

AIR COMMAND & STAFF COLLEGE

21st Century Leaders for 21st Century Challenges

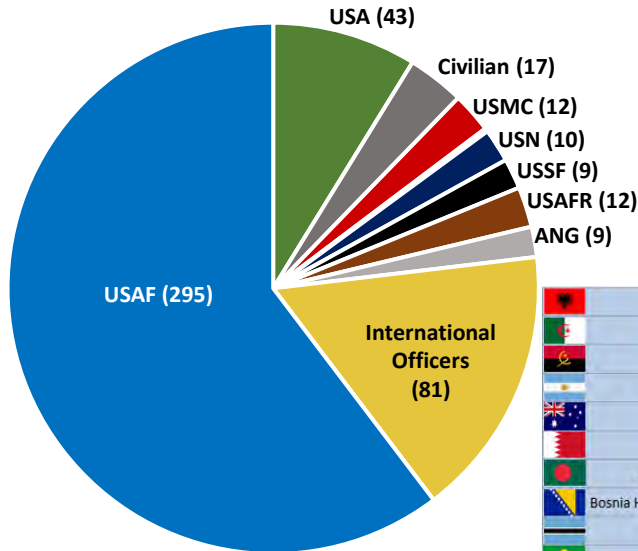

Academic Year 2024

MISSION

Educate and develop joint leaders who integrate airpower into all-domain operations, solve complex problems at the operational level of war, and advocate for airpower's role in a competitive future environment.

STUDENT DEMOGRAPHICS

VISION

The premier military institution for developing airpower leaders who solve problems at the operational level of war.

PROGRAM LEARNING OUTCOMES

Air Command & Staff College produces air-minded graduates who are able to...

- Demonstrate creative thinking, critical analysis, and persuasive communications about airpower and operational problem solving
- Apply principles of leadership and ethics to decision-making based on shared values of the profession of arms
- Apply capabilities, limitations, and integration of the instruments of national power across the spectrum of competition, conflict, and war
- Analyze operational environments marked by complexity, uncertainty, and surprise
- Apply military theory, doctrine, strategic guidance, and joint warfighting principles to plan for all-domain, globally integrated operations
- Explain the conduct of contemporary and emerging warfare
