brother should not be allowed the opportunity to work with setting booby traps until after he has mastered the use of explosives and has successfully worked in the electrical and mechanical fields, because the first mistake a brother makes could be his last mistake.

One of the most important considerations in placing a booby trap is to make the right choice of the appropriate switch that the enemy would not notice [and avoid his detecting] and removal of the charge.

Any sign of our work or presence in the area where the booby trap was placed must be removed, because any tools, pieces of electrical wire, tape etc. would put the enemy on the alert, and the plan and operation would fail.

**Switches for traps and explosive charge housings are categorized as follows:**

1. Electrical
2. Chemical
3. Mechanical
4. Friction
Electrical Switches:
They can be divided into four groups:

B. Delayed (timed): Alarm clock – Temperature – Closed circuit (pressure placed on the insulator until it burns and contact is made.)

C. Modifying Natural Circumstances: Temperature – Smoke or Sensitive Gas – Sensitive Metal.

[Drawing with the following captions:]
Switch (above), Charge with blasting cap (to the right), Opening to be closed after the operation is over (beneath), and Battery (to the left).

The entire success of the switch [depends on] intelligence, innovation, and judgment.

The Appropriate Switch

The electric circuit is considered the best because it is timely, but its only flaw is a leaky battery.

We will now touch on various simple types of booby traps to make it easy for the brother to comprehend; we have not written any new ideas in order to help invent other more preferable methods.

1. The charge goes off when the door opens after the target has pulled the insulation from between the contact points, and the electrical circuit is broken. If we want to kill the target, we put [the booby trap] over the door; if we want to cut off his legs or bring about permanent injuries to various parts of the body, we put it in the vicinity of the door.

Editor’s Comment: The matter of fact explanation of where to place the booby trap when the goal is to kill in contrast to where to place it
when the goal is only to “cut off his legs or cause permanent injury” is chilling.

[Drawing (on the left) with captions:]
Nine V Battery (upper right), insulation (upper left), the explosive charge (on the door), the personnel use a line fixed the wall, and it can make the charge explode as soon as soon as the prominent famous person is under it (to the left.)

[Drawing on the right (with captions:]
When the door is opened, the insulation is separated and the circuit is broken (middle left), attached insulation (lower left), the explosive charge (beneath).

2. Igniting / closing the circuit: When the electric switch is pushed, the circuit is connected and the charge explodes.

[Drawing and captions:]
Electric switch (upper left), charge without a fuse (bottom right), and battery (bottom left).

3. Booby–trapping a recorder and television: The idea is based on closing the circuit to [cause] the explosion when the equipment is turned on. A battery is used when setting the trap for a radio or recorder that works on batteries or by a power cord to the radio or television switch.

4. Booby-Trapping a Car: Close the electrical circuit and cause the explosion when the ignition key is turned to start the car. It is possible to use the car battery when setting this type of trap. Explosives placed in locations inside the car, in the back or front, cause the explosion to be centered inside the car.

[Drawing with captions:]
Ignition key (above). Charge with detonator and explosives (beneath).

5. Trap using an Alarm Clock: According to the drawing, the charge will explode at 3:30, when the small hand is on three and the big is on six. There must not be any insulation between the two hands. It
is advisable to use a flexible rubber wire in front of the number three in case the big hand goes past it more than one time per hour.

[Drawing with captions:]

Explosive charge (upper right), battery (upper left), flexible rubber wire (middle right), small [hour] hand (upper middle left), and the big [minute] hand (lower middle right).

6. Time Bomb Using an Alarm Clock: The explosion takes place when the time is reached, the alarm goes off, and the two electric wires make contact.

[Drawing (with captions):]

Charge without a fuse (above) and battery (upper left).

7. It is also possible to booby trap a car by connecting two wires from the battery. One of the blasting cap wires makes contact with the wire connected to the battery, and the other wire connects to the line and is also connected to the fan. The wire connected to the battery does the same thing. When the ignition key is turned, the blade rotates, and the two sides connect, closing the circuit.

8. There are very many things one could use in a very simple way to set a trap, like: shoes, bed etc.

Examples of Assassination Operations Using Explosives:

1. Blowing up a building or motorcade using a car bomb, whereby the driver of the car loaded with explosives blows up his [illegible-possibly car].

An Actual Example:

Some of the brothers in Egypt tried to blow up the motorcade of the former Minister of the Interior’s vehicle (ZIB) by putting 200 kilograms of TNT in a pick-up truck. When the minister’s car was seen, the brother approached in his car and blew up the car.

However, it didn’t cause an explosion in the car, and it was confirmed afterward that the explosives didn’t go off because no catalyst was placed
with the large quantity of explosives. The explosives ignited but they did not explode.

2. Throwing one or more bombs into a group of enemy personnel or into the target’s car:

An Actual Example:

Personnel from the Covert Branch of the Muslim Brotherhood threw some bombs into [some] stores and bars on the evening of January 7, 1947 at 11:00 pm.

3. Blowing up a location or car with a time bomb.

Some Palestinians were able to place a time bomb inside an aircraft’s radio, and after the aircraft took off it blew up in the air.

It is also possible to explode a time bomb using the timer from a washing machine or any other device (a fan, etc.); at a specified time, the two wires make contact and the charge explodes.
Sixteenth Lesson:
Assassination Using Poisons and Cold Steel

Assassinations Using Cold Steel:

A. Assassinating with a Knife:

When undertaking any assassination using a knife, the enemy must be struck in one of these lethal spots:

From the Front:

1. Anywhere in the rib cage.
2. Both or one eye.
3. The pelvis (under target’s navel)
4. The area directly above the genitals.

From Behind:

1. The axon (back of the head).
2. The end of the spinal column directly above the person’s buttocks.

B. Assassination with a Blunt Object:

A blow with a club must be in lethal areas.

From the Front:

1. The two eyes.
2. Where the veins and arteries converge in the neck.
3. Top of the stomach, with the end of the stick.
4. Above the genitals, with the end of the club.
5. The area of the tongue.
6. Choke the neck with the stick, like in a hanging.
From the Rear:

1. The area of the left ear.
2. The back of the head (axon).

[Translator’s Note: Blunt object, stick, and club were all the same word in Arabic; different choices were made to show range of meaning.]

Assassination with a Rope:

1. Choking (Neck area). There is no other area besides the neck.

Assassination using Hands:

1. Choking.
2. Poking the fingers into one or both eyes and gouging them.
3. Grab the testicles by the hand and twist and squeeze.
4. Grab the rib cage with both hands and squeeze.

Editor’s Comment: Note, while instruction for the preparation of poisons and toxic substances are widely available through open source material, in order to be prudent and not provide detailed instructions which could be exploited, the details of the following recipes, including ingredients, quantities, and techniques, have been deleted.

The description of the use of poisons to assassinate stands in contrast to other portions of the manual, where actions that seem to contradict the Koran characteristically received elaborate justification with Surahs and hadiths. The use of poison is indeed proscribed by the Koran. In a research study sponsored by the Smith-Richardson Foundation directed by the editor that systematically interviewed incarcerated Middle Eastern terrorists, several indicated they would not consider the use of nerve gas because of the Koranic proscription.

Assassinations with Poison:

We will limit [the discussion] to poisons that the holy warrior can prepare and use without endangering his health.
First – Herbal Poisons:

A. Castor Beans

The substance Ricin, an extract from Castor Beans, is considered one of the most deadly poisons. X is enough to kill someone. Death can be caused by inhaling or by injecting in a vein. However, though considered less poisonous if taken through the digestive system, chewing some Castor Beans could be fatal. It is a simple operation to extract Ricin, and Castor Beans themselves can be obtained from nurseries throughout the country.

Symptoms:

Need to vomit – diarrhea – unawareness of surroundings – the skin turns blue, leading to failure of blood circulation [sic] and finally ... death.

B. Precatory Beans

The herbal poison Abrin, extracted from Precatory Beans, is very similar to Ricin. The seeds of this plant are red and black and are used in prayer beads [Translator’s Note: like a Rosary]. [The detailed instructions, which have been deleted, include the requirement to put on “a pair of leather gloves” and to carry out the procedures “very carefully” because of the danger.] The Abrin will kill your victim slowly, but relentlessly.

Dimethyl Sulfoxide

[Instructions Deleted.] When the enemy touches the poison, he will die slowly within 15 minutes to an hour.

Extracting Abrin and Ricin

[Detailed Instructions Deleted.] The final result will be pure Eysein [PH] or Abrin.

C. The Water Hemlock Plant

Hemlock has a palatable taste, and is very similar to another plant, parsnip.

Symptoms:

Nervous spasms within 15 to 60 minutes, including severe locking and clenching of the jaw to the extent that the tongue could be cut off.
D. The Tanj Oil Tree

Second – Semi-alkaline substances:
They are highly solvent in alcohol.

A. Tobacco
There is enough nicotine in three cigarettes to kill a person. Sixty to 70 milligrams of pure nicotine will kill a person within an hour if eaten.

B. Potato Sprout
The potato sprout (both rotten and green) contains Solanine.

How to Extract Poisonous Alkaline

[Detailed Instructions Deleted]

Poisoning from Eating Spoiled Food
This poison is absolutely lethal. After consumption, the symptoms appear in 12 to 36 hours. They include dizziness, headaches, constipation, difficulty swallowing and speaking, fluids coming from the nose and mouth, and lack of muscle coordination. It results in death from respiratory failure. If it is received in the blood stream, death is very swift and almost without symptoms.

How to Prepare Spoiled Food:

[Detailed Instructions Deleted]

During the time of the destroyer, Jamal Abdul Nasser, someone who was being severely tortured in prison (he had no connection with Islam), ate some feces after losing sanity from the severity of the torture. A few hours after he ate the feces, he was found dead.
Seventeenth Lesson:
Interrogation and Investigation

Fundamental Differences between Interrogation and Questioning:
Many people confuse the nature of the interrogation with that of questioning, and confuse what should be mentioned in the interrogation with that of the investigation.

Interrogation:
Consists of a psychological warfare and intellectual combat between the intelligence agent and the suspect through questions and answers related to one or more topics. The interrogation uses all kinds of physical and psychological techniques to break the will of the suspect and lead him to a total collapse. The agency that conducts the interrogation is the government’s questioning apparatus that belongs to the Ministry of Interior Affairs. The officers of that apparatus graduate from the police academy. In our country, that apparatus has no values or code of ethics. It does not hesitate to use all kinds of torture and bodily and emotional harm to obtain evidence that could incriminate the suspect.

Questioning:
Questioning is similar to interrogation in that they are both forms of psychological warfare and intellectual combat. The questioning, however, is conducted by the prosecution [office of district attorney], which is under the judicial branch. That authority is (apparently) independent from the government (executive branch) and from the people’s parliament (legislative branch). The prosecution officials graduate from law school and use the technique of confrontation and repeated questioning, but without torture.

The brother should take the following measures:

1. Under pressure of torture in the custody of the questioning apparatus, the brother may reveal some secrets. However, in the custody of the prosecution, the interrogation does not use physical force, but may use psychological coercion (threats and
harsh words).

2. In publicized cases, the questioning apparatus is careful not to allow the brother to talk in the district attorney’s office. Coordination takes place between the questioning apparatus and the prosecution office. Torture of the brother takes place once again in the questioning apparatus [center] to force him to confess in the prosecution center. That may be repeated more than once, until the brother confesses or they give up. The important thing to remember is that whatever the brother says in the prosecution center will be recorded against him and will be the basis for his judgment.

3. Every word that the brother utters in the prosecution center makes a negative impact on him, on his colleagues, and later, on the judgment and major decisions.

When taken to the prosecution office, a brother should do the following:

a. He should, prior to questioning and whether or not he has injuries, ask the prosecutor or his representative to be seen by the medical examiner.

b. He should, when the questioning begins, ask that evidence of his torture be entered in the report proceedings.

c. He should, prior to the start of the questioning, ask that an attorney be present with him during the questioning process. He should mention the attorney by name.

d. He should ask for food.

e. He should deny all information [accusations] about him by the prosecution representative. He should claim that the interrogation apparatus has fabricated those accusations and should deny his connection to anything obtained against him.

f. The brother may have to confess under pressure of torture in the interrogation center. Once in the prosecution center, however, he should say that he was tortured, deny all his prior confessions, and ask that the interrogation be repeated.
Interrogation Techniques:

A number of techniques are used to interrogate the brothers. The exact techniques used may be different from one brother to another depending on the brother’s status in the group and on current events. Interrogation is limited to the following types:

A. Summoning:

1. This is the simplest type of interrogation. It can happen to anyone under normal circumstances. In this type, the interrogation apparatus summons a brother by letter or messenger to appear.

2. This happens when the brother does not respond to them [the interrogation apparatus], unless the command sees otherwise.

3. If the command approves his appearing, the brother should be careful not to give the enemy any [vital] information. He should agree with the command on the line of answers to be followed during the interrogation and should answer questions wisely.

4. Immediately upon his return, the brother should relate to the command all that happened to him in the interrogation process.

5. The [interrogated] brother should memorize the appearance of the interrogation building, its interior, and the appearance of the officers. The interrogation is a major opportunity for the [Islamic] group as long as the brother is tactful, bright, and observant. When summoned, usually the brother is not blindfolded or tortured.

B. Interrogation Surrounding Publicized Arrests:

1. The brother may be arrested as a result of public incidents, such as the murder of an important personality, military overthrow [of the government], or the escape of Islamic leaders from prison.

2. In these cases, the interrogation would be more severe. As long as there is no connection between the brother and the incident, the questions would remain general: Where were you during the incident? Who do you think executed it? Whom of the Jihad brothers do you know?

3. The degree of torture varies according to the importance of the
brother and the suspicion that he is connected with the incidents.

**Steps of Interrogation:**

1. The brother is arrested while walking in the street or at home. He is transported to a waiting room. After a while, he is searched and interrogated without being blindfolded (depends on the importance of the matter). He is then placed in a cell in the interrogation center, in a holding cell in the police station, or in a common prison.

2. The brother is kept for a few days without interrogation. Then he is interrogated by a number of persons in an interrogation room. The room is ordinary, containing one or more desks, some chairs, and some torture devices, as needed.

3. In the beginning, the brother may not be treated harshly, but rather kindly. He may be offered a chair with a cup of tea or a drink. Then he would be asked to recall information that is useful to the interrogators. If the brother refuses to offer any information and denies that he knows anything, he is then treated harshly. He and his family may be cursed, he may be forced into submission by following orders such as: face the wall, don’t talk, don’t raise your voice. All of that is to frighten the brother. The brother should refuse to supply any information and deny his knowledge of the subject in question. Further, the brother should disobey the interrogator’s orders as much as he can by raising his voice, cursing the interrogator back, and refusing to face the wall. The interrogator would resort to beating the brother in order to force him to obey. Thus, that attempt would fail.

4. Within about a day, another session would be held with the brother. Usually, in this session the brother would be blindfolded, beaten, and tortured. He would be made to believe that his role in the incidents has been learned and that it is better if he talks. The cursing and torturing would intensify, depending on what the brother reveals. The brother should not disclose any information, no matter how insignificant he might think it is, in order not to open a door that cannot be closed until he incriminates himself or
exposes his Organization. The interrogator cannot obtain what he wants and extract any information unless the brother talks. The brother may think that by giving a little information he can avoid harm and torture. However, the opposite is true. The torture and harm would intensify to obtain additional information, and that cycle would repeat. Thus, the brother should be patient, resistant, silent, and prayerful to Allah, especially if the security apparatus knows little about him.

5. In prison cells, do not talk to anyone you did not previously know. Some prisoners may be enemy agents or may have different orientations.

6. In cases like these, and as long as the brother indicates no connection to the incidents, the interrogation takes place in the interrogation center only, not in the prosecution center. In this interrogation session, it is important to remember the basic rule: Even a little disclosure of information would increase your amount of torture and result in additional information for the questioning apparatus.

**Investigating Specific Matters Connected to the Brother:**

1. The brother may be captured in a distant location through informants, or in a location connected to the incident (apartment, the actual incident location). At that time, the brother may possess items related to the incident (weapons, documents, blood stains, ...). The brother may also be captured while crossing the border.

2. The brother will be placed in a holding room, then stripped of his possessions (watch, money, Koran, ...), blindfolded, and handcuffed. The questioning begins, in a friendly manner, by writing reports about him (name, address, education, residence, employment, family, ...). In this session, the questioning official tries to break the resistance of the brother by informing him that confession is better for him and that steadfastness is impossible because he cannot deny anything. He adds that painful torture will be used if he does not talk. He lures the brother by saying that if he confesses he will be immediately released and given money,
educational scholarships, etc. In the first session, the brother would be studied through his statements and manner of dealing with the interrogator. Then a plan is devised for dealing with the brother.

3. If the earlier, friendly approach fails and the brother does not cooperate with the interrogator, another session is held using torture in order to control the brother through fright and orders (sit down, don’t sit down, face the wall, don’t talk, don’t raise your voice, curses and insults). The brother should not weaken, but should try to disobey the interrogator’s orders or take his time in executing them. If the interrogators find that the torture technique is successful, they would intensify it. However, if they find that the brother is dodging them, they would resort to psychological torture techniques.

4. Some interrogators may try to confuse the brother, distort his reasoning, and tangle his thoughts by throwing many questions at him at the same time and not allowing him the chance to answer them. If the brother delays his answers, he would be struck. During that torture [session], the brother is given a chance to speak, even tell a lie, in return for halting the torture. He is given a sheet of paper and asked to write whatever he wants in return for his release, for not prosecuting him, etc. They start deceiving the brother by saying that his refusal to talk or write means that he is afraid of revealing dangerous secrets he possesses.

5. During the interrogation, or while the brother is in the holding room, he may be made to listen to another brother’s cries from a nearby cell. This is done in order to break the brother’s resistance. They may even resort to having the brother hear some of his brothers’ confessions and bringing papers and documents that prove his involvement in the incident.

6. In all prior situations the brother has three options:
   a. Patience, steadfastness, and silence about any information whatsoever. That is very difficult except for those who take refuge in Allah.
b. Executing the security plan that was agreed upon prior to
execution of the operation and not deviating from it.

c. In case others deviate from the security plan, confirm the
information given without adding to it.

d. If the brother is the first subject in the interrogation, he
should adhere steadfastly to the security plan in order to
avoid trouble for the brothers that will follow.

e. The worse case – Allah forbid – is when the brother breaks
downs totally and tells all he knows, which is due to a poor
choice in the brother. Thus, it is important to test
individuals prior to such work in order to ensure their
steadfastness and minimize the likelihood of their breaking
down. Testing may be done by accusing him of being an
enemy agent and lying about the reported information, in
the event he is supplying detailed information.

f. Important information should not be discussed with the
brothers, as they might reveal it during the interrogation.

**Torture Methods:**

Secret agents use two methods of torture:

A. Physical torture.

B. Psychological torture

**A. Method of Physical Torture:**

1. Blindfolding and stripping of clothes.
2. Hanging by the hands.
3. Hanging by the feet [upside down].
4. Beating with sticks and electrical wires.
5. Whipping and beating with sticks and twisted rubber belts.
6. Forcing the brother to stand naked for long periods of time.
7. Pouring cold water on the brother’s head.
8. Putting out lighted cigarettes on the brother’s skin.
11. Attacking the brother with vicious dogs.
12. Making the brother sit on a stake.
13. Throwing in a septic tank.
14. Pulling out the nails and hair.
15. Dragging.
16. Tying the hands and feet from behind.
17. Utilizing sharp objects, such as a pocketknife or piece of glass.
19. Sleeping on a bare marble floor without a cover and flooding the cell with sewer water.
20. Standing on toes and against a wall pressing with the fingers for long hours. The brother may be denied sleep, food, drink, and medicine.
21. Beating on cuts and sore parts of the body.
22. Giving the brother a lot of water or very watery fruits, such as watermelon, after denying him food and drink. After the brother drinks or eats the fruit, his hands and penis will be tied so the brother will not be able to urinate.
23. Placing drugs and narcotics in the brother’s food to weaken his will power.
24. Placing the brother in solitary confinement where the cells are made of a special kind of cement that gets extremely hot in the summer and cold in winter.
25. Hitting the brother’s genitals with a stick or squeezing them by hand.
26. Dragging the brother over barbed wires and fragments of glass and metal.
B. Methods of Psychological Torture:

1. Isolating the brother socially, cutting him off from public life, placing him in solitary confinement, and denying him news and information in order to make him feel lonely.

2. Forbidding calling him by name, giving the brother a number, and calling him by that number in order to defeat his morale.

3. Threatening to summon his sister, mother, wife, or daughter and rape her.

4. Threatening to rape the brother himself.

5. Threatening to confiscate his possessions and to have him fired from his employment.

6. Threatening to cause a permanent physical disability or life imprisonment.

7. Offer the brother certain enticements (apartment, car, passport, scholarship, etc.)

8. Using harsh treatment, insults, and curses to defeat his morale.

9. Controlling everything the brother does, even in private, whether he is awake or asleep, to convince him that they are in charge. They would force him to bow his head and look down while talking with the guards.

Further, let no one think that the aforementioned techniques are fabrications of our imagination, or that we copied them from spy stories. On the contrary, these are factual incidents in the prisons of Egypt, Syria, Jordan, Saudi Arabia, and all other Arab countries. Those who follow daily events and read the newspapers and journals would be amazed to learn that:

- security personnel totally undressed veiled women in public. The security personnel arrested a brother’s mother, a brother’s sister, and a brother’s wife and raped them.

- the wife of brother Saffout Abdul Ghani – may Allah have him released – had a miscarriage when the government’s dogs (i.e. cronies) beat and tortured her in front of her husband.
the security personnel captured brother Hassan Al-Gharbawi’s mother, who is older than 60 years, and hanged her by her feet [upside down]. The security personnel shaved the head of the wife of a brother who participated in the murder of Rif’at Al-Mahjoub [Egypt’s former parliament speaker].

The stories are numerous and there is intense torture while Muslims are in deep sleep.

O young men waging a holy war for the sake of Allah, there is still hope in you. Your country awaits you, your brothers await you, your wives wait you, the Muslim hostages await you.

Editor’s Comment: The level of detail is impressive in this description of techniques of interrogation and torture, with reference to personal experiences that Al-Qaeda personnel and their wives, mothers and sisters have undergone. To be so informed and be able to anticipate and recognize these techniques is designed to be of assistance in resisting them.

1. While being taken to the interrogation and torture areas, one should concentrate heavily on the route and try to memorize any signs in order to benefit operations and plan development.

2. In the beginning of the interrogation, a security officer (interrogator) would come to you with fatherly advice, deceitful phrases, and “crocodile tears” so you might confess and tell them everything.

3. It is necessary to secretly discard any document related to the work or anything else considered criminal evidence against you. Better, do not carry any documents concerning the work.

4. From the first moment in captivity, the brother should proudly take a firm and opposing position against the enemy and not obey the orders. The more firm and opposing the reaction, the more
beneficial it is. These reactions will not lead to harsher treatment. Do not give the enemy an opportunity or an opening.

5. During the torture process, pretend that the pain is severe by bending over and crying loudly.

6. As the torture intensifies, its end nears.

7. Between torture sessions, the officers bargain with the brother and entice him with ending the torture if he supplies them with any information.

8. During the torture session, the counseling preacher may become a vicious beast.

9. The one who gives one piece of information to avoid the lashes of whips is deluding himself because the torture would intensify.

10. It is necessary that each brother plan for his interrogation and discuss it with his commander. He may be captured one day.

11. When I talk while under torture, I do not mention unknown dates and places to the security personnel, but well known ones.

12. When I mention dates or names, it is important to memorize them because they will ask about them again to know if I was truthful.

13. Pretending to be naive and ignorant during the questioning may lead to diverging from the plan, because all factors are against the brother: The place, the people, the situation. That leads to some or all the outcomes desired by the enemy. That is, it is important to remain psychologically and mentally calm and to maintain alertness and foresight.

14. Detailing events during the questioning, whether verbally or in writing, directly increases the crime. That person’s situation is just like someone who falls in a swamp [quick sand]: the more he tries to save himself, the deeper he sinks.

15. The less information supplied during the torture, the lighter the judgment will be.

16. A devastating mistake that results in harsh judgment is that of a brother revealing information to others in his cell not revealed
during the torture. This is especially true when the interrogation is still going on, his fate has not been determined, and the case has not been closed.

17. Relating experiences should not take place prior to the judgment, but after it.

18. The interrogators may resort to planting suspicion and mistrust among the brothers. They may pretend that they have a friendly relationship with one of the brothers. It is necessary to think well of one another.

19. Do not accept humiliation and disgrace. Disobey orders and oppose them.

20. It is important to coordinate with your brothers before executing any operation (security plan).

21. The security personnel may leave you for long periods of time without asking you any questions in order to break your will and determination.

22. During the interrogation, say only the things that you agreed upon with your commander. Do not be concerned about other brothers.
Eighteenth Lesson:
Prisons and Detention Centers

If an Indictment is Issued and the Trial Begins, the Brother has to Pay Attention to the Following:

1. At the beginning of the trial, once more the brothers must insist on proving that torture was inflicted on them by State Security [investigators] before the judge.

2. Complain [to the court] of mistreatment while in prison.

3. Make arrangements for the brother’s defense with the attorney, whether he was retained by the brother’s family or court-appointed.

4. The brother has to do his best to know the names of the state security officers, who participated in his torture and mention their names to the judge. [These names may be obtained from brothers who had to deal with those officers in previous cases.]

5. Some brothers may tell and may be lured by the state security investigators to testify against the brothers [i.e. affirmation witness], either by not keeping them together in the same prison during the trials, or by letting them talk to the media. In this case, they have to be treated gently, and should be offered good advice, good treatment, and pray that God may guide them.

6. During the trial, the court has to be notified of any mistreatment of the brothers inside the prison.

7. It is possible to resort to a hunger strike, but it is a tactic that can either succeed or fail.

8. Take advantage of visits to communicate with brothers outside prison and exchange information that may be helpful to them in their work outside prison [according to what occurred during the investigations]. The importance of mastering the art of hiding messages is self evident here.

- When the brothers are transported from and to the prison [on
their way to the court] they should shout Islamic slogans out loud from inside the prison cars to impress upon the people and their family the need to support Islam.

- Inside the prison, the brother should not accept any work that may belittle or demean him or his brothers, such as the cleaning of the prison bathrooms or hallways.

- The brothers should create an Islamic program for themselves inside the prison, as well as recreational and educational ones, etc.

- The brother in prison should be a role model in selflessness. Brothers should also pay attention to each others needs and should help each other and unite vis a vis the prison officers.

- The brothers must take advantage of their presence in prison for obeying and worshiping [God] and memorizing the Koran, etc. This is in addition to all guidelines and procedures that were contained in the lesson on interrogation and investigation. Lastly, each of us has to understand that we don’t achieve victory against our enemies through these actions and security procedures. Rather, victory is achieved by obeying Almighty and Glorious God and because of their many sins. Every brother has to be careful so as not to commit sins and everyone of us has to do his best in obeying Almighty God, Who said in his Holy Book: “We will, without doubt, help Our messengers and those who believe (both) in this world’s life and the one Day when the Witnesses will stand forth.” May God guide us.

[Dedication]

To this pure Muslim youth, the believer, the mujahid (fighter) for God’s sake, I present this modest effort as a contribution from me to pave the way that will lead to Almighty God and to establish a caliphate along the lines of the prophet.

The prophet, peace be upon him, said according to what was related by Imam Ahmed: “Let the prophecy that God wants be in you, yet God may remove it if He so wills, and then there will be a Caliphate according to the prophet’s path [instruction], if God so wills it. He will also remove
that [the Caliphate] if He so wills, and you will have a disobedient king if God so wills it. Once again, if God so wills, He will remove him [the disobedient king], and you will have an oppressive king. [Finally], if God so wills, He will remove him [the oppressive king], and you will have a Caliphate according to the prophet’s path [instruction]. He then became silent.”

The Importance of Team Work:

1. Team work is the only translation of God’s command, as well as that of the prophet, to unite and not to disunite. Almighty God says, “And hold fast, all together, by the Rope which Allah (stretches out for you), and be not divided among yourselves.” In “Sahih Muslim,” it was reported by Abu Horairah, may Allah look kindly upon him, that the prophet, may Allah’s peace and greetings be upon him, said: “Allah approves three [things] for you and disapproves three [things]: He approves that you worship him, that you do not disbelieve in Him, and that you hold fast, all together, by the Rope which Allah, and be not divided among yourselves. He disapproves of three: gossip, asking too much [for help], and squandering money.”

2. Abandoning “team work” for individual and haphazard work means disobeying that orders of God and the prophet and falling victim to disunity.

3. Team work is conducive to cooperation in righteousness and piety.

4. Upholding religion, which God has ordered us by His saying, “Uphold religion,” will necessarily require an all out confrontation against all our enemies, who want to recreate darkness. In addition, it is imperative to stand against darkness in all arenas: the media, education, [religious] guidance, and counseling, as well as others. This will make it necessary for us to move on numerous fields so as to enable the Islamic movement to confront ignorance and achieve victory against it in the battle to uphold religion. All these vital goals cannot be adequately achieved without organized team work. Therefore, team work becomes a necessity, in accordance with the fundamental rule, “Duty cannot be
accomplished without it, and it is a requirement.” This way, teamwork is achieved through mustering and organizing the ranks, while putting the Amir (the Prince) before them, and the right man in the right place, making plans for action, organizing work, and obtaining facets of power……

Editor’s Comment: This final section extolling the value of teamwork and unity draws upon the famous Surah about the Rope, 3:103, Ali Imran. “And hold fast, all together, by the Rope which Allah (stretches out for you) and be not divided among yourselves. And remember with gratitude Allah’s favour on you: for ye were enemies and he joined your hearts in love so that by His grace, ye became brethren: And ye were on the brink of the Pit of Fire and he saved you from it. Thus doth Allah make His signs clear to you: That ye may be guided.”

The context of this Surah is the feuding within Al-Yathrib. Once Mohammad came to Yathrib, he brought God’s word, and with this, peace and brotherhood were promoted among those who were previously enemies. Thus the central point of the Surah is not about teamwork, but about the power of God’s word to turn enemies unto brothers. The point is to promote peace, not to promote solidarity as a prelude to killing as is suggested in the manual.

This final use of the Koran to promote a particular behavior is paradigmatic of the manner in which it is used throughout the manual, taken out of context, placing a meaning upon the citation that is quite different from that intended. But the effect will be powerful and the meaning not questioned, for the youth who move into Al-Qaeda have been trained from childhood to accept without question the truth as conveyed to them by learned religious authorities.
Notes

1. The editor wishes to acknowledge his appreciation of the critical review of the text by Daniel Blumberg, an expert on radical Islam who is Associate Professor of Government and Middle Eastern Affairs at Georgetown University. Commentary on the Surahs draws on the analysis of Professor Blumberg.

4. Virtually all reports refer to Osama bin Laden as the only son of his mother with Muhammed bin Laden. Following her divorce, Osama bin Laden’s mother remarried and subsequently started a second family.

8. Several contemporary journalistic accounts and accounts of participants in the camps provide a view of life in the terrorist training camps run by Osama bin Laden and his Al-Qaeda organization in Afghanistan. These camps are often referred to as “Terrorist U,” because of the extensive and specific training given to young recruits hoping to fight in the jihad. It is a place where the Koran (the Islamic Holy Book) is
melded with the Kalashnikov (the Czech made semi-automatic favored by terrorists.) The training includes religious studies as well as military instruction. The primary camps were within Afghanistan; however they were only about 80 miles from the Pakistani border. They were simple, isolated camps far from regularly traveled routes. Illegally crossing the Kyber Pass and using ancient smuggling routes, recruits, food, weapons and other supplies routinely cross from Pakistan into Afghanistan and on to the training camps. While most of the attendees at the camps were Afghan and Pakistani, students also came from Algeria, Chechnya, Iraq, Jordan, Kuwait, Palestine, Saudi Arabia, Syria, Bosnia and Africa. Reportedly the warriors-to-be rose before dawn for early morning prayers from the Koran and a breakfast of dried dates. The next three hours were spent learning to use, dismantle and reassemble weapons such as the AK-47 rifle and anti-aircraft guns. Lunch consisted of flat bread and chickpeas, followed by two hours of live fire training in the empty hillside. Recruits practiced throwing live hand grenades and firing AK-47s. The standard day ended with a rowdy game of soccer and dinner. This “basic training” reportedly lasted at least 15 days. Some recruits were then “invited back” for a more intense level of training including learning how to wire explosives and blow up buildings and bridges. These recruits were also often trained to become suicide bombers, or shaheed. While at the camp, recruits lived in tents and mud huts on “bases” which were surrounded by barbed wire and guards on duty 24 hours a day. The camps lacked basic electricity and running water and most of the buildings were made of cinder blocks. Students sat on cement floors in large classrooms while Islamic clerics acting as instructors used a simple chalkboard. According to reports, much of the curriculum was based on the hard-line teachings of Osama Bin Laden. Although he ostensibly ran the camps, few students actually met him. Osama Bin Laden’s presence was felt throughout the camps, from taped lectures he prepared for the recruits, to his picture being taped to doors throughout the camps. There was a strong anti-American message throughout the course of studies, portraying all Americans (not just the government) as evil and attempting to corrupt Islam. Students were told that Osama, “‘the lion,’ has come out of his cage to devour the enemies of Islam.” A student related an often-heard message from his courses, “They told us, ‘Osama expects to die in glory, and that’s what Allah expects of you too.’” One recent visitor described the ideological training as nothing short of “brain-washing.”

10. This story is found in the book *A’n Tarik Al-Khida’ “By Way of Deception Methods,”* by Victor Ostrovsky [PH]. The author claims that the Mossad wants to kill him for writing that book. However, I believe that the book was authorized by the Israeli Mossad.

11. Cell or cluster methods should be adopted by the Organization. It should be composed of many cells whose members do not know one another, so that if a cell
member is caught the other cells would not be affected, and work would proceed normally.

_This footnote, referring to “cell or cluster methods,” emphasizes the care with which Al-Qaeda approaches security. The “need to know” principles is carefully adhered to, so that the with the exception of the commander, the lower level members are only informed of that which they are required to know in order to carry out their operation. Thus should they be apprehended, they cannot reveal information under interrogation concerning other cells. As an example, in the coordinated attacks on the U.S. embassies in Nairobi, Kenya and Dar es-Salaam, Tanzania, with the exception of the overall operational commander, the members of one cell were not aware of the existence of the other._

12. It is possible to also say “kidnapping an important person.” All security measures and arrangements in assassination and kidnapping are the same.

13. Review in detail the notebook: _Lessons in Special Operations._

14. For details, refer to _The Spying Journal: Religious Duty and Human Necessity._

17. This book is the memoirs of an Iranian Communist. The handbook states that “all brothers should read it.”
